

FARM AND ORCHARD.

Cost of Feeding Poultry on the Farm.

How to Figure Profits—Wire Fences for Chicken-Yards—Hay Seeds for Chickens—General Farm Notes of Interest.

It costs the farmer less to produce eggs than it does one living on the outskirts of a town or village, as the hen on the farm can pick up about one-third of her food. A bushel of wheat or corn for a hen one year should be sufficient, provided she has opportunities for securing grass, seeds, insects, etc. She will lay, under fair conditions, ten dozen eggs a year. As to how much profit to expect, it will depend on the cost of the wheat and the price of the eggs. The bushel of wheat in most of the Eastern farmer about \$1, but in some portions of the West the cost may not be over 50 cents. At the same prices for eggs, the Western farmer has the advantage of cheaper cost, but as the Eastern farmer has the advantage of prices, his opportunities are not equal.

Each section possesses advantages and disadvantages, and when the farmer sells his eggs he should be prepared to know exactly how much expense was incurred. If eggs sold for only ten cents a dozen, when what fifty cents a bushel, he secures a higher price for his wheat by converting the wheat into eggs through the agency of the hens. Eggs have the advantage of calling for cash in the markets, and they can be produced in the winter season, giving immediate returns, which is very different from being compelled to wait from one season to the next.

Feeding the hens on the farm to take possession of the waste products with the hens. There is food to be secured that is not in the grain bin. Every old turned over by the plow adds a little, and the young grass and weeds, the scattered grain in the barn-yard, the stubble in the fields, the scraps from the table, and the manure heap, all afford the same kind of food, and the eggs laid by them during the summer season cost the farmer little or nothing. The low cost of summer should be considered and the average made.

WIRE FENCES TO HEN YARDS. The wire fence does not keep the winds out of the yards. When such a fence is made, the lower part is the most important, and they should be put together so as to be close. A fence seven feet high, composed of three feet of boards and four feet of wire, should be high enough to keep nearly all breeds of hens within bounds, and the boards will make the yards much warmer and more comfortable than when wire only is used. The fence should be made so that the hens to be outside sometimes, for they will not be content to remain in on clear days; but to send them outside on a cold, windy day, with the wind whistling through the wire, is to expose them to a very severe test.

All yards should have wind-breaks of some kind if the hens are to occupy them, and this can be accomplished in several ways; one by having boards at the bottom, and another by arranging corn stalks on the north and west sides of the fence. Anything that will break the force of the wind will be found beneficial.

HAY SEEDS FOR CHICKENS. When you have a brood of chicks, try giving them the sweepings of the hay lot in which to scratch, and you will be surprised to notice how busy the little fellows will be and how industriously they will work to secure the seeds. There is nothing that will tempt little chickens like small seeds, and they will scratch from morning until night if they can find them. This scratching will do more to keep them healthy than anything that can be done for them. It makes them keep warm, compels them to feed without filling their crops too rapidly, prevents indigestion and keeps them to endure cold. Their appetites will be greater and they will eat anything else provided, with avidity. If chicks are fed with hay when young, and given hay chaff and leaves to work in, they should grow rapidly. They must be kept in a warm place, having plenty of light, and carefully fastened up at night.

EVERYBODY'S COLUMN.

Correspondence of Interest to the General Public. Under this heading the Record-Union will publish communications on topics of interest to the general public. The communications will be understood to represent the views of the writers. All communications must be accompanied by the name of the writer, unless so desired, but as a guarantee of good faith.—Eos.

A Plea for an Ambulance. Eos, Record-Union: Our City Trustees should have been up-town last Sunday morning, and they would have witnessed a sight that would, or should, at least, have caused them to take to their heels on account of the deplorable manner in which they have acted in not providing this city with an ambulance to convey the sick and dying to a place of treatment.

Suppose one of our citizens should meet, have an accident on one of our public thoroughfares, and by some unfortunate circumstance he could get no conveyance to take him to a place of treatment, with a few minutes' delay that becomes a city like the Capital of California; and suppose this party should bring an action against the City of Sacramento for damages, would he be the first thing our Trustees would do? Why, hire some high-priced attorney, of course, and pay him a very large sum of money for his services.

