

## BLOODSHED UNAVOIDABLE.

### Great Suspense Prevails at Antlers, Indian Territory.

### APPEAL TO THE GOVERNMENT TO SEND RELIEF.

Man Burned to Death in a Fire at Cleveland—Fendish Cruelty of a Band of Arkansas Murderers—The State of Arkansas Said to Have Been Robbed of Over a Million Dollars.

### Special to the RECORD-JOURNAL.

ANTLERS (I. T.), March 30.—The greatest suspense prevails here, and the people are waiting with bated breath for the end. To-day active preparations were going on by both parties for a battle. This afternoon sixteen mounted militiamen went through here en route to Goodland, where the militia is being massed. On the south-bound train there were sixty-five men. Besides these, there is a large force already at Goodland. Locke has withdrawn from town, and crossed the river to his ranch. No one knows positively how many men he had with him, but it is believed he has a stronger force than before.

Governor Jones will arrive in Paris, Texas, at 10 A. M. to-morrow, and it is thought by some that the militia will wait at Goodland until his arrival. Others believe Duke will endeavor to march on Locke to-night, and make an attack, for Governor Jones may pursue a less violent course, and endeavor to settle it without bloodshed. Both sides are manifesting the most dogged determination not to yield.

When the clash comes, if the militia are victorious, fears are entertained they will wreak vengeance upon these citizens who endeavor to settle the matter without loss of life. So strong had the feeling of uneasiness become to-night, that Hon. John C. Gibbons, United States Commissioner, sent the following telegram to Leo Bennett, Indian Agent at Muskogee:

"Forces still increasing; bloodshed unavoidable, and that soon. Hope no United States citizens will be involved, but afraid they will. If you are coming, better be quick. JOHN C. GIBBONS."

The following was also sent: "Hon. Hoke Smith, Secretary of the Interior, Washington. Closest access are within a few miles of each other; bloodshed inevitable unless immediate relief is had. Governor Jones can be reached at Paris, Tex., to-morrow morning."

### SIoux INDIANS ARRESTED.

Two of the Leaders of the Disorderly Element Taken Into Custody.

RAPID CITY (S. D.), March 30.—No Water, the leader of the refractory Sioux at Pine Ridge, and Hollowwood, one of his chiefs, were brought here from the agency this morning. No Water was found at Chief Sward's camp and arrested on the charge of conspiracy, growing out of his sheltering Two Sticks' men and refusing to deliver them to the authorities. Hollowwood is the young buck who fired on the policemen from No Water's camp. As the latter was the head and front of the disorderly Indians, his arrest was important, and strong efforts will be made to hold him on the charge preferred. Two Sticks and White-face Horse, whom No Water would not surrender, are still in a very critical condition from their wounds, and cannot be moved in their present condition.

### THE RAILWAYS.

The Friction Between the Union Pacific and Missouri Pacific.

NEW YORK, March 30.—The *Wall Street Journal* quotes a Director of the Missouri Pacific as saying that no hostile feeling was developed at yesterday's meeting, and there will be none now. The Union Pacific and the Missouri Pacific are so dovetailed into each other that there can be no serious friction.

### NORTHERN PACIFIC ENTERPRISE.

QUEBEC, March 30.—The Northern Pacific Railway is soon to have direct Eastern connection with the seaboard, running entirely through the Canadian territory from Paris, Montreal, on Georgian Bay, to Quebec, a distance of 550 miles. The entire road, which will be open for traffic next year, will prove an important rival to the Canadian Pacific, at least as far as the movement of grain from the Canadian northwest is concerned. Between Ottawa and Paris round it also traverses a new, richly-timbered pine country.

### MADE OFF WITH A LARGE SUM.

A Wyoming Thief Trying to Arrange a Compromise.

NEW YORK, March 30.—Chas. A. White was arrested in this city October 15th, upon a requisition from Wyoming for the larceny of money and securities aggregating \$100,000. He failed to appear when called in the United States Circuit Court, and an order has been entered for his arrest. He is now in possession of the cash. White has not been seen in his attorney's office for six weeks. His prosecutors have been trying to find him. They say he has gone away, but admit the possibility that he is quietly awaiting a compromise which his attorneys are trying their best to make.

### DISASTROUS FIRE.

One Life Sacrificed in a Blaze at Cleveland.

