

ILLS OF THE FLESH.

Their Causes, Nature and Treatment Discussed by Doctors.

An Interesting Day's Session of the State Medical Society--The Evening Reception.

Yesterday was the third and last day of the session of the State Medical Society, and the members assembled as usual in the Senate chamber. It was considerably after 10 o'clock before President Clu-

The Chairman of the Board of Censors reported favorably on the application of Dudley Tait for admission to membership, and he was unanimously elected. The Chairman also announced that the first order of business would be the reading of a paper by Dr. David Powell on the "Prophylaxis of Diseases in Children."

The doctor said there had been no marked epidemic among children in California during the past year. Diphtheria had been prevalent to a great extent in some portions of the coast, and the sanitary condition of these districts was no doubt accountable for the disease. He related how he had successfully cured patients of the disease, and stated that every physician should be called for persons who could be vaccinated against it.

In regard to scarlet fever, the doctor said that during the past year the State had enjoyed a complete immunity from the disease. Whooping cough caused but very few deaths during the year, and diphtheria among children in summer was hardly ever fatal, as a result, as in the Eastern States. It has been estimated that at least 25 per cent. of deaths among children under one year of age, and 14 per cent. among children under five years, resulted from convulsions, which were brought about by feeding the child with indigestible food.

The meeting adjourned to reconvene at the Art Gallery at 8 P. M.

The paper was referred to the Committee on Publication and the discussion was opened by Dr. E. R. Merrill of San Francisco. She stated that the large number of deaths of children under five years of age was caused for some time by cholera. In her experience she had noticed that the infant which was allowed to nurse many times a day, taking a very slight amount of food, was more likely to develop a small stomach and was compelled to take nutriment often in order to satisfy itself. She did not believe in allowing the baby to nurse over long periods. A good live child could inhale more oxygen in ten minutes while awake than in two hours of sleep.

Then, again, she did not think a lot of chattering nurse girls congregated about the baby-carriage did the least bit of good, and it was certainly the custom in our fashionable neighborhoods.

Dr. Brown's paper was also referred to the Committee on Publication.

The selection of the remaining members of the Board of Examiners was proceeded with, and the following gentlemen will constitute the board: Drs. Regenberger, Lewis, Shilks, Wadsworth, Blake, Dr. Fourman, Dr. E. R. Merrill, Drs. Whitell, Bazel and Winton.

Dr. H. N. Miner's paper on "The Surgical Diseases of Children" was read by the Secretary. It was mainly written, and explained the different methods to be employed in treating all deformities of the child, and diseases which develop shortly after birth.

The paper was referred to the Publication Committee.

O. C. Hawkins and F. W. R. Cleveland were admitted to membership on recommendation of the Board of Censors.

Dr. W. H. Sherman of San Francisco read a composition entitled "Insular Conditions in Connection with Hip Joint Diseases," and he gave the society some valuable information in regard to operations which he performed recently in case of hip disease. His paper was also ordered printed.

Dr. Plummer presented a recommendation from the Executive Committee, advising that the National Medical Association be invited to hold its convention in 1892 in San Francisco, and suggesting that the California delegation in Washington be asked to urge the association to come to the coast.

The recommendation was adopted unanimously.

Was the title of a paper read by Dr. H. G. Brainerd, of Los Angeles. He said that at present there are 8,000,000 people in the world known to be addicted to the cocaine habit, and it is recognized as the third scourge of America--the alcohol and opium habits alone outranking it. The victim is entirely insensible to the yellowish color of his skin, his sunken eyes, encircled with purplish flesh, his unsteady gait and noticeable nervousness. The effects of the deadly drug are plainly to be noticed after the unfortunate has used it for two or three weeks. He begins to get restless, is unable to sleep at night, and frequently imagines that he is being pursued by an unknown enemy. Once the user of the drug begins to crave it, he constantly requires more and more to satisfy him, and its use may amount to thirty grains a day.

Dr. Brainerd's paper was also ordered printed.

ITS TREATMENT. Dr. Gardner, of the Napa Insane Asylum, explained the manner in which he treated patients sent to that institution who were addicted to cocaine. He said that cocaine habit. He did not believe in taking the drug away from them all at once, but in a gradual manner, which would cause the patient less suffering, and at the same time be an act of humanity. He did not believe the vicious habit would ever be banished until husbands began to reflect on the ill-effects of their wives by vicious indulgence and the risk they ran in raising children.

