

BOARD OF TRUSTEES.

Mayor Comstock Objects to the Second Trustees' Gravel Bills.

Chief Guthrie's Ordinance Regulating the Storage of Gasoline—Street Work.

At the meeting of the Board of City Trustees yesterday, Chief Guthrie of the Fire Department presented an application of Mrs. Bertha Howe to construct a frame dwelling on Eleventh street, between K and L, which is within the fire limits.

The Chief said nobody residing in that vicinity had made a protest, and he could see no reason why Mrs. Howe's request should not be granted.

It was ordered that permission be granted the lady to put up the building.

STORAGE OF GASOLINE. Chief Guthrie of the Fire Department handed in an ordinance which he drafted himself regulating the storage of gasoline and other explosive oils in the city.

Trustee McLaughlin did not think the ordinance went far enough in its provisions. He thought the storage of coal oil ought to be regulated in the same ordinance.

Trustee Conklin said he was willing to consider the ordinance presented as being read for the first time.

Mayor Comstock was of the same mind and the ordinance was laid over until next Monday for final action upon its passage.

DON'T WANT THE SHEED. Several residents and property-owners in the vicinity of the haymarket were present to protest against the construction of a shed on the public square.

The board informed them that they would have an opportunity to be heard before any shed was built.

The following saloon bonds were approved: Frankie Thorne, 1111 Third street; Mrs. L. Leloy, 223 1/2 street; William Donohue, 325 K street.

An ordinance was read for the first time changing the boundaries of the front street from I to the alley between K and L streets.

Chief of Police Drew submitted his report for the month of August. It showed that 194 arrests were made, 1,232 calls furnished and eight lodgers accommodated.

The Street Commissioner asked further time to report on the matter of opening the alley between Twenty-fifth and Twenty-sixth, F and G streets.

PETER GIBBS' LICENSE. Peter Gibbs stated to the board that he had a bill against L. W. Farrell, and on trying to collect it learned that Mr. Farrell had been granted a license to conduct a saloon on Third and L streets.

It was ordered that, as long as Mr. Farrell had not yet taken out his license, he be required to come before the board and prove that he owns the property.

Several property-owners on Sixteenth street appeared before the board and insisted that Folsom gravel be used in improving the street.

B. Labbs and P. A. Miller said they would, if permitted, do the work and furnish Folsom gravel for the price the Improvement Company agreed to do the work.

The matter was referred to the Street Commissioner, with instructions to see that the contract was carried out according to agreement.

Several bills for gravel for repairing the streets were objected to by the Mayor. He objected to paying \$1 75 for gravel when it could be gotten for \$1 25.

Trustee McLaughlin wanted to know where he could get it at that price, and the Mayor informed him that Folsom gravel could be purchased at \$1 25 per cubic yard.

The roll was about to be called on the passage of the bill, when Trustee McLaughlin withdrew it, and said he would hold it over for a week.

IMPROVING EIGHTH STREET. The Sisters of Mercy, H. G. Smith and M. A. Mesick addressed communications to the board, asking that they be permitted to withdraw their names from the petition for improving Eighth street from E to G with basalt rock pavement.

They thought the street would be well enough improved by gravel.

It was ordered that the street be ordered improved by either basalt rock or gravel, and that the contractors be permitted to bid on either.

Resolutions were adopted ordering Seventh street, from F to H, and Twenty-second street, from G to I, to the alley between M and N streets graded and gravelled.

Trustee McLaughlin introduced a resolution of intention to grade and gravel Eighteenth street from G to I, but the Mayor and Trustee Conklin thought it was not necessary to pass the resolution at this time of the year, as the winter was approaching.

Besides the city had not sold its bonds as readily as was thought.

The Mayor and Third Trustee voted against the resolution and Trustee McLaughlin got real mad.

He declared that he would see whether or not the board had power to lay the bond money by, when the people voted that it should be used on the streets.

STILL AT IT.

Swindlers and Footpads are Doing a Lively Business.

