[From Saturday's Daily.]

A telegram yesterday announced that Lottrell, of California, had introduced a bill in Congress, granting a pension to the widows of the Peace Commissioners who were killed by the Modoc. We hope this bill will not pass. Not that we are devoid of sympathy with the surviving relatives of the Modoc victims, but because we consider such an act would be unjust toward others. Why should pensions be given to the relatives of those who, for a few weeks, placed themselves within reach of the murderous savages, by the orders of the government, when no provision has ever been made, or even hinted at, for giving aid or relief to the widows and orphans of the thousands of brave men who have been killed in Arizona and elsewhere in the western States and Territories, after years of daring and fighting to secure a home in the country opened to them for settlement by the government? Were the victims of the mistaken "peace policy" pursued in the Modoc affair any more worthy than those who have been killed at the mine, or the plow, while pursuing the peaceful employments of American citizens, and developing the resources of our country? If the widow of Gen Canby, or of any other officer killed by the Modocs, is entitled to a pension under military usages, customs or law, let it be paid, but we oppose the precedent of granting pensions to them because they are the widows of Peace Commissioners.

Hellings & Co. have a gang of men at work repairing the new road from Phoenix to Camp Verde, which was badly washed in places by the late rains. Messrs H. & Co. built the road, which is a public convenience, and as they can get no assistance from other parties in repairing it, they will probably apply to the Supervisors of Maricopa and Yavapai counties for permission to incorporate it as a toll road.

We understand that Gen Crook contemplates a further shortening of the military road to Camp Verde, by building a new piece of road from Agua Fria valley by Maple Shades, and through Copper Canon to the Verde valley. Should the General carry out the plan, the distance to Phoenix from Prescott by that route, and Hellings & Co.'s road, would be only about ninety miles.

LAND OFFICE BUSINESS.—W. N. Kelly, Register of the Land Office at Prescott, has given us a statement of the business done in his office during the year 1873, which shows that the number of declaratory statements filed was forty-eight, covering 7,150 acres. Cash entries, eighteen, covering 2,753.41 acres.

Homestead entries, four, covering 640 acres. Mineral lands sold, seven claims, viz: five on the Tiger lode, one on the Eclipse and Benton lodes.

Applications for patents to mineral claims filed, thirteen. Adverse claims filed, two. M. L. Striles, Register of the Land office at Florence, sends us a similar statement, showing that since that office was opened in July, 1873, forty-three pre-emption claims have been paid for, covering over 6,000 acres; and nine declaratory statements filed, covering 1,440 acres.

Four mineral claims have been sold, and seven applications for patent to mineral claims filed.

Since the completion of the plan originated by General Crook of building a military telegraph in Arizona, the superintendent of military posts in New Mexico, urges government to extend the telegraph from Santa Fe to all the posts in New Mexico.

The extension should be made, and our line continued on from Camp Verde to Santa Fe. It is already evident that the Arizona line will practically pay for itself in a short time in the great saving it effects in time, control of military operations, dispensing with Expresses, and reducing general and incidental expenses, and it is believed that the citizen business over the line will keep it in repair, if it does not give a profit besides.

In California the brigand Vasquez and his band have inaugurated a reign of terror that bids fair to equal the performances of the famed Joaquin. Large rewards are offered for his capture, and a bill has been introduced in the Legislature to reimburse Sheriff Adams of Santa Clara, for funds expended in attempting to capture the outlaw.

The Star and Express of Los Angeles, Cal., published well written Christmas stories, and Major Truman, of the Star, sent out, in addition, a very pretty Christmas chant, in rhyme.

The maintenance of large legislative bodies is advocated in the old states, as the surest safeguard against bribery and corruption.

The San Diego World chronicles the departure from that town of Mr J. H. Strauchon, who is coming to this section to engage in business.

The county treasurer of Leavenworth, Kansas, is a defaulter to the amount of \$67,000. This county sympathizes, \$1,592 worth.

[From Saturday's Daily.]

The San Bernardino Argus began its second year January 1st, and, in reviewing the last year, says that the town has improved considerably—new buildings have gone up, men of means have come into the town and valley, and the Argus has been patronized beyond its expectations in subscriptions and advertisements. All this speaks well for the town; any intelligent community will and should support good local papers like the Argus and Guardian, and the success and prosperity of a town or country depends greatly on its newspapers, which are the natural exponents and reflectors of public sentiment and the pioneers and promoters of progressive civilization.

