Valuable Suggestions Furnished by the State Board of Health-Parents Should Study Them.

A pamphlet has been compiled by the State Board of Health, for general distribution, which is brimfull of information that is valuable to all persons, and especially to parents and others who have the care of children. Diphtheria is so frequently malignant and fatal in its effects that the State Board of Health, in the expense of the state Board of Health, in the expense of the sunshine into the rooms of the house, and remember that pure water, pure air and sunshine are the greatest natural preventives of contagious diseases.

These, in short, are the rules most generally adverted in the company of the house, and remember that pure water, pure air and sunshine are the greatest natural preventives of contagious diseases. that the State Board of Health, in the exercise of its functions in the restriction and prevention of disease, deems it necessary to furnish the public with informatical many states and prevention of disease, deems it necessary to furnish the public with informatical many states are the rules most generally adopted in the restriction of this destroyer of the young. They are as briefly stated as may be consistent with clearness, for there must be a compression of their scope and purport in ortion with reference to the manner of its propagation, coupled with such suggestions concerning the best known methods of limiting its progress, as any person of average intelligence may easily put to practical use.

Much more might be added, but this would lead to the consideration of medical subjects not deemed essential in directions for the guidance of the general tions concerning the best known methods

It should be generally understood that diphtheria is a contagious and infectious disease, which attacks by preference the young, and especially those whose vital resistance has been reduced by exposure to fifth a prelaminest, the empiricing that the few purposes the empiricing that the first part of th to filth, uncleanliness, the emanations from sewers, drains, and all unsanitary influences.

How DIPHTHERIA IS CONTRACTED.

The infectious substance of diphtheria

The convered from the mouth uses air.

In order to effect the good which it is in-

Is conveyed from the mouth, nose, air passages, and discharges from the bowels of those who have the disease. It is believed, with some reason, that the perspiration and urine may contain it. Domestic animals, such as cats, dogs chickens tataton and trine may contain it. Domestic animals, such as cats, dogs, chickens and tame pigeons are credited with carrying the disease from one person to another, either by having the disease themselves, or because of having been handled by persons who were afficted with it. It may be transmitted in water milk or other liquids or in feed.

YESTERDAY'S FIRES. water, milk, or other liquids, or in food or clothing, or by kissing a person who has a sore throat without suspicion that it is diphtheria.

The secretions of the mouth and nose The secretions of the mouth and nose of a diphtheritic patient, mixed as they must necessarily be with the exudative deposit, are often allowed to fall upon the bedclothes and carpets, where they dry and remain for an indefinite length of time. These are liable to be detached by the frietion of the following a region of the foll time. These are liable to be detached by the friction of the fabric, or the shuffling of feet upon the floor, when the poison rises as dust in fine particles and lodges in the throat, nose, windpipe, or stomach of the person who may respire the air so contaminated.

Some persons have so much vital resistance to disease that it does not take root and develop. Others, however, have the susceptibility to its growth and fatal effects.
It should be remembered that a malig-

nant form of the disease may be con-tracted from a person having it in a very Exposure to an atmosphere contami-

nated by the body of a person who has died of diphtheria is extremely danger-RULES AND PRECAUTIONS TO BE OB-

1. Whenever diphtheria is known to be in the neighborhood, all children with sore throats should be kept apart from other children until a competent physician has determined that the sore throat is not diphtheria.

The importance of this course should be explained by the medical profession to clergymen of all denominations, and their influence and co-operation earnestly solicited, in order that the objections and prejudices of the careless and uninformed may be more easily evercome. DISINFECTION.