Various New Robberies Reported—A. B. Reynolds—Experience The "Father-and-Son" Act.

The festive "crook" still continues his merry work. A. B. Reynolds, who is just from Oregon, alighted from a south-bound train early yesterday morning. He was on his way to Kansas, and intended to take the first overland East. Reynolds had not been off the train long when he was spotted by one of the many ghouls that are now infesting Sacramento.

EDUCATION. Methods for Teaching Employed in Southern California.

An Address Before the Sacramento Educational Association by Prof. E. P. Rowell.

At the request of the Sacramento Educational Association, Professor E. P. Rowell of Los Angeles County delivered an address last evening on the subject "Newer Educational Methods" at the office of the Superintendent of Schools.

Mr. Rowell began by saying he felt highly honored in being asked to address those present. His address, he said, would be but an informal talk, and fragmentary.

He thought it had the most competent corps of teachers of any city or town in the United States.

Continuing, Mr. Rowell said in the Pasadena school system the study of botany was begun in the lower classes with pupils six years old or thereabouts.

Even a very poor effort of a pupil was always praised. On the seventh year of the pupil in school the poem "Snow-bound" was taken up, and "Evangeline" in the eighth year. These poems are not studied in Sacramento until the pupil reaches the High School.

Very little attention was paid to technical grammar. The time was given up to writing the poems of the prominent authors.

The interchange of thoughts and ideas among the teachers was very common, and they were so frequently, they strove to observe the powers of the different pupils and to teach them accordingly.

Mr. Rowell said that the assistance of a brother educator he had found of a teacher's school at Santa Monica. The first year it was not much of a success, but the last year of the school was successful and important one.

Mr. Rowell said it was the general effort of the people of Southern California to get the best in the way of education. The people there did not generally ask what salary you demanded or what support you had politically, but they wanted to know what you had in the way of recommendation as a teacher.

He said the work was done by finding the kind of reading that most interested the pupils.

Mr. Rowell said he had not examined in school a piece of manuscript since he left Sacramento. The propositions were made on recommendation of the teacher.

In answer to a question by H. Weinstock as to what was thought of the Ling system of physical culture as adopted in the Los Angeles schools during the past year, Mr. Rowell said it was not so great a success as was expected.

The Deslate system was much better unaltered than the Swedish system, and was employed to better advantage in the Pasadena schools.

The special teacher in physical culture taught the pupils personally as much as possible, and then instructed the teacher in the mode of teaching the class.

Mr. Rowell said that the illustrations of how mischievous pupils had been overcome by the teachers utilizing their mischief as a leverage for instilling knowledge were very interesting.

In regard to the teaching of music, Mr. Rowell said it was begun in the lowest classes in the schools.

On the subject of society extended a vote of thanks to Mr. Rowell for his excellent address.

Shakers of All Creeds and Kinds. Are to be found in every locality visited by chills and fever. The very animals exhibit in such plague festered regions symptoms of the dire infection.

Experience has proved, in the domain of medicine, anything conclusively, it is that Hostetter's Stomach Bitters will not only eradicate from the system every vestige of the malarial-born complaint, but effectually defend residents and temporary sojourners in malarial scourged localities against it.

There is a general consensus of opinion among medical men, no less than in the minds of the public, that the malarial fever is a most insidious and dangerous disease, and that in the tropics where malarial complaints assume their most virulent type, this incomparable medicinal safeguard is of necessity resorted to.

It cures, biliousness, constipation, debility and kidney trouble are all thoroughly remediable by the Bitters.

Berlin Cough Cure. For coughs and colds and all lung and throat ailments this article has superior merit. It is perfectly harmless, gives immediate relief and cures the worst cases in from two to three days.

Put Under Bonds. Henry Meiss, the Elder, Must Keep the Peace. The case of Henry Meiss, Sr., who was recently arrested on complaint of his son for threats against life, came up for hearing before Justice of the Peace Henry yesterday. The evidence was to the effect that the old gentleman had flourished a