MOHAVE COUNTY.—Our Corbat correspondent sends the following, under date of January the 7th: "Several parties have arrived from San Francisco and Los Angeles of late, and are doing some figuring here. Will probably know more about them in a few days. Professor White, mineralogist of the state of Nevada, is among the rest."

The following list of Territorial officials has been nominated and confirmed by the Governor and Council of New Mexico: Attorney-General, Col Wm. Bredener; Attorney 2d District, Benjamin Stevens; Attorney 3d District, John D. Ball; Adjutant-General, Thomas S. Tucker; Treasurer, Antonio Ortiz Salazar; Auditor, Trinidad Alarid; Librarian, James C. McKenzie; Quartermaster-General, Ed. Miller.

The Denver Tribune promises to expose the corrupt and villainous proceedings of the officials of that city. It claims that official maps and records have been destroyed, school funds stolen, and robberies of every description perpetrated on the public.

The Kiowa Indian Reservation, near Fort Dodge, contains about two thousand Indians who have recently been very troublesome outside of their limits, and the Atchison Champion, of Dec. 11th, gives a detailed account of the capture, near Camp Supply, by them, of a boy seventeen years old, who was driving a wagon. The wagon had been broken and piled up, the boy tied to the pole, scalped, and burned alive and the horses taken away.

When the boy was missed a party went out hunting for him, and found his half-buried remains, with all the evidence of the manner of his death.

Give it excitement exists among the old settlers near the reservation, who declare that if government does not punish the Indians for the murder, they will do it themselves.

Governor Campbell of Wyoming, in his message to the Legislature, states that the Union Pacific Railroad Co. have in that Territory seven artesian wells, varying in depth from 326 to 1,145 feet, supplying from 800 to 1200 gallons per hour of pure water. The cost of the wells averaged \$9.67 per foot.

Our exchanges, from all parts of the United States, agree that it is a disgrace to our government that Quichise's tribe have been allowed, for so long a time, to raid upon the Mexicans in the adjoining States of Sonora and Chihuahua, while the tribe is harbored and fed upon a U. S. reservation.

Gen W. W. Belknap, Secretary of War, was married Dec. 10, to Mrs Amasa Bower, at Harrodsburg, Ky. The wedding was strictly private, only a few relatives of the parties being present.

A prize of fifty dollars is offered in San Diego for the best essay on the varied advantages of that town.

When Congress first assembled, the telegraph informed us that the promotion of Gen Crook was confirmed at once. The news was not confirmed, and in commenting on the case, the Sacramento Union remarks:

Some time ago it was announced that General Crook, now on duty in Arizona as Brevet Major-General, but whose actual rank in the army is that of Lieutenant-Colonel, had been promoted to Brigadier-General, viz Canby, deceased. It appears from recent dispatches that since his name was submitted to the Senate for confirmation the Judge Advocate-General has given an opinion that there is no vacancy to be filled, for reason that under the act of Congress of July 15, 1870, the number of Brigadier-Generals cannot exceed six, and there are already that many in office. Gen Crook, during his long and efficient service on this coast, has made many warm friends, to whom it will be a great disappointment if it should be found that there is no law to authorize the promotion he so much deserves. If he cannot be promoted now, it would be but right to allow the nomination to stand, so to speak, until a vacancy does occur; for there is probably not a better officer in the army.

Many newspapers in small towns east of the Rocky Mountains have half of their paper printed in St. Louis or Chicago, where one publishing office prints the inside of dozens of country papers, all alike, and at a small cost.

Perhaps the reading matter thus printed to order may be well selected, but it is not likely to be interesting or useful to the people of one locality more than another. An exchange referring to a paper got up in that style, says: "When a paper cannot be printed where it is published, it is not needed, and ought to be suppressed."

Three furnaces for smelting base metal ores are now in operation in Inyo, California, and are turning out bullion rapidly.

Mr Wm. E. Smith, agent of the Associated Press at San Diego, who compiles the telegraphic dispatches for the MINER, is entitled to credit for the good judgment he exercises in selecting telegrams for Arizona.

[From Monday's Daily.]

It is claimed that the Atlantic & Pacific Railroad Company have forfeited their claim to 5,000,000 acres of land granted by Congress in the state of California, and Mr Oulton, of California, has introduced a resolution in the Senate requesting the Secretary of the Interior to reopen to preemption and purchase, said lands.

The contest over the confirmation of Attorney Gen Williams, as U. S. Chief Justice, has been ended by his own action in withdrawing. He will retain his present position. The protests of the New York bar and of other associations of prominent jurists, against his appointment, on the ground of inexperience, etc., has been effective.