CLEVELAND, March 30.—A fire broke out in the Forest City yarnish works this afternoon, and spread with great rapidity, owing to the combustible nature of the contents, and the whole interior was soon a seething furnace.

### COLUMBIAN EXPOSITION.

Some Misstatements Corrected by President Higginbotham.

CHICAGO, March 30.—President Higginbotham of the World's Fair has issued an address to the public regarding misstatements and misstatements relative to the Exposition management. He says the Exposition will be in readiness

## CABINET CRISIS IN FRANCE.

### The Government Defeated in the Chamber of Deputies.

### TROUBLE ARISES IN CONSIDERING THE BUDGET BILL.

The Entire Ministry Tender Their Resignations to President Carnot—Minister of Foreign Affairs Deville to be Asked to Form a New Ministry—Cholera Again Appears at St. Petersburg.

### Special to the RECORD-JOURNAL.

PARIS, March 30.—The Government was defeated by a narrow margin in the Chamber of Deputies to-day, and another Cabinet crisis is the result. The crisis arose through the submission to the Chamber of the Budget of the Budget Committee. Lockroy announced that the committee had resolved to send the budget back to the Senate in the form in which it originally passed the Deputies. The Senate, he added, suppressed all reforms passed by the Chamber.

The Chamber then proceeded to discuss the causes, rejected the Senate amendments, including the bill amending the liquor laws. Tirard declared these must be separated from the budget, as the Senate proposed. Otherwise, he said, the Government would be obliged to ask for a vote on account. Ribot supported Tirard, and urged the Chamber to agree with the Senate.

On a division the Chamber decided, by a vote of 247 to 242, to retain the liquor law amendment bill as part of the budget. When the vote was announced Premier Ribot adjourned the session until 9 o'clock this evening, in order to give him and his fellow Ministers time to consider the position.

After a lengthy consultation the Ministers proceeded to the Elysee and tendered their resignations to President Carnot. The President urged them to reconsider their determination. The arguments were in vain, however, and the Ministers insisted that their resignations must be accepted.

At 10 o'clock the Deputies reassembled. All outward signs of a Cabinet crisis were apparent in the crowded galleries and among the animated groups on the floor. When Cassin-Perier took the chair all the Ministerial places were vacant, but a moment later Tirard, Minister of Finance, announced in a few words that the Cabinet had resigned, but was charged by President Carnot to carry on the affairs of State for a short period. He would therefore ask the Chamber for a vote on account, to cover the next two months. The Chamber referred the report to the Budget Committee and then took a recess.

At 10 o'clock, the hour set for reassembly, not a chair in the whole house was vacant, and hundreds who could not gain admittance were waiting at the entrance to get the earliest possible news of the proceedings. The disorder, which the President was unable to quell, hushed a moment. Lockroy stepped to the tribune to announce the decision of the Budget Committee. In a few words he stated that the committee felt it inexpedient to grant the request made by Tirard for two months' supplies, but would recommend a vote covering one month from the present time. Shouts of approval greeted this statement. The brief discussion which followed was one-sided, as the difference of opinion of the Chamber was practically concerned. The only question is whether supplies should be voted for one month or not at all. Eventually the report of the committee was adopted by a vote of 704 to 5, and the Chamber adjourned until Tuesday.

It is rumored that Deville, Minister of Foreign Affairs in the Ribot Cabinet, was asked by President Carnot to form a ministry.

### CHOLERA SCOURGE.

The Disease Has Again Appeared at St. Petersburg.

ST. PETERSBURG, March 30.—The cholera has again appeared in this city. It is known that fatal cases are daily occurring, though the authorities have not resumed the policy of last year of making regular daily announcements of new cases and deaths. All the news is suppressed.

There are disquieting rumors as to the situation in the interior. The sanitary stations in the Volga provinces, where the disease created great ravages last year, have been reopened, and special steamers with sanitary officers cruise the Volga to pick up cholera patients. It is believed the Government has grave secret information.

### NO ALARM AT WASHINGTON.

WASHINGTON, March 30.—Cablegrams announcing cholera in Austria and Russia do not create any alarm in official circles here. No official confirmation of the news has been received, but the United States Government is prepared for any emergency that may arise.

### CRUSHED BETWEEN ICEBERGS.

A British Vessel Lost Near the Falkland Islands.

