

FARM AND ORCHARD.

As the Food is, so is the Animal. —Revise the Signs.

Early and Late Weeds, and How to Destroy Them—Milk for Cheese Factories—Butter at One Dollar Per Pound—General Farm Notes.

Notwithstanding the fact, for such it is, that as the food is so is the animal, the living body has no power of forming elements, or of converting one elementary substance into another.

The applied sciences illustrate many astonishing facts in this connection. Take, for instance, the skeleton of a chicken immediately after or just before emerging from the shell.

Pure cold water should be allowed in quantities limited only by the cow's capacity and desire to drink.

Wild weeds and other weeds common in bush pastures give an offensive odor to the milk of animals which eat them.

One dollar seems pretty high for a pound of butter, yet there is one grade which brings that fancy price in the Washington, D. C., market.

Many of the most valuable weeds on the farm are sometimes destroyed before the plants are an inch high, by weeds, the difficulty being that the weeds can only be removed by hand labor, which is too expensive.

When a cow is lame on one or a bare field to pick up her food she not only travels over a great distance of ground during the day and scores but a portion of that work she must do at night.

When a cow is lame on one or a bare field to pick up her food she not only travels over a great distance of ground during the day and scores but a portion of that work she must do at night.

cent milk veins that turned out to be inferior producers, and others with poorly defined milk veins that proved large and persistent performers.

It is better for being kept over night in small quantities, rather than in large quantities in one vessel.

"SINKERS" AND HOSIERY.

Stolen Property Found on Two Men Arrested in the Plaza.

John Smith, alias "Mulle Pete," and John D. Tucker, were arrested about 3 o'clock yesterday morning in the Plaza by officer Snook and special officer Drew.

They admitted that they had stolen them from a bakery wagon on J street, between Tenth and Eleventh, a short time before they were arrested by the officers.

Captain Lee says that the undergarments were probably taken from somebody's clothes line, as they were not quite dry when they were examined at the jail.

A charge of petty larceny will be entered against Smith and Tucker, and they will appear before Judge Craven to-day.

"Don't feel well" and yet you are not sick enough to consult a doctor—we will tell you just what you need.

Milk from cows in good health and apparent contentment only should be used.

Pure cold water should be allowed in quantities limited only by the cow's capacity and desire to drink.

Busy Fruit-Growers in a Pretty Yolo Valley—Tancred and Its Adjoining Farms.

IN THE SPRING OF LAST YEAR Robert A. and Neal D. Barker associated themselves with William McKay, all of Oakland, with a view of searching out a suitable location in which to engage in the profitable occupation of fruit-growing.

Negotiations were opened with the Capay Valley Land Company, owning the tract in question. With W. H. Mills, the General Agent of that company, they arranged for the purchase of about 220 acres of foothill land.

The balance of the tract, 37 1/2 acres, was purchased. A contract was entered into for the purchase of a large number of fruit trees, vines, etc.

The ideas which the prospectus set forth have been slightly modified and the progress of the company has been uninterrupted. Those who have been interested in the matter have been enthusiastic, and almost all the members arranged to set out all their lands in fruit trees, etc., the first year.

The satisfactory working of this scheme has had the effect of attracting considerable attention to the work of the Colony Company, and a number of people are now contemplating joining in with them.

For the company has predicted a very bright future, as well as for the beautiful valley, which their operations are conducted. How this marvelous little garden has come to be so long neglected is a puzzle to every one who has visited it, but one thing is very sure, and that is that this neglected valley never again be left in the valley.

The fruits set out are mostly of the standard varieties—peaches, apricots, Bartlett pears, prunes, figs, and small fruits, etc. Both sides of the stream, in order to give the tract, walnuts will grow their graceful shade. A considerable number of citrus trees are also being set out; quite a sufficient number to do credit to the colony.

A petition has been circulated recently and very largely signed, asking the county to accept Island avenue, on the colony tract, as a county road, and to build a bridge across Cache Creek at this point, in order to give the settlers on the east side of the creek access to Tancred Station.

The following is a list of the principal members of the Tancred Colony, with the number of acres owned by each, and a fact worthy of mention is that in each contract or deed issued by the Colony Company there is a provision that no intoxicating liquor shall ever be manufactured or sold on the land.

Wm. McKay, 20 acres; Mrs. T. A. Cullen, Oakland, 5 acres; C. H. Peach, Tancred, 5 acres; H. C. Ellis, Oakland, 10 acres; J. Vanstone, Winnipig, 10 acres; E. A. Vanstone, Tancred, 5 acres; E. Wadsworth, Sacramento, 5 acres; M. A. Thomas, Oakland, 4 acres; James Graham, San Francisco, 11 acres; A. Stark, 10 acres; J. Stark, 10 acres; Mrs. M. Vrooman, 5 acres; C. E. Snook, 10 acres; C. T. Grathend, 12 acres; Wm. McKay, 5 acres; Mrs. Wm. McKay, Oakland, 5 acres; Mrs. E. C. Woolley, Brooklyn, N. Y., 10 acres; Mrs. H. Beckley, Oakland, 5 acres; T. A. Marriet, 5 acres; J. C. Harrison, Tancred, 5 acres. The land reserved by the Colony Company, including townsite, is 100 1/2 acres.

W. H. SHERBURN, AUCTIONEER, 323 K STREET, - - SACRAMENTO.
