

THE CITIZEN.

ATLANTA, GEORGIA, SATURDAY, FEBRUARY 14, 1889.

LOCAL MATTERS.

A visit to M. E. Clark's ice machine premises on East Congress street, opposite the public school, shows one of the most complete establishments of this or any other kind in the country. No expense has been spared to have everything as complete as the ingenuity of mechanics can make it, and the whole is now in a shape where it comes very near the automatic. The process used now requires the attention of but one man to turn out a continuous supply of ice to the amount of 250 pounds every three hours; and that the quality of the article produced is of the best is proven by a sight of the stock on hand in the freezer and the store-house, where over eight tons are kept ready for use. The manufacture is something after the style of the water, which is purified by running into pans of the usual shape, each holding sixty pounds. The pans, each of which is supplied with a pair of wheels, are lowered into a large tank of water, containing all the salt it will hold in solution, and there they rest on tracks running from one end of the tank to the other. The tank is supplied with a very thick double cover of wood lined with charcoal, and has running around its interior a pipe containing the freezing mixture. This pipe is in contact with the salt water, but has no opening whatever into the tank, thus preserving the ice from any possible chemical taste. The freezing is done in precisely the same way as ice-cream is frozen, and the ice is equally pure. What is used in producing the low degree of temperature we are unable to describe. It is a liquid brought here in an iron tank under heavy pressure. It is high priced, but it is wasted but very little, passing from a liquid to a gaseous state and back again in infinitum. When the season comes the works will make in the neighborhood of a ton and a half a day; the process going on continuously at the rate of over a thousand pounds an hour. The very best arrangements have been made for storing the manufactured articles, lots of it are now lying in the store-room without changing from day to day. When the heat of summer comes, we shall expect a great relief from its disagreeable effects by a retreat to the ice house of Mr. Clark.

Railroad Matters.

By coach Thursday returned Mr. T. M. Cash, Special Freight Agent of the S. P. R. R., who informs us that the track to-night is twenty-eight miles this side of Casa Grande, or about four miles this side of Pinalo Pass. A permanent station will be established at a point twenty miles this side of Casa Grande, from which will be delivered all merchandise and freight for Phoenix, Pinalo, Globe, etc., and no other station will be established until the road reaches Tucson. This conclusion was reached last night and will be verified by news in the people of Pinalo County. After transacting some important business with our merchants Mr. Cash will make a trip to Phoenix and Prescott on railroad matters and then return to Tucson as resident agent for the company in this city. Mr. Cash is favorably known in this section as a business man and we are pleased to know he is to stay with us. The road will be completed to Tucson in three weeks.

Mr. C. R. Drake returned from a flying visit to Tombstone Thursday by Olmstead and Walker's stage line, leaving Tombstone at 7:15 a. m., and arriving in Tucson at 9 p. m., making the trip in nine hours and forty-five minutes, the fastest time on record. He brings favorable news from Tombstone, everything assuming an air of prosperity, and the people generally are sanguine of a bright future for business and mining. It would be well for that portion of our public who are afflicted with unsound teeth to take heed of the fact that their sufferings may be relieved. On Wednesday arrived from Phoenix Dr. L. H. Goodrich, a dental surgeon whose established reputation needs no commendation from us. He has taken parlors at the Palace, and as his sojourn will be brief all in need should act.

WARREN ALLISON came in Wednesday from Patagonia. Mr. Allison and brother are interested in the Redoubt able claim adjoining the W. C. Davis mine. Parties are after this claim and offered \$1000 down and \$29,000 in sixty days, but the boys could not see it. They say they have just as good a claim as the W. C. Davis.

A TRAIL of eight wagons went south the 12th with part of Harshaw mill. Three hundred thousand pounds are on the way from Casa Grande, and as much more will follow. The appearance of the machinery is that of very heavy work.

MR. W. L. WAKEFIELD arrived Wednesday from Patagonia. He has been doing work on some mines in the Tucson District, west of the Patagonia. The Silver Heels claim has developed well and we understand it has been bonded for a fine sum.

FRESH FRUITS, Barley, in quantity Canned Fruits, Potatoes, Dried Fruits, Pickles, and Table supplies of all descriptions just received by Pierce & Wood, whose large trade and quick sales enable them to deal on close margins.

HOPKINS & JOYCE have been in town several days, buying supplies for their new store in Harshaw. They are wide awake fellows and are sure to make success of anything they take hold of. They have a number of mining claims that are looking nicely.

CAME very near having another snow storm last night. About an inch of snow fell between seven and nine o'clock, but it all melted away before rain which followed. It was a very bad night, and a hard one to be out in.