PARIS, March 30.—The German steamer Tany arrived at Montevideo yesterday from the Falkland Islands to land the Captain and his wife and the crew of the British ship Templemore. The Templemore was crushed between two icebergs north of the Falkland Islands on March 3d. The Captain, his wife and the crew got off in small boats, but the vessel was lost. They had been adrift twelve days and were nearly dead from hunger and exposure when they were picked up by the ship Dunbony and taken to the Falkland Islands. The Captain, his wife and a portion of the crew will proceed to Europe on the Tany.

## COAST CHRONICLES.

### Frightful Experience of Passengers on a Milton Train.

### QUICK ACTION OF A CONDUCTOR SAVES MANY LIVES.

A Four-Year-Old Child Found Drowned in an Open Well at San Juan—Clark Albert of San Diego Appointed Assistant Superintendent of Mines and Mining for the State Building at the World's Fair.

### Special to the RECORD-JOURNAL.

STOCKTON, March 30.—The passengers on the train for Milton had a frightful experience early this afternoon, but fortunately no one was seriously hurt, though a car in which twenty-five persons were sitting was broken in at one end and half the roof taken off. Just ahead of the passenger car was a flat car loaded with long wrought-iron pipe, six inches in diameter, shipped from San Francisco to Hayward & Hobart's Utica mine at Angels.

When about four miles from here and while the train was running thirty miles an hour, the pipe commenced rolling off, and pieces struck the ground. They were driven against the front of the passenger car. The crash of broken timbers and glass was frightful, but the quick action of Conductor Stafford probably saved a number of lives. He instantly threw on the air brakes and brought the train to a stop.

Several passengers were under the fallen timbers and broken seats, but only two men were hurt, one a passenger for Angels, having a deep cut in the calf of his left leg, but he kept on his journey. The other man received a long gash on his head.

How the passengers escaped serious injury is a mystery, as several were seated in the end of the car which was crushed in. The momentum of the train was so great that some of the big pipes were broken in two, and one piece was wedged in the roof of the car. As soon as the wreckage could be cleared the train ran on to Milton, and returned here late this afternoon.

### BASEBALL GAMES.

The Stockton Club Shuts Out the San Francisco.

SAN FRANCISCO, March 30.—The Stockton team won its first game this afternoon by a score of 7 to 3. Griffith pitched for the visitors, and the quick action of Conductor Stafford probably saved a number of lives. He instantly threw on the air brakes and brought the train to a stop.

### AT LOS ANGELES.

LOS ANGELES, March 30.—The second game between Oakland and Los Angeles resulted in another victory for the former by a score of 7 to 3. Griffith pitched for Oakland, while Nichol held the box for Los Angeles. Both were in good form and were fairly well supported, and were batted all over the field. The game was in the nature of a slogging-match, and only the good fielding on both sides kept the score down to respectable figures. The Oaklanders, by their superior basing, assisted by a few unfortunate errors on the part of the home team, succeeded in getting a lead in the first inning which they kept up to the last.

### A BRIDGE IN DANGER.

High Water May Cause a Serious Loss to Mendocino County.

UKIAH, March 30.—With the news received to-day from Jed Lake, Chairman of the Round Valley Commissioners, that they have had a seventeen days' continuous storm in the valley, and that they will reach Ukiah this Sunday provided they can get out with horses, comes also the news that the county's new and best iron bridge, costing \$20,000, spanning the south branch of Eel River, fourteen miles south of Round Valley, is in danger of ruin. The south pier has slipped away twenty-two inches, and the north pier half as much.

### NEW ELECTRIC LINE.

Paradise Valley to be Connected by Rail With San Diego.

SAN DIEGO, March 30.—Great interest is taken in Paradise Valley, a suburb north of here, and lying in National City limits, in securing an extension to the valley of J. D. Spreckels' electric railroad, which now has its southern terminus at Thirty-first street. The residents are having a grade made, at a cost of some \$9,000, over which the electric road is expected to be built as soon as the grade is completed, as Ralph Granger, E. J. Swayne and other wealthy owners of the ranches there guarantee a certain revenue for a period of years, and the electric company is said to have accepted the terms.

### A World's Fair Appointment.

SAN DIEGO, March 30.—The appointment by the World's Fair State Commission is announced of Clark Albert of this city as Assistant Superintendent of the Mines and Mining Department for the State Building at the World's Fair, the first appointment of this class south of the Tehachas. Albert leaves for Chicago to-morrow.