He knew of a case where a father, who was a heavy drinker, raised a family of sixteen children--eight by one wife, and eight by another. Fourteen of his little ones died in convulsions, and the other two were afflicted with hereditary diseases.

CONCERNING INSOMNIA. Dr. M. F. Price's paper on "Insomnia" occupied over an hour in its reading. He held that sleep is just as necessary to the maintenance of life as the taking of food, and a person denied sleep for three weeks will as surely die as if he had been one of the chief causes of insanity.

A recess was taken until 2 P. M.

Afternoon Session. The first business taken up at the afternoon session was the reading of Dr. J. O. Leiblich's paper on "Tuberculosis."

He said he had hoped to be able to announce the lymph had been tried, and although there had been no cure, from its use, decided improvement was noticed in several cases.

In regard to tubercula, the doctor said there was no doubt but that physicians,

in dealing with such cases, ought to administer for a physical disease, and not an imaginary complaint. Out of fifty-six cases he had been successful in effecting the cure of forty-six patients by appliances of electricity.

After Dr. Hirschfelder had finished the reading of his paper, Dr. W. W. Kerr spoke on the subject, relating his experience with the lymph, and agreeing that no complete cures had been effected by its use. In almost every case the injection of the lymph brought out an eruption similar to that seen in a case of measles. While he could not say that his experiments with the lymph proved that it was of no value at all, yet he could assert positively that it was of no use for diagnosis.

Drs. Wythe and Ballhach made remarks coinciding with Dr. Kerr in his views. Dr. Shilks said he had not the least confidence in the lymph.

HYGIENE AND ADULTERATION. The Secretary was called upon to read the composition of Dr. A. H. Agard of Oakland on the subject of "State Medicine and Hygiene and Adulteration of Foods and Drugs," and it was referred to the Committee on Publication, as was also the paper of Dr. P. C. Remondino, on "The Hygiene of the Lymph," which was the Regular Profession and to Quackery."

OTHER PAPERS. Dr. M. Regensburger's paper on "Dermatology and Venereal Diseases" was ordered to be read by the Secretary.

Dr. Shilks of San Francisco and Drs. Lundberg, Ballhach and Clark also spoke on the subject.

Dr. E. R. Merrill of Sacramento, on "The Physiology of the Cerebral Motor Centers, in Connection with a Case of Extensive Motor Paralysis, Resulting from Injury," was read by title and referred to the Committee on Publication.

SHORTER PAPERS WANTED. A resolution was presented limiting those who were invited to read papers hereafter to twenty-five minutes' time, and allowing but fifteen minutes to each member desiring to discuss a subject.

The resolution was referred to the Executive Committee.

A communication signed by several persons was received, asking the society to investigate the case of a certain San Francisco doctor claimed to have cured cancer. The communication was laid on the table.

The meeting adjourned to reconvene at the Art Gallery at 8 P. M.

POLICE COURT. Judge Cravens Disposes of a Rather Long Calendar.

J. Heubschman, charged with battery upon officer Shellars, had his case continued until to-day.

Mary Walsh, accused of malicious mischief in poisoning a dog belonging to James Carrigan, had his case put over until the 30th.

Nellie Crowley, who, on the preceding day, had secured the conviction of Johnny Reagan for the theft of a diamond of unsullied purity, wherein it differs from its owner's celebrated event by getting good and drunk. She was so drunk she could not appear yesterday to stand in the charge, and the case was put over until to-day.

Loney Larraz, the tamale peddler, was fined \$20 for having failed to return all his proceeds to his employer.

J. Plazer was fined \$30 for disturbing the peace, with the usual alternative.

Andrew Jackson Beal, a colored citizen of this city, has been an actor instead of a teamster--was found guilty of having battered his wife. Some rather novel and sensational testimony was given, and the case was postponed until Monday.

Rayd Rich, for perjury, was held to answer, bail being fixed at \$1,000.

THE OPIUM ROUTE. A Chinese Butcher Shuffles Off the Mortal Coil.