C. D. HAYS and C. R. Norman got in Wednesday from the Catalina placer diggings. They report rich diggings and plenty of water; in fact, too much water at present.

SINCE the last note on the subject, bullion bars 7, 8 and 9 have come in from the Corbin mill, increasing the total production by \$6288.19.

REEVES & COTTIAN is the name of a new firm just starting at Harshaw. A large lot of supplies were shipped this week. Success to them.

FRESH oysters cooked in any style, at the Maison Dorée.

FREIGHT MOVEMENTS.

Arrivals at Casa Grande, February 12.

Table with columns: Name, Pkgs., Weight. Includes Zeckendorf, Corbin M & M Co., Tombstone M and M Co., etc.

Ball for February 19.

Mr. Levin, with his usual enterprise is making preparations for an elaborate ball, to be given on the 19th inst. He proposes to charge \$3.00 a ticket, \$2.50 of which will go to Mr. Levin for expenses of supper, hall and music, and the remaining dollar is to be given to the Library Association. Here is amusement, generosity and benefit all around. We trust the enterprise will be encouraged on every hand and the entertainment well patronized.

MR. F. M. KNOX returned last Thursday from Globe, whither he went to look after his various interests. While there he and Henry Lyons took a bond on the southeast extension of the A. I. mine, one of the finest prospects in the district. They have a shaft down 100 feet, the ore in the bottom of the shaft assaying over \$200 per ton. They have run a drift 100 feet between two shafts and the work is going steadily ahead.

THE Southern Pacific railroad company established its Tucson office in a room formerly occupied by Manuel Vasquez, next to Lord & Williams, Congress street. Mr. T. D. Cash presides and will minister to the wants of shippers from this time forth. Both the company and its customers have reason for congratulation for the employment of so agreeable a gentleman as Mr. Cash.

By passengers arriving to-day by the Magdalena stage we learn that Deputy Sheriff Selis, of Los Angeles, who went to Guaymas to bring back A. J. Hamilton, the ex-City Treasurer, arrived at Calabass all right with his prisoner, but omitting to have irons on him Mr. Hamilton quietly stepped down and out. Sheriff Selis at last accounts was hunting him, with good show of success.

We call special attention to the new advertisement of Messrs. Tully, Ochoa & Co. in this week's issue. They are our oldest merchants and their long continued success is witness to the value of the trade in this locality. They not only have one of the largest establishments here, but their house at Bowie is the most important in Southern Arizona outside of Tucson.

H. S. OSBORNE arrived in the city last evening. Mr. Osborne is a member of the Chicago bar, and has spent the greater part of two months in an extended examination of Sonora's mining and other resources, having gone southward from Yuma by private conveyance. He will remain in Tucson a few days and then return to Yuma by the same route by which he came.

In keeping with the spirit of progress manifest throughout the city we notice the opening of a new tin shop on the corner of Main and Pennington, under the auspices of George Boehme, who being a skilled workman and thorough man of business is prepared to accommodate his customers at living margins.

THE new St. Joseph's Hospital, on the west side of the valley, now makes quite a prominent feature of the landscape in that direction. Its white walls and stories in height give promise of comfort to the afflicted who may have the good fortune to find shelter there.

MR. LOUIS METZ, special agent and adjuster for the Royal, Norwich Union and Lancashire Fire Insurance Companies, visited the various mining camps before returning to San Francisco. He left for Los Angeles to-day.

MR. R. B. METCALFE and family and T. B. Clark arrived yesterday from Los Angeles. Mr. Metcalfe was for several years Superintendent of the Longfellow copper mine, and was the original locator.

A. D. OTIS & Co. will open a branch of their establishment at Tombstone next week, of which Mr. Eccleston will take command. Both the enterprise and success of this comparatively new firm are thus highlighted.

JUDGE J. B. SOUTHWARD, late of Sonoma county, Cal., and ex-judge of a District of that State, arrived with his wife by coach to-day, and intends to settle in Tucson.

In sinking an air shaft on the Hermosa a body of green chloride silver is reported to have been struck which promises a fine addition to the resources of the mine.

PROF. F. DURAN, the celebrated magician, will give an entertainment in Levi's Hall to-morrow evening. His programme is now before the people.

J. F. BOYD, a director of the Western Mining Co., Contention, and S. B. Low, an experienced mining man, are at the Cosmopolitan.

D. FELIX & Co. just received 50 boxes of apples and several thousand pounds of jellies, jams and canned fruit.

HON. H. GOLDBERG and wife arrived yesterday, and are guests of S. H. Drachman.