## TURNER OF STOCKTON, ARRIVED HERE THIS MORNING WITH HIS TRAINER, AUSTRALIAN BILLY SMITH.

The match takes place before the Athletic Club of Carson on April 12th for a purse of \$750 and \$10,000 a side.

### A Young Child Drowned.

SAN JUAN, March 30.—Augusta Boicelli, age 4 years and 6 months, was found drowned in an open well situated in the Mission vegetable garden late last night. He was a son of the Italian lessee of the garden.

### Telephone Extension.

SAN JUAN, March 30.—The Sunset Telephone Company has completed its lines to Fresno and Watsonville and opened the same for business.

### ELECTION OF PRESIDENT.

Senator White Thinks It Should be by a Direct Vote of the People.

NEW YORK, March 30.—In an interview with a *Times* reporter yesterday, Senator White of California said that he was in favor of changing the system of electing President.

"I believe the dummy names on electoral tickets," he continued, "should be eliminated and that Presidents should be elected by direct vote or by Congressional districts. In Michigan last fall the system of election by Congressional districts was tried and proved successful, but the Republican Legislature has repealed the law."

"The Congressional district plan would be unfavorable for Republicans and if adopted, would probably keep them out of power in the Federal Government forever, but it is the most correct plan yet proposed."

"There has also been a good deal of discussion about the system of election of United States Senators. I have thought of this subject a good deal, and have come to the conclusion that it would be an advantage to elect Senators by popular vote. Under the present system there are great opportunities for corruption and fraud, and a direct vote would be an improvement. Senator Mitchell proposed an amendment to the Constitution and introduced a resolution to that effect, providing for the election of Senators by a popular vote. This resolution will probably be called up again at the next session and I think it will have a good many advocates."

### "HEART FAILURE."

The Heart the Most Perfect Organ of the Animal Economy.

A physician, writing to the *Medical Brief*, says:

"I wish to say a few words about heart failure. It is almost always the result of deaths attributed to heart failure. Now, what I wish to ask is, what is it the heart fails to do? I have always considered the heart the most perfect organ of the animal economy, and one that never shirks its duty. It commences its labors during the early stages of pregnancy, and goes on until the last moment of life, without one second's rest, night or day, often without the intermission of a single pulsation for one hundred years or more. At every pulse it pumps out of life, without one drop of blood, 12,000 pounds; every year, 4,700,000 pounds; every 100 years, 473,000,000 pounds. Verily a good organ and all performed without one moment's rest."

Now, the heart has the very meanest and most contemptible neighbor that ever existed in the animal kingdom, a drunkard, a glutton, a trespasser, and most everything else bad. Verily it ought to be walled in and compelled to keep its eyes, ears, nose, tongue, and stomach, lies directly under the heart, with only the diaphragm between, and when it fills with gas it is like a small balloon. It is inflated with gas, and directly with the heart's action. The stomach never generates gas, but when filled with undigested food fermentation takes place and gas is formed. The interference depends upon the amount of gas in the stomach. To overcome this obstruction the heart has to exert itself in proportion to the interference. The blood is sent to the brain, and the following symptoms are the result: A dizzy head, a flushed face, a loss of sight, spots or blurs before the eyes, bashful eyes, zigzag lines or chains, etc., often followed by the most severe headache. These symptoms are usually relieved when the gas is expelled from the stomach.

Now, when this upward pressure upon the heart becomes excessive, more dangerous symptoms are the result, a larger quantity of blood is sent to the brain, some vessel ruptures and a blood clot in the brain is the result, and the patient dies of apoplexy, or, if he lives, is a cripple for life.

When a sick person, or an old one, goes on with feeble digestion, sleeps, digestion is nearly or quite suspended, and fermentation goes on, and the gas is accumulated as before stated.

A man is found dead in bed, and the medical attendant pronounces the cause of heart failure, and such is the certificate of burial given. Now, the man was out, partook of a late supper, and ate roast beef, turkey, chicken, oysters, mince pie, plum pudding, ice cream cake, an orange, nuts and raisins, three or four cups of coffee, etc., went home at midnight, retired, and died of heart failure before 9 o'clock the next morning. What did the heart fail to do?

