EDISON AMBEROL RECORDS

are the new records that play twice as long as the regular Edison Records. Thus Amberol records can be used on your present Edison phonograph by the addition of a simple attachment or gear, and you can still play the records you have. Amberol records not only play longer than any other record now made, but they play better, their tone quality being richer, clearer and more delicate than has been possible in the past. Let us put an attachment on your Edison Phonograph or sell you an Edison Phonograph that will play both Records.