It is very encouraging to note that the old monopoly administration of the Pacific Mail Co. has given way to a more liberal policy, and that the company's steamers are to run for the accommodation of the public more than heretofore. An opposition line is now running from San Francisco to way ports in Southern California.

### YUMA COUNTY.

The Arizona Sentinel of Dec. 27 and Jan. 3, came by yesterday morning's mail, and furnish these items: "There is a probability that the citizens of Yuma will get a patent for their town-site covering all the ground they ask for. The Holidays in Yuma were consumed with little drunkenness or disorder. The editor of the Sentinel does not believe the 'dirty bean' story published in the Los Angeles Mirror and credited to the telegraph man, Haines. The New Year's ball in Yuma was attended by many officers from Fort Yuma. A magnificent supper was furnished and the Sentinel editor partook of the same with a grateful heart and appreciative stomach. The two fine stallions brought in by H. C. Hooker cost \$1,000, each, and are praised as the noblest specimens of horse-flesh ever imported into Arizona. The delinquent tax list in Yuma county for 1873, only amounted to \$505, out of the total of \$12,944.75 on the tax roll. Capt Wakeman, a ship master well known on the Pacific coast, is taking a trip up the Colorado river for his health. Mr G. W. Nash, whom Prescott people will remember, is teaching school in Yuma, and has just been joined by his wife, from Indiana.

The Albuquerque Review mentions the arrival there, Dec. 23, of Dr George M. Willing, superintendent of the Willing Mining & Exploring Company, on his way to Arizona to look after the mining property of the company. Many of our readers will remember Dr Willing's expedition here in 1865, and his explorations in the country around Black Canon, southeast of the Bradshaw mountains. We believe the company owns half a dozen good mineral veins there, and are glad to know that there is a prospect that work is to be done on them. Dr Willing thinks that that operations can be safely resumed, and he is right. The vicinity of Black Canon used to be a favorite home of the sneaking Apache-Yumas, but they are mighty scarce there now.

One of the proprietors of the Review has been on a visit to southwestern New Mexico, and was very favorably impressed with the activity in mining operations at Silver City, and Los Croces, much of which he attributes to the vigorous prosecution of work on the Clifton copper mines, just over the line in Arizona, which bid fair to become notable throughout the country. The shipment of pig copper, and copper ore from the mines, gives employment to large trains. Mr Hommel thinks Silver City one of the liveliest towns in New Mexico.

Our Territorial dispatches in the Daily, Saturday, show what an old rascal and mischief-maker the San Carlos Indian chief, Ekiminzin, is. He should, when arrested, have been securely kept and sent to Alcatraz, or elsewhere, out of harm's way. It is singular how after they are arrested and imprisoned, so many of these redskins escape.

Everybody who knows the celebrated clown and circus manager, Dan Rice, will be sorry to learn that on account of bad investments he has lost all his property, \$26,000, and is poor again.

A NEW WEEKLY.—No. 1 of Volume 1 of the Weekly San Francisco Chronicle, is found on our table to-day.

Chas. De Young & Co. are young men, active, enterprising and energetic. Their success in bringing the Daily Chronicle to the front rank among San Francisco papers has been wonderful and they promise what they seem able to perform to make the Weekly the star newspaper of California.

Terms of subscription \$4.00 (coin) per annum, and they give to every subscriber a splendid map of the United States.

If the style of the first number of the Weekly Chronicle is kept up none of its patrons will regret subscribing.

Messrs Curtis, Collingwood and Bennett, who came here to attend the opening of bids for contracts, at Fort Whipple, leave for their homes, in the southern country, by buckboard to-morrow morning.

We have given our readers a number of items from our contemporaries showing how our daily is received abroad. This "little dab" takes a larger scope than most of them and complements all Prescott.

Prescott, Arizona, is making rapid strides forward. Its citizens are a wide-awake and energetic people. Prescott has had a live weekly newspaper in the MINER. At the beginning of the present month, the MINER commenced issuing a small daily edition. It is an attractive little sheet and replete with information relative to Arizona matters.—(Santa Cruz Sentinel.)

The Pennsylvania State Fishery Commissioners are stocking the rivers of that state with young California salmon. The spawn is carefully sent from California to Bloomsburg, New Jersey, and there hatched under the care of a state agent. The young fish are transported in large cans by railroad to the points where they are placed in the streams. Last month 10,000 young salmon were turned loose in the Susquehanna river near Harrisburg, Pennsylvania.