## HIS LAST ALARM SOUNDED.

### Chief Scannell of the San Francisco Fire Department Dead.

### PEACEFUL ENDING OF AN ACTIVE AND USEFUL LIFE.

A Brave Soldier and a Heroic Fireman—A Man Connected With the Early History of California—Sheriff of San Francisco During the Turbulent Times of 1856, and Almost Continuously Since at the Head of the Fire Department of San Francisco.

### Special to the RECORD-JOURNAL.

SAN FRANCISCO, March 30.—The Chief Engineer of the San Francisco fire department, David Scannell, is dead. While sitting in a chair and reading a newspaper in the fire house, on Bush street, between Kearny and Grant streets, he passed quietly away, without the slightest sign of pain, at 9 o'clock this morning. He had been looking over the paper, when he was seen to droop, take off his spectacles and attempt to speak, but death followed too quickly to enable him to utter a word.

He had not been performing active duty for some time, owing to the fact that he had a severe attack of la grippe, with his complications. These were, with his great age, the cause of his death. The doctor who has been in constant attendance upon the Chief stated that during the last week his patient has been gradually failing, and that he was suffering from a complication of kidney and liver troubles, together with fatty degeneration of the heart, and that he has been unable to move without becoming exhausted.

The fire bell turned in an alarm at 9 o'clock this morning, announcing the death of the Chief. The number struck was 73.

David Scannell was born January 31, 1820, in the city of New York. In the year 1846 a volunteer military company was organized in that city and he was made Lieutenant of the organization. The company was under the command of Colonel W. Burnett. This volunteer company entered the Mexican War, and David Scannell along with his comrades fought in every battle from the one at Vera Cruz up to the capture of the City of Mexico. He also served under General Scott. He was a born fighter, and his conduct in action was more than once mentioned in the dispatches. At the battle of Chapultepec he particularly distinguished himself, rushing forward upon the enemy almost alone. Such actions as this made his name known throughout the whole army. At the end of the Mexican War he returned home as a Captain.

In 1851 he came to California on the steamer *Gold Hunter*, and soon after his arrival became connected with the San Francisco Fire Department. He took an active part in fighting the great fire of May 4th of the same year, when nearly the whole of the then small city of San Francisco was almost consumed.

In 1855 Mr. Scannell was elected Sheriff of San Francisco County, and during the turbulent times in 1856 he showed great grit. He was in sympathy with the law and order part of the community, and operated with them for the suppression of crime. He had charge of the County Jail and had in his custody Charley Cora, the murderer of United States Marshal Richardson. He was in charge of the prisoners, shortly after the editor of the *Bulletin* had been killed, Scannell handed over the keys and told them to go and take them. The jail was raided and Cora and Casey taken out and hanged. May 4th of the same year, for his action in not opposing the demands of the Vigilantes at the time, but history has shown that he acted with wisdom, for the leaders of the movement would have brooked no delay, but would have taken the jail by force, and probably many lives would have been sacrificed in the struggle.

Scannell was always full of patriotism. When the civil war opened there were fears entertained that General Albert Sydney Johnston of the Confederates intended turning this city over to the Confederates forces. Volunteers were called for, and David Scannell was one of the first to respond.

In 1860 Mr. Scannell was elected Chief Engineer of the Volunteer Fire Department, and was unanimously elected again in 1865. On April 4, 1871, Mr. Scannell was elected Chief of the paid department, to succeed Charles H. Acklen, and he held the position until his death, making a continuous story of self-sacrifice, day and night, saving human life and property with perfect disregard of his own welfare, and endeavoring himself with every individual of this city and county, over whom he has been a faithful and conscientious guardian.

During Chief Scannell's career as a fireman he has met with many accidents, and old firemen say it is safe to assert that almost every bone in his body has been bruised or broken. No one who has attended a fire in this city during his incumbency who has not seen the vigor which he displayed in fighting the flames. The same spirit seemed to actuate him as when fighting the enemy in Mexico. It was a veritable battle he appeared to be engaged in, and many of the men as he would a military company engaged in action. His energy inspired his firemen, and to him in a very great measure is due the efficiency of the department.

The dead Chief's body will lie in state in the meeting-room of the Fire Commissioners at the Old City Hall until burial.

### El Tremor.

A slight earthquake shock was felt in this city this morning about 2:30.