Now, I ask, would it not be a better policy to expend a part of that sum in procuring an ambulance that would be a credit to us, and serve in this capacity for years to come, rather than to take any of these chances? J. G. MARTINE.

Instantly Killed. ALBANY (Ind.), Dec. 22.—About noon to-day Louis Wagner, an employe in the power house of the electric street-railway, was repairing a wire, when his hand was caught between the wire and the ground. In falling a killing wire struck Wagner on the wrist, killing him instantly. The other end struck another employe named March, but the latter, who was so badly shocked that he cannot recover.

Sick headache yields to Beecham's Pills. A correspondent of the Toronto Mail says he understands it is the intention of the Quebec Conservative leaders to have Mercier and the other members of the recent administration arrested on a charge of defrauding the Provincial Treasury.

Charge of Steamship Passengers. WASHINGTON, Dec. 22.—Senator Chandler to-day introduced a bill to amend the Act to regulate the carriage of passengers at sea, by providing that in the future it will be unlawful for any steamship company to bring passengers from any foreign country unless suitable accommodations for the comfort of passengers are provided.

to thus improve his stock and enhance the value of his dairy product and increase the demand in losing valuable time and opportunities to double his capital in a few years. The best fruit tree to grow on the lawn is probably the cherry. When well-established it does well in grass, though it is best to mow the grass as often as once a week. A closely-shaven lawn does not drain the soil of moisture as when grass is allowed to mature. An abundance of decomposed manure is important for the highest success.

Professor W. R. Lazenby thinks that with potatoes, as well as with many other vegetables, the list of varieties has become so inflated as to bring all attempts at accurate description. The only remedy for this is to group the several varieties resembling each other in their most prominent characteristics into a class, and give them one general description.

It is enough to make any humane man's heart ache to note how the average farmer raises his calves. Not one call in a hundred has a fair chance for itself, says Howard's Dairyman. The burning with flies, given no food, and what their baby stomachs can digest and assimilate, they advertise the inhumanity of the farmer.

Says the Rural New Yorker: "People who use their noses for determining the value of manures or fertilizers are sure to lose money, because most of them believe that the best is the strongest. It happens that the substances that gives the worst smell are not as valuable for plant food as water. Still the folks keep on smelling for value."

Do not hoe weedy ground in wet weather. This simply transplants weeds, and after one or two such operations they grow so thickly that the multitude of fine roots that cling to the soil whenever uprooted, and make it almost impossible to kill the plant. This repeated transplanting of weeds is the best way to propagate them, and every planter to make them live. Do not try it on weeds.

Nitrate of soda is procured for its nitrogen, which composes but a small proportion of the whole. Soda, which is itself considered a valuable fertilizer, as plants appropriate but a small portion for growth. Nitrate acid, however, not only provides nitrogen, but also provides food to vegetation, but being a powerful acid assists in disintegrating and rendering available many substances that remain in an inert condition.

Year after year, writes an Illinois contributor to the New York Tribune, our peaches failed, although some German growers in the same climate invariably had fine peaches. We discovered at last the secret of their success lay in the fact that late in the fall or in early winter they cut down the ground about the trees very thick with sawdust. This prevented the trees from blooming too early, and the proper time in the spring to plant the trees.

In favor of the dwarf pear, a writer says it is admitted on all hands that finer fruit can be obtained from the dwarf than from the standard. There are dwarf pear trees now standing, planted out thirty-five years ago, which look as healthy and produce as abundantly as at the start. The dwarf pear is a small tree, and it is very easy to grow. It is a biennial and difficult of destruction, and it is very easy to grow. It is a biennial and difficult of destruction, and it is very easy to grow.

Some experiments in feeding thirty steers over three years old show that 100 pounds of meal would give twelve pounds of gain, and that the weather was very cold. We have fed ten-month calves with corn and oats ground together, and the result was a gain of twenty pounds, and when fed to steers eighteen months old would produce a gain of fifteen pounds. It depends entirely upon the age and condition of the cattle.