Lee Hwey Wah, a member of a leading butcher firm in Chinatown, took an overdose of opium and was found dead in his room yesterday morning, in the rear of the store of Quong Tong Long & Co., at 974 Third street.

At 3 o'clock in the morning a couple of Chinamen passing by the place and noticed a light burning in the dingy little room he occupied. They gained entrance and found the Chinaman lying in his bed, but instead of doing anything to relieve the sufferer, they stood and gazed at him.

Finally a doctor was summoned, but though the patient continued to grow worse, and died in the afternoon at 2 o'clock.

Several Chinamen who pretend to be familiar with the deceased say that he was short in his accounts, and in all probability took a large dose of opium with suicidal intent.

RANCHO DEL PASO. The Periodical "Division" Rumor Bots Up Serenely Again.

Ex-Senator L. J. Rose of Los Angeles spent yesterday at the Rancho del Paso inspecting the fine horses of Mr. Haggin. It was his presence, probably, that gave the colored *rose* to the periodical rumor that the Haggin Grant is to be divided up and sold.

Something over a quarter of a century ago the place was colonized, but it soon reverted to the owner and once more became a cow and sheep pasture. Some of the best of the original owners were surveyed into eighty-acre tracts, and doubtless some of the surveyor's stakes can still be found.

Since the National Medical Association made it a breeding farm, he manages to use a goodly portion of it, the rest being leased to farmers; but if anybody wished to buy any of his land, no doubt he would sell them some.

State Horticultural Society. The next regular meeting of this body will be held at the hall of the State Board of Horticulture, 220 Street street, San Francisco, to-day at 12:30 P. M.

Professor C. H. Allen of San Jose is expected to give a course of lectures at the Eastern Fruit Trade, and there will be a discussion on the subject of an organization for marketing California dried fruits.

At 2:30 P. M. the Entomological Society will hold its meeting.

Alleged Rough Treatment. Justice Henry issued a warrant yesterday, at the instance of D. Lohmiller, a resident of Brighton, who claimed to have been struck and cut with a knife by a man named Fred Krauser.

Lohmiller was badly bruised about the face as he lay on several places. Deputy Constable Swift went out to serve the warrant.

Additional Citizens. The following-named citizens have been added to the Transportation and Excursion Committee on the reception of President Harrison: George B. Katzenstein, George W. Ralston and J. F. Lintzheim. J. E. Gilbert was added to the Finance Committee.

Odd Fellows' Picnic. The excursion train for the Odd Fellows' picnic at Natoma Grove will leave the city promptly at 8 o'clock to-morrow morning. Baskets will be called for at the places and hours named in the advertisement.

Auction Sales. Went T. Crowell & Co. will hold a furniture sale at 10 o'clock to-day at their salesroom, 817 J street, when a large variety of articles will be disposed of.

Changed Daily for the Bed House.

This cut represents a stylish shape Ladies' Straw Hat, comes in black, tan, brown and white, 45 cents.

This cut shows a Ladies' or Misses' Straw Hat, in black, brown, white and tan, 25 cents.

We are doing the Millinery trade of the city, and why not, when you can get for 25 cents what you pay a dollar for elsewhere. Capay Valley Lands.

THE OLDEST AND LEADING REAL ESTATE AND Insurance Agents OF CENTRAL CALIFORNIA. No. 105 Fourth Street, Sacramento. SPECIAL BARGAINS. FARMING - PROPERTY FOR SALE.

Busy Fruit-Growers in a Pretty Yolo Valley--Tancred and Its Adjoining Farms.

IN THE SPRING OF LAST YEAR Robert A. and Neal D. Barker associated themselves with William McKay, all of Oakland, with a view of searching out a suitable location in which to engage in the profitable occupation of fruit-growing.

After visiting many localities, they decided on the Capay Valley, Yolo County, and the Rhodes tract at Tancred.

Negotiations were opened with the Capay Valley Land Company, owning the tract in question. With W. H. Mills, the General Agent of that company, they arranged for the purchase of about 220 acres of foothill land.