A New York woman wears a ring in which is set in a circle of diamonds her first baby's first tooth. A London lady of high degree wears set in the jewels of her bracelet a tooth extracted from the mouth of her pet poodle. Another affectionate creature uses the skin of a once favorite horse as a hearth rug for her bonfire, and has a defunct pet put mounted in a life-like attitude by the taxidermist for an ornament on her writing table.

## COAST CHRONICLES.

### Frightful Experience of Passengers on a Milton Train.

### QUICK ACTION OF A CONDUCTOR SAVES MANY LIVES.

A Four-Year-Old Child Found Drowned in an Open Well at San Juan—Clark Albert of San Diego Appointed Assistant Superintendent of Mines and Mining for the State Building at the World's Fair.

### Special to the RECORD-JOURNAL.

STOCKTON, March 30.—The passengers on the train for Milton had a frightful experience early this afternoon, but fortunately no one was seriously hurt, though a car in which twenty-five persons were sitting was broken in at one end and half the roof taken off. Just ahead of the passenger car was a flat car loaded with long wrought-iron pipe, six inches in diameter, shipped from San Francisco to Hayward & Hobart's Utica mine at Angels.

When about four miles from here and while the train was running thirty miles an hour, the pipe commenced rolling off, and pieces struck the ground. They were driven against the front of the passenger car. The crash of broken timbers and glass was frightful, but the quick action of Conductor Stafford probably saved a number of lives. He instantly threw on the air brakes and brought the train to a stop.

Several passengers were under the fallen timbers and broken seats, but only two men were hurt, one a passenger for Angels, having a deep cut in the calf of his left leg, but he kept on his journey. The other man received a long gash on his head.

How the passengers escaped serious injury is a mystery, as several were seated in the end of the car which was crushed in. The momentum of the train was so great that some of the big pipes were broken in two, and one piece was wedged in the roof of the car. As soon as the wreckage could be cleared the train ran on to Milton, and returned here late this afternoon.

### BASEBALL GAMES.

The Stockton Club Shuts Out the San Francisco.

SAN FRANCISCO, March 30.—The Stockton team won its first game this afternoon by a score of 7 to 3. Griffith pitched for the visitors, and the quick action of Conductor Stafford probably saved a number of lives. He instantly threw on the air brakes and brought the train to a stop.

### AT LOS ANGELES.

LOS ANGELES, March 30.—The second game between Oakland and Los Angeles resulted in another victory for the former by a score of 7 to 3. Griffith pitched for Oakland, while Nichol held the box for Los Angeles. Both were in good form and were fairly well supported, and were batted all over the field. The game was in the nature of a slogging-match, and only the good fielding on both sides kept the score down to respectable figures. The Oaklanders, by their superior basing, assisted by a few unfortunate errors on the part of the home team, succeeded in getting a lead in the first inning which they kept up to the last.

### A BRIDGE IN DANGER.

High Water May Cause a Serious Loss to Mendocino County.

UKIAH, March 30.—With the news received to-day from Jed Lake, Chairman of the Round Valley Commissioners, that they have had a seventeen days' continuous storm in the valley, and that they will reach Ukiah this Sunday provided they can get out with horses, comes also the news that the county's new and best iron bridge, costing \$20,000, spanning the south branch of Eel River, fourteen miles south of Round Valley, is in danger of ruin. The south pier has slipped away twenty-two inches, and the north pier half as much.

### NEW ELECTRIC LINE.

Paradise Valley to be Connected by Rail With San Diego.

SAN DIEGO, March 30.—Great interest is taken in Paradise Valley, a suburb north of here, and lying in National City limits, in securing an extension to the valley of J. D. Spreckels' electric railroad, which now has its southern terminus at Thirty-first street. The residents are having a grade made, at a cost of some \$9,000, over which the electric road is expected to be built as soon as the grade is completed, as Ralph Granger, E. J. Swayne and other wealthy owners of the ranches there guarantee a certain revenue for a period of years, and the electric company is said to have accepted the terms.

### A World's Fair Appointment.

SAN DIEGO, March 30.—The appointment by the World's Fair State Commission is announced of Clark Albert of this city as Assistant Superintendent of the Mines and Mining Department for the State Building at the World's Fair, the first appointment of this class south of the Tehachas. Albert leaves for Chicago to-morrow.