As the discharges from the nose and throat are highly contagious, they should be received on cloths, which should be immediately burned. The urine, vomited be received on cloths, which should be immediately burned. The urine, vomited matter, and discharges from the bowels should be received in a vessel containing Mrs. B. B. Scott, who formerly resided Mrs. B. B. Scott, who formerly resided adam known. It had been pronounced a solution of chloride of lime in the proportion of six or eight or more tablespoonfuls in a gallon of soft water. They should be allowed to remain in this solution at least fifteen minutes before being de-posited in a privy vault or water-closet. DISINFECTION OF CLOTHING AND PREMI-

SES. The soiled linen, clothing, and towels should, if possible, be boiled in hot water for thirty minutes before leaving the

Some physicians may recommend solu-tions of sulphate of iron (green copperas) instead of a solution of chloride of lime, and a solution of corrosive sublimate or carbolic acid instead of sulphate of zinc.

It has been demonstrated, however, that copperas is not properly a disinfectant. It is an excellent antiseptic, arresting putrefactive decomposition, but it does not destroy the vitality of disease

germs or the infecting power of materials Corrosive sublimate solutions are poisonous, and when used should be kept in Joseph Harper, the old man who was respectively.

the zinc solution for the clothes and linen, will, perhaps, be the most economical and easily obtained for general use,

and will prove sufficient and satisfactory.
The use of any of these agents must be determined by the attending physician.
The attendants should observe scrupulars also leave in the strength of the strength

The attendants should observe scrupulous cleanliness of hands and clothing. They should not appear in public untillafter having first changed their clothes and otherwise removed all possibility of carrying the contagion.

In case of death, let the body be wrapped in a sheet which has been soaked in the zinc solution, and incase in a tight coffin. The interment should be private, and in no case should the remains be exposed to view.

ed to view.

The room which has been occupied by the sick should, after death or recovery, be effectively disinfected.

Articles which cannot be washed or boiled should be exposed to dry heat at a temperature of 230 degrees Fahrenheit for three or four hours, the articles being freely exposed and not folded or piled Otherwise, the room and its contents must be fumigated by the fumes of burnThis is performed by first closing doors

and windows and all apertures through which the gas might escape. Then the floors, walls and furniture must be thorfloors, walls and furniture must be thor-oughly dampened. For a room ten feet square, three pounds of sulphur, in frag-ments, is placed in an iron pan supported by bricks placed in a tub containing a few inches of water. The sulphur is then moistened with alcohol and set on fire. When well ignited, shut the door and Lively Meeting.

keep the room tightly closed several hours. When sufficiently fumigated, open the room freely to the air until thoroughly ventilated, when it will again be fit for occupancy.
In addition to these precautions the Arguments. cellars, privies, water-closets, cess-pools, drains, sewers, and all other probable sources of filth, should be cleansed and treated to a solution of copperas. Stag-nant water should be drained. Let the

hension of their scope and purport in order to exercise that influence and good which is the object to be attained. matter to the Trustees to decide.

BASALT OR GRAVEL?

Property-Owners on M Street Have a

They Sign a Petition to the Trustees for Gravel-Some Heated

night at the new Pavilion, the object being to decide whether they wanted the street graveled or macadamized. A majority of them have already signed for those who desired 'gravel step up to the basalt macadam, but they now declare that they did so under a misapprehension, and while they cannot withdraw their signatures, they desire to put in another petition for gravel and leave the matter to the Trustees to decide.

Dr. Shields was in lavor of waiting the till next spring before improving M street at all. The newly-graveled streets had not been tested fairly yet, and neither had the macadam. He thought it would sion, and while they cannot withdraw

MR. WHITE EXPLAINS. Lincoln White called the meeting to order and said that the object was to decide how M street should be improved.
The Trustees had passed a resolution ordering up the street or rather exercises.

The petition will be presented to the dering up the street, or rather a portion of Trustees on Monday. it, and leaving the improvement for either basalt, rock orgravel. There was no probasalt, rock orgravel. There was no provision, however, for crossings, grading, curbing, etc. A protest had been filed by residents on M street, and under the Vrooman Street Act the Trustees were powerless to do anything until six months after the protest had been filed. The objection of the property-owners was that the street should not be improved in patches. In order to overcome the protest, Mr. Lambert, the basalt contractor, had gone among the M-street propertyhad gone among the M-street property-owners and obtained a majority of signa-tures of those who were in favor of basalt rock. Mr. Lambert, he said, was the only contractor in Sacramento who could furnish basait rock, and the property-owners were, therefore, in a rather dangerous position. He said the object of the meeting was to decide whether they wanted gravel

was to decide whether they want or materials.