MR. DEMPSEY, the Montezuma merchant, is in town.

D. B. GILLETTE came up from Patagonia district last night.

The self constituted organ of the Democracy had no telegrams yesterday by stage, owing to the telegraph line being down west of Yuma.

FOR the week bars 7, 8 and 9 have come in from the Corbin mill, increasing the total production by \$6288.19, and from the T. M. & M. Co. \$4088.98.

PRESIDENT CROCKER, of the Southern Pacific railroad, passed up to the front yesterday.

A Glimpse of Arizona.

Southeastern Arizona, a country European in extent to hold a European Empire, is not a desert; it is unlike the southeastern portion of California and western Arizona. The surface features of the country are made up of a succession of mountains or broken chains of mountains, with wide plains, mesas and valleys intervening. Two of the mountains are very high, rugged and precipitous. None of their maximum altitudes will exceed 10,000 feet. The Santa Rita, Catalina, Huachuca, Dragon and Chiricahua mountains, being the only ones that approach the maximum, are rugged and difficult to traverse. Adjoining the mountains on all sides, for the mountains are none of them continuous ranges, are generally a series of high mesas or high bench lands, rolling with heavy undulation. Below these and all along the streams are bottom lands, and all mountains, mesas, bench and bottom lands are covered all the year round with a luxuriant growth of several varieties of grasses. Stock grazes all the year around and keeps fat. Fuel is supplied by the mesquite, which is abundant in all parts, and very many of the high mesas adjoining the mountains are covered with orchards of oaks. I say "orchards" because they resemble the old time orchards of Pennsylvania. In many of the mountains the gorges are filled with pines, juniper, and I believe, yew trees. There are several saw mills at work, doing an extensive business, cutting lumber in the Santa Rita, Huachuca and Chiricahua mountains. Lumber sells at \$70 per M.

As to the people, morality, society and other kindred things, I will say that the country in these respects is not what it has been. If it ever was the last and safest refuge of fugitive slaves, this is no longer the case. Society is, as a general thing, as good in this portion of Arizona as in any mining section on the Pacific coast. Churches are established in Tucson, and Tombstone. Schools are in existence in all parts of the country, and Arizona is blessed with a good, judicious and liberal school law. The country is being very rapidly settled up with good and industrious people. Not alone the wild, roving rakes, but good men with their families from the east, west, north and south—from Maine, California, Minnesota, Texas—farmers, mechanics and professional men—are settling in the towns and in the country, opening up farms, vineyards and nurseries, establishing stores and shops and offices.—(Correspondent to Record-Union.)

"BLUE MONDAY."—For some reason yesterday was an unusually "blue Monday." Stock dealers and every body else seemed to be regularly down in the mouth. People could see good in nothing. This is characteristic of our Comstockers. They are always away up above the mark or out of sight below it. The Comstock goose either soars above the clouds or drops its tail in the mud. Should a big development in any one of our leading mines be announced to-day, people would see whole acres of rich ore all along the lead and as far north and south of known mining claims as a compass would show its course. The majority of our people have no well grounded or fixed opinion in regard to the value of any mine on the lode. Their notions of the worth of mines vary from day to day in accordance with what they hear said about them. The few men who have fixed opinions in regard to the mines and who have steadily adhered to them through thick and thin have resaped their reward in almost untold wealth. With most persons where a stock is low the mine is worth nothing and they will have nothing to do with it, but when the stock is "away up" they see great mountains of ore in the mine and are ready to pitch into it neck and heels. "Blue days" as well as "booms" are infectious, and a steady and level head is required to walk sedately through both and gather in the gold that each is capable of yielding. "Blue days" are the seed time and "booming days" the harvest.—[Editorial, Feb. 5.]

Items from the Silver City Herald. At its last session Congress provided that New Mexico should have twelve Senators and twenty-four Representatives in its Legislature. The question of apportionment is now up under this act and it is stirring up much excitement in our neighbor Territory. The canvass for Territorial officers is also going on. Col. W. Breedon, of Santa Fe; Frank Springer, of Cimarron, and E. A. Fiske, of Santa Fe, are candidates for Attorney General. For Treasurer and Auditor the present incumbents, Antonio S. Fortiz and Trinidad Alacid are supposed to have the best chances.

The Legislature has passed a bill for a revision of the Territorial laws, providing for a commission of three persons to perform the labor. The Silver City Daily Southwest is the new paper started by S. M. Ashenfelter at our neighbor city across the line. We shall be glad to welcome the fledgling and wish it long life.