This being more than they had thought of taking for their own use, they spoke to a number of friends about it, with the result that the tract was divided among the following people: B. L. Hickok, 40 acres; W. T. Barnett, 20 acres; N. D. Greathard, 20 acres; Mrs. L. Greathard, 20 acres; W. McKay, 20 acres; N. D. Barker, 20 acres; R. A. Barker, 20 acres; J. P. Brownlee, 10 acres; E. H. Haslett, 10 acres; Joseph Barker, 10 acres; A. W. Kelly, 10 acres, and Frederick Kelly, 10 acres.

So far this had been merely a private venture of the gentlemen above named, but in talking up the question of dividing the land already purchased, it was found that so many more would like to join it than the area of the purchase would admit of, it was thus suggested on all hands, "Why not get some more land and divide it up in the same way?"

Then followed the idea of a stock company to take hold of a larger tract and arrange for the cultivation of the whole of it, after subdividing it according to the requirements of the subscribers. A provisional board was formed, prospectus issued, and finally, on the 5th of June, 1890, the Western Co-operative Colonization and Improvement Company was duly registered and proceeded to business, with the following officers: President, William McKay; Vice-President, M. P. Brown; Directors--H. C. Ellis, Charles Brooke and R. A. Barker; Secretary and General Manager, N. D. Barker; Solicitor, C. E. Snook; Treasurer, First National Bank of Oakland.

The balance of the tract, 373 acres, was purchased. A contract was entered into for the purchase of a large number of fruit trees, such as, etc. This early purchase of trees was the means of saving between \$5,000 and \$7,000 to the company, the price in some cases having more than doubled since then.

The ideas which the prospectus set forth have been but slightly modified and the progress of the Colonization Company interrupted. Those who went into it doubtfully have become enthusiastic, and almost all the members arranged to set out all their lands in fruit trees, etc. The first year, 20,000 trees and vines, between 20,000 and 30,000 vines will be planted.

The satisfactory working of this scheme has had the effect of attracting considerable attention to the work of the Colonization Company, and a number of people are now desirous of joining in with them. An additional 200 acres of land have been added to the sixty acres already purchased.

For the company is predicted a very bright future, as well as for the beautiful valley in which their operations are conducted. How this marvelous little garden has come to be so long neglected is a puzzle to every one who has visited it, but one thing is very sure and that is that this neglect will never again be felt in the valley.

The plots set out are mostly of the standard varieties--peaches, apricots, Bartlett pears, plums, figs, raisin grapes, etc., while both sides of the avenues, throughout the tract, walnuts will throw their graceful shade.

A considerable number of citrus trees are also being set out, which will be followed by more ambitious places. A small park of some three acres has been laid out right in the center of the town. This park is proposed to be planted with flowers and shrubs, and every one who has visited it, but one thing is very sure and that is that this neglect will never again be felt in the valley.

It is not expected that Tancred will ever be a large and busy city, but it is thought that it can be made a very pleasant little place to dwell in.

A petition has been circulated recently and very largely signed, asking the county to accept the Tancred avenue, on the colored road, as a county road, and to build a bridge across Cache Creek at this point, in order to give the settlers on the east side of the creek access to the Tancred Station. The Tancred colonists are quite willing to give the necessary right of way, and are very desirous of having a bridge there, as the colony lands extend along both sides of the stream. It is thought that it would be very wise expenditure of public money to grant them this necessary improvement, as the operations of such companies are of widespread benefit to the whole county and State. The attractions and comforts of the cities, towns and villages to those who are willing to settle on the land and show that the country also affords attractions and comforts and ways of making money pleasantly, every inducement should be held forth.

The following is a list of the principal members of the Tancred Colony, with the number of acres owned by each, and a fact worthy of mention is that in each contract or deed issued by the Colony Company there is a provision that no intoxicating liquor shall ever be manufactured or sold on the land. The apparent success of the enterprise shows that the ideas and plans of the colony, as set forth in the prospectus some time ago, are not impracticable. C. T. Hall, 10 acres; E. A. Vanstone, 10 acres; W. H. Brock, 10 acres; W. P. Hammon, 10 acres; C. S. Gannon, 10 acres; A. W. Kelly, 10 acres; N. D. Greathard, 10 acres; R. A. Barker, 10 acres; N. D. Barker, 10 acres; J. P.