Directly opposite the window was one opening into a room in Mrs. Todhunter's house, and resting on the sills of the windows was a pine board that had evidently been cut just to fit the space. On this board the thief had come from the house adjoining.

It appears that there were several persons in Mrs. Todhunter's house at the time, and one of them informed the officers that, while they were playing cards, he heard the door open, and saw a man enter the house, and he saw him go up the stairs, and he saw him enter the room, and he saw him take the jewelry, and he saw him escape.

Behind a stove in the room was found a small salt or meal sack, containing all the jewelry belonging to Mrs. Parke, which the thief had cast aside in his haste to escape.

One of the gentlemen hastened down the street and found Officers Ferral and Wilson, who hastened to the house and made an inspection of the premises. They found a ball of putty or paste on the window-sill, where it had been laid by the burglar, who intended to use it in taking out a pane of glass, but he found the window slightly raised. There was also a piece of cloth and a candle.

BOLD BURGLARY.

Mrs. Parke's Lodging-House Raided Last Night.

The Burglar Drops His Plunder on Being Detected and Succeeds in Making His Escape.

A bold burglary was committed last night on J street, between Eleventh and Twelfth, and unfortunately the burglar made his escape, although in doing so he had to abandon his plunder.

The affair was well planned. Mrs. Todhunter, a widow who resides at 1118 J street, keeps a lodging-house, and an elderly lady named Mrs. Parke also keeps a lodging-house at 1120, only four feet distant, an alley-way of that width separating the two houses, each of which is a two-story structure.

About half-past 10 o'clock Mrs. Parke heard a noise in her bedroom on the second floor, and attempted to enter, but found the door locked. Being unable to open it, she called Charles Aiken and O. S. Flint, two of her roomers, and after trying the transom unsuccessfully they burst in.

They found everything topsy-turvy in the room—trunks and drawers opened and the contents scattered about, and evidence that a burglary had been at work. A rope was tied to one leg of the bedstead and hung out of the window, showing how the burglar had made his escape.

Behind a stove in the room was found a small salt or meal sack, containing all the jewelry belonging to Mrs. Parke, which the thief had cast aside in his haste to escape.

One of the gentlemen hastened down the street and found Officers Ferral and Wilson, who hastened to the house and made an inspection of the premises. They found a ball of putty or paste on the window-sill, where it had been laid by the burglar, who intended to use it in taking out a pane of glass, but he found the window slightly raised. There was also a piece of cloth and a candle.

The Nonpareil.

THIS ESTABLISHMENT WILL REMAIN OPEN EVERY EVENING UNTIL THE HOLIDAYS.

PRESENTS TO SUIT EVERYBODY AND FOR EVERYBODY.

PRESENTS FROM 25 CENTS TO \$50 EACH.

PRESENTS FOR YOUNG AND OLD,

RICH AND POOR, LADIES OR GENTLEMEN.

The Assortments, The Qualities, The Styles, The Prices,

ARE ALL IN OUR FAVOR.

The enormous trade done in this department the last month encourages us to announce a few startling lines for this day and the remaining days of this week only.

LOOK AT THESE PRICES!

Ladies' Diagonal Reefer Jackets, with gray moulin collar, worth \$22 50 \$15 00

Ladies' Sealette Reefer Jackets, with silk frogs, satin rhadame lining, worth \$22 \$12 50

A variety of Ladies' Reefer Jackets in black. They are in Serge, Diagonals and Plain Beavers, with astrakhan collars. These are cheap at twice the money. \$6 50

Children's Black and Tan Beaver, with opposum fur, worth \$12 \$6 75

The qualities of all these are excellent, while the fit and style are beyond criticism.

We have persistently made a strong bid for your patronage in all our departments, but never so strong as now. Fresh supplies and better bargains than ever, and you will be glad if you call at once.

Mail Orders Carefully Executed. Samples and Prices Free on Application.
