AMATEUR ATHLETES.

Another Popular "Ladies' Night" for Next Month. Owing to the great success of the last "ladies' night" given by the Sacramento Athletic Club, the members have been clamoring for more of these popular entertainments. Last evening the Board of Directors held a special meeting and decided to give the next "ladies' night" on the 14th of next month. The last exhibition was furnished by the juvenile class, but the coming one will be by the best talent among the regular members. It will be an invitation affair, and will probably succeed the exhibition.

WONDERFUL GIFT.

A Maine Backwoodsman Said to Have Made Remarkable Cures. BANGOR (Me.), March 26.—General interest is being excited here by the marvelous cures wrought by William Brown, an aged backwoodsman who lives near Fort Kent, in the Adirondack region, and who had not been out of the woods for thirty-six years until last week, when he came to Bangor, accompanied by a prominent resident of Holtton. Brown has cured several persons who were crippled simply by rubbing his hands over their bodies, and several cures performed by him last Sunday are the talk of the city. He is a man of about 70 years of age, and has a very strong, muscular, and stable body was treated by Brown, and in a few minutes was dancing about, apparently cured. A well-known invalid, who was also treated for an ailment, expressed himself as greatly surprised. In the afternoon Brown visited the home of Asa Warren, a prominent resident, and worked his most remarkable cure on his son, Willie Warren, who was born crippled and had been on crutches for nearly a year. After Brown had kneaded and rubbed his flesh for nearly fifteen minutes the boy dropped his crutches and later went upstairs without assistance. Brown knows nothing of spiritualism or religion.

FALSELY ACCUSED.

A Reporter Tells How a Campaign Document Originated. KANSAS CITY, March 25.—A special to the Star from Topeka says: J. W. Henthorn, a newspaper reporter, created a sensation before the Coffeyville Dynamite Explosion Investigating Committee this morning. He testified that at the time of the explosion he was city editor of the Winfield Telegram, and in connection with that editor and owner of that paper it was decided that the Republican party should be charged with the cause of the explosion. He wrote and sent to the Chicago Times, St. Louis Republic and the Kansas City Times dispatches which appeared in those papers in October, 1888, charging the Republican party with the explosion. He said he had no information whatever on which to base his charges, and that his dispatches were without foundation. The dispatches were reprinted by the Union Labor and Democratic papers throughout the State and widely circulated.

EXPERT BILLIARDISTS.

Shaefar Will Accept Carter's Challenge for the World's Championship. CHICAGO, March 26.—Jake Shaefar has returned home from Cincinnati, and will formally accept Eugene Carter's challenge to play for the world's billiard championship. Shaefar has ten days in which to reply to the challenge, and he will name April 25th as the date of the match, but Carter will probably desire to play at a later date. The latter's game with Ives is scheduled for April 20th, and in the natural order of things that game would have the precedence over the Shaefar game. "The Wizard" said Carter's challenge gave him the greatest shock of surprise he had ever experienced. He had been practicing considerably recently with Carter, giving him odds, and in his opinion Eugene displayed a rare amount

ATLANTIC STEAMSHIP SERVICE.

New Line Projected From Canada to Europe. MONTREAL, March 26.—Montague Allan and J. S. Allan, of the Allan Steamship Line, have arrived in England on business connected with the new steamship project. It is proposed to form a new company of which the Naval Construction and Armament Company of Barrow-in-Furness and the Allan Company will be chief promoters. Negotiations between the two companies are at present in progress, and they are expected to be successful. The intention is to have the new company take over the existing line of steamers and run them principally as freight steamers. The new line will be under the control of the Allans and be neutral as between the Grand Trunk and Canadian Railways. The new company is working to secure a Government subsidy. Three or four fast steamers will be built, similar to those running to New York, and it is expected traffic to come from Chicago and the Northwest will thus be diverted toward Montreal. Montreal will be the summer port and either Halifax or St. John will be winter port.

CLEVELAND FORGERY.

A Worthless Bill of Lading Sold to a Chicago House. ST. LOUIS, March 26.—A Windsor dispatch says: A clever forgery has just been revealed here, which will cost Woods Bros., a commission company of Chicago, heavily, but as yet the amount is unascertained. On the 19th instant Thomas S. Sibler presented a bill of lading for a lot of live stock, signed by the agent of the Missouri, Kansas and Texas road at Windsor, on which Woods Bros. ordered the First National Bank of Sedalia to pay \$100,000. The bill was for eleven cars of stock. The bank paid the draft and immediately drew on the Woods Company, the drafts being promptly met. Yesterday Woods Bros. telegraphed to Missouri, Kansas and Texas agent that they held his bill of lading for eleven cars of stock and asked where the shipment was. The agent said nothing of it, and wired that the bill of lading, and it is believed that the bill is large. The railroad people are investigating.

SHE RUNS A PLANTATION.

Remarkable Business Capacity of a Beautiful Alabama Woman. Mrs. A. H. Perrine, the Alabama woman who helped capture the Fulton County murderer, Jim Richardson, in Alabama, a short time ago, is remarkable for her business capacity. She owns and runs a plantation of 4,000 acres in Randall County, Alabama, in the very heart of the negro belt. Her executive power is something wonderful. There are few men who could successfully and profitably take her place as manager. She rules like a dictator. Last year she gained 600 bales of cotton, running the enterprise herself. She is a notably handsome woman, superbly made, with a face indicating intelligence and masculine determination and nerve. She never has serious trouble with the negroes on her plantation. She is thoroughly familiar with every detail of farm work, works herself and personally superintends all the labor on the place. She has the most successful planters to be found in the new State. Her promise is good for an order of \$5,000 at the store, and her business obligations are almost discharged promptly and exactly. For the arrest of the negro murderer, it will be remembered, she received one-half of the reward, and she has given to Sergeant Bob Osburn, of the Atlanta police force, a \$10,000 reward.

EQUAL TO AMERICANS.

How Servants in the Mongolian Empire Make Extra Money. The Chinese squeeze is not exactly the "big" squeeze, nor the cross-grained hands found in friendship. It is a commercial term, and refers to a pressure exerted upon money, in any form, by the hands of an average man through whose hands it may pass, and to whom it does not belong—a pressure which causes a portion of the money to remain in his pocket. It is the "X" in the algebraic formula of every purchase you make, the value of which you can never discover. The problem is something like this: "If my cook buys ten pounds of beef and charges me 12 cents a pound for it, how much does it cost him, and what is the amount of his profit?" Or perhaps it takes another form, somewhat like the following: "If I go to a store and buy ten yards of silk, which I bring home and sell to another store, but my butcher discovers the fact of the purchase and goes to the store, how large a squeeze does he exert on the merchant?" The Chinese, it takes another form, and reads as follows: "I sent \$5 the other day to a Chinese woman who is very poor. How much did the servant who brought the money take from me, and how much did he keep as a squeeze?" The sufferer by this system call it stealing, while those who practice it regard it as a business transaction. The Chinese, in their dealings with one another, all suffer from it and all practice it. The system is as old as the empire, and is said to have had its origin in the ancient custom under which household servants were paid no regular wages, but received food, one suit of clothes a year and, in addition, a sum of money raised in this manner: "From the price paid for every article of whatever sort, used in the family, the gate-keeper or porter retains one piece of 'cash' in every fifty. At the end of each year the sum was distributed among the servants in proportion to their positions in the service of the family. If cloth can be made out of fine spun glass, it would seem a simple matter to solve the problem of the Chinese. It is done by boiling strips of fine-grained cotton, crushing them between rollers, carding the filaments into parallel lines, as with ordinary textile material, and spinning them into threads, from which cloth can be woven in the usual way.