From The McCracken. A letter to us from the McCracken Mine, of the Signal and McCracken mills were running on tailings, and making money. The tailings at the Signal run all the way from \$13 to \$18 per ton while those of the McCracken average about \$25. The last clean up at the McCracken from the pans, \$4,000 in bullion was secured. The Copper Mill starts up under favorable circumstances, as the ore is said to be worth \$1,000 to the ton. So mote it be.—[Miner, February 6th.]

The great carbonate camp of Leadville is to have another evening paper, which will be Republican in politics and will be run with the old Eclipse material. Charles Whitehead will be the political editor.

From Washington. The Senate has confirmed George D. Bowman, Register of the Land Office at Mesilla, N. M., and Samuel W. Sherrey as Receiver of Public Monies at the same place.

Congressman Daggett has introduced a bill providing an appropriation of \$700,000 to erect a government building at Carson City for the accommodation of Federal Courts, Postoffice and Land Offices. This certainly is a very modest demand.

The bill for relief of settlers on public lands, introduced by Page, is a duplicate of Senator Booth's bill relative to lands upon which the government allowed preemption or homestead settlements to be made, but which were subsequently found to be covered by Mexican titles or railroad grants, etc.

A proclamation is expected from the President within a few days in regard to reported combinations in Kansas and Missouri for the invasion of Indian Territory by large bodies of squatters. The purpose of the President to prevent this will be clearly set forth, and the necessary disposition of troops to enforce the position of the proclamation will be made at once.

A VERY few years ago there were but two weekly papers in Arizona Territory. Now there are several daily publications, many of them issued at places where a wilderness reigned only two years ago. The next census will probably make a very favorable showing for the Territory. Even now ambitious politicians, with Senatorial or more moderate projects in view, are making it their home, confident that it will be knocking at the door of the Union for admission in a comparatively brief period.—[S. F. Chronicle.]

Thank you; we haven't come on quite so fast as that. There are five daily newspapers in this Territory; but their places of publication, Prescott, Phoenix and Tucson, were rather beyond the wilderness stage two years ago.

As nature abhors a vacuum, so is a lull in the stock market a cause for disgust to those who buy, sell and get gain by the rapid fluctuations of prices. Whether the movement is upward or downward is, as Toot would say, "of no consequence," but for their delinquency some motion is an imperative necessity.

On Sunday evening Mr. A. G. Ryan, the purchaser of the handsome corner of the corner of Fort and Second streets, was the recipient of a serenade, led by Mr. Chas. Hollman assisted by Prof. Knell. The party was sumptuously entertained by Mr. Ryan and his beautiful wife, and all went as merry as a marriage bell.—[L. A. Commercial.]

REAL estate matters are beginning to pick up. Lots are getting to be in demand, and before long we may expect great activity in that direction.

A FLOURISHING Chinese store has been established at the upper end of China town, on Main Street.

THE Iron Cap Mine of Arizona has been secured fifty cents per share, de-liquint March 10.

THE Cabinet has confirmed the sentence dismissing Major Reno from the service.

THE wood market is now quite overstocked, and prices are down to the neighborhood of reason again.

W. W. WILLIAMS is taking some needed recreation in a visit to Tombstone, Huachuca, Patagonia, etc.

FRESH FRUITS, TABLE SUPPLIES, TABLE SUPPLIES, ALL AND CHEAP, ALL AND CHEAP, PIERCE & WOOD, PIERCE & WOOD.

Nichol's Infalible Injecton. Guaranteed to cure promptly and permanently every case, no matter of how long standing, if directions are followed. Internal medicine not recommended or necessary. A cure guaranteed or money refunded. Directions in English, German, French and Spanish. For sale by C. H. Meyers, Congress street.

PIERCE & WOOD, Wholesale Fruit and Produce Dealers, Meyers Street, Are Constantly Receiving FRESH GARDEN AND FIELD SEEDS.

Valentines! Valentines!! February 14 will soon be here. Be sure and go to Earl & Co's. in time to look over their fine stock of Comic and Sentimental Valentines.

Gunsmiths & For gunsmithing and all kinds of repairing and work of like nature go to J. Graber, west side of Main street, opposite the Cosmopolitan Hotel.

STRANGERS coming to Tucson should not forget to visit the Pioneer News Depot.

SUBSCRIPTIONS taken for all the leading papers and magazines at the Pioneer News Depot.

D. VELASCO has on commission a lot of No. 1 barley, Mesilla street, nearly opposite THE CITIZEN office.

THE best brands of cigars and tobacco at the Pioneer News Depot.

TOYS and fancy goods at the Pioneer News Depot.