Mr. White then suggested that they organize permanently, and by a unanimous vote he was elected permanent Chairman.

In the suggested that they sold.

Last night he and officer Shellars found a young fellow whom Simmons says was the one that took the robes. He was arrested. He gave his name as Harry Gilland was quite drunk when taken

showing a majority of signatures of property-owners on M street from Fifteenth to Thirty-first, all desiring gravel and being opposed to basalt macadam.

The Johnson-Wand Match Will Prob-

Sparks from the smokestack caused the fire.

HAD TO DO SOMETHING.

Chairman White said he had had a talk with Trustee McLaughlin and the latter said that unless the M-street people would act on the petition and signatures obtained by Mr. Lambert, the basalt man. Continuing, Mr. White said he had also talk with Trustee McLaughlin and the latter said that unless the M-street people would act on the petition and signatures obtained by Mr. Lambert, the basalt man. Continuing, Mr. White said he had also talked with Mr. Lambert. The latter said the basalt would not cost over \$165 for furniture store, and word was sent to Chief Engineer Guthrie at the Corporation House. The Chief rushed down to the store, and on gaining entrance found quite a blaze among a lot of quilts and mattresses. He yanked them out into the street and stopped the fire.

HAD TO DO SOMETHING.

Chairman White said he had had a talk with Trustee McLaughlin and the latter said that unless the M-street people would act on the petition and signatures obtained by Mr. Lambert, The latter said the basalt would not cost over \$165 for from foot. But this was only his promise. He being the only person having basalt to furnish, when it came to promise. He being the only person having basalt to furnish, when it came to promise. grasp.
R. P. Burr took the floor and said that men. not get it. Probably it was because THERE WAS A "JOB"

Such as Mr. White was afraid Lambert would engage in. Reverting to basalt, the speaker said he was confident that this style of macadam would be of more service and make better streets than the best of gravel. While more expensive it would outlast gravel and property-owners would gain in the end owners would gain in the end.

Mr. White asked Mr. Burr what he had

to pay per front foot for the basalt ma-Mr. Burr replied that it amounted to

White.

"And it's worth it," replied Mr. Burr.

After some further talk, Mr. White
called upon Mr. Lambert, the basalt man,
for an explanation of what he proposed to

adam known. It had been pronounced so by the State Geologist. It was the There was one street in Oakland which had been laid in 1868, was a fine street yet, and there had never been a dollar expended upon it. Mr. Lambert corrected Mr. Burr in regard to the cost of macad-From this time forward horses that are amizing the block in front of Mr. Burr's participate in the State Fair races will property. That work had cost the property-owners just \$1 61 per front foot. Mr. Lambert said he had promised the property-owners on the proposed new improvement that they would not have to pay more than \$1.65 per front foot. The intersections would cost \$431.85 each—this, of course, to be divided among all

the property-owners. A DISPUTE OVER FIGURES Mr. White took down Mr. Lambert's figures, and when the latter had concluded, the Chairman declared that they were misleading. According to his (Mr. White's) figures, the property-owners would have to pay a total cost of \$2.73 per front foot for basalt macadam. Mr. Lambert accused the Chairman of misrepresenting him, and asserted that the total cost to the property-owners would only be \$1 94½ per front foot including intersections.

erty-owners. They could reach no agreement at all, and Mr. Lambert took his seat in disgust.

But his troubles were not over yet.

One of the property-owners, a Mr. Butler, asked for a plain statement from Mr. Lambert as to what the macadam

Wednesday were 94° and 56°, and yesterday were 94° and 56°, and yesterday 96° and 60°.
