

FOR GOOD ROADS.

The Supervisors Help Along the New Movement.

New Swamp Land District Petitioned for—George R. Martin Elected to Succeed Constable Swift.

When the Board of Supervisors convened yesterday morning a large delegation of the Humane Society, including the officers, was present and evidently primed for business of some sort, which they considered important.

K. C. Irvine addressed the board on the subject of holding a convention in favor of the good road movement. The Record-Union has said, had been actively promoting a call in favor of such convention, in conjunction with the members of the society, and it was very desirable for the good of the State and country that it should be held.

The society, he said, desired of the board a small donation, to aid in carrying out the object aimed at. The amount asked was only \$100—not to be spent for banquets or junketing, but for necessary expenses.

A. C. Hinkson said the public in general did not seem to appreciate properly the importance of good roads. In the East a public journal devoted especially to the subject of educating the people on this subject. He thought that the expenditure by the board of \$100 would be perfectly legal and justifiable in his opinion.

Mr. Hinkson stated that \$200,000 had been spent on the roads of the county within ten years, and in many places they are yet almost impassable in the winter time. The people of the county are now paying twenty cents tax for roads, when if bonds for \$200,000 had been issued ten years ago they could today have the best of roads all over the county, and be paying only 7 1/2 per cent for interest and sinking fund on the bonds for payment of them.

Supervisor Jenkins did not think the board had any authority to make such a donation. He believed that we ought to have good roads, and that to get them by a general tax, to which all should contribute, and that our roads could not well be too good. Still, he could not see that the board could legally make this appropriation.

W. D. Lawton agreed with the other speakers, and spoke of the annual loss in horses which this county, in common with others, has suffered from the East who would like to settle here on the lands to be placed, San Joaquin and other neighboring counties where the roads are better. Good roads would attract them to this county.

Mr. Hinkson stated that \$200,000 had been spent on the roads of the county within ten years, and in many places they are yet almost impassable in the winter time. The people of the county are now paying twenty cents tax for roads, when if bonds for \$200,000 had been issued ten years ago they could today have the best of roads all over the county, and be paying only 7 1/2 per cent for interest and sinking fund on the bonds for payment of them.

Supervisor Jenkins thought there was a way in which the board could make the appropriation asked for, and called its attention to the fact that the law allowed the appropriation of \$1,000 annually to promote immigration to the county. Nothing would promote immigration better than good roads, and such an appropriation will be eminently proper and an investment. He therefore moved that an appropriation of \$100 to the convention be made from the immigration fund, and the motion was carried unanimously.

are two Supervisor districts in the county, they should have two members to represent them on the board and the city the other two.

Supervisor Jenkins said he felt, with Mr. Curtis, that the county should have a representation of two upon the board. He asked, in the interest of his constituents, that his district be represented. For years it had had no representation upon the board, and he felt it was just and right that it should have a show. The county had only two Supervisor districts, but it paid half the taxes, and it was not right, because the people lived a little farther from the Capitol, that they should be left out in the cold. He would place in nomination a teacher from the county, whose qualifications he could vouch for, and asked that this board elect Mrs. to the position. He then nominated Mrs. Fanny Osborn, saying that in doing so he had no personal feeling against anyone of the present board, for whom he entertained the greatest friendship and respect, but he felt that it was due to his district that Mrs. Osborn should be elected.

The roll was called on Supervisor Todd, in nomination, and the voting, Todd, Miller and the chairman voting aye and Jenkins and Curtis no.

NO LACK OF SALOONS. The bonds of F. J. Buel, to keep a saloon at Hicksville, J. A. Graham, to keep one at 1005 E Street, Stephen T. Boyer, at 2800 N Street; J. H. Moffatt, at 423 K Street; Arthur Miller, at 630 J Street; William Bergin, at 531 I Street, and Frederick W. Allen, at Miller's Ferry, were approved.

OUR HIGH SCHOOL. The State University Admits Its Graduates to all the Courses. Sacramentans have long felt that they had every reason to be proud of their schools and that they ranked with any in the State. The parents of pupils must always feel gratified at any evidence of appreciation by educational institutions in other places, and especially so when it affects their district.

It will, therefore, be a source of gratification to the parents of the pupils attending the High School to know that the graduates thereof will be admitted to any of the four courses at the State University upon presentation of their diplomas and a recommendation by the Principal of the school.

The following letter received by Principal Todd speaks for itself as to the estimation in which the school is held, only two others in the State, we believe, having the same honor accorded them: UNIVERSITY OF CALIFORNIA, J. H. Pond, Principal of the Sacramento High School, Sacramento—MY DEAR SIR: I have the honor to inform you that at a meeting of the Schools Committee of the Academic Council, held at Berkeley, May 22, 1893, it was voted that the Sacramento High School be accredited for the school year 1892-93 to Group I, Group II, Group III, Group IV, of the requirements for admission to the University. Respectfully, JAMES SMITHS, Recorder of the Council.

County Hospital. Dr. G. A. White, Superintendent of the County Hospital, has made the following report to the Supervisors for the month of May: Number of patients in hospital 181; admitted during month, 91; born; 2 died; discharged, 105; remaining, 171.

Mortality list—John J. Nietsche, age 76, native of Pennsylvania, apoplexy; J. D. Smith, age 47, Canada, abscess of kidney; J. F. Skally, age 39, Mississippi, delirium tremens. The current expenses have been: Salaries, \$754; subsistence, \$2,050 01; total, \$2,750 01.

Supreme Court Decision. Yesterday a decision of the Supreme Court was filed with Deputy Clerk Cowan in the case of Eliza J. Bury vs. Elizabeth C. Young et al., an action in partition on Stanislaus County reversing the judgment of the Superior Court.

Has Become a Citizen. Charles Hanson, a native of Denmark, was admitted to citizenship by Judge Grant yesterday, on the testimony of A. R. Corsaw and H. E. Greer.

Wheat Situation Depressed at San Francisco.

Weakness has been a prominent feature of the Wheat market for some little time, and the situation has become more depressed this week on account of the disturbing influences that have prevailed at other centers. No. 1 Wheat has touched \$1 22 1/2 per cent, but whether this be bottom is a matter of uncertainty. Buyers are not at all anxious to secure wheat, and the market is not well quoted. Milling purchasers show staid feeling, though there is a wide range. The barley situation does not have promising outlook for the selling interest. Stocks in the State are considerably larger than they were at the same time last year, while there are good harvest prospects for new crop, consignments of which are now coming forward. Prices for all qualities are necessarily weak under such circumstances. Old breeding of really desirable quality is not over plentiful, and quotations for such stock are somewhat firm. The oat market is a very dull one, and stock does not move off as quickly as holders would desire. If trade were to improve it is not unlikely that some sales on current figures will be necessary to ease some activity.

There is but little trade, being done in Hops, and prices keep easy at a range of 13c to 16c per lb. In reviewing the situation of the Pacific Coast 1892 crop having gone forward, there is a general inquiry here for spot goods. There has been some little clearing of the market, and a few reports of arrivals from the future in English plantations but these are few and far between. Long continued drought there having broken, New York reports show that the weather in the West is not so favorable for a good crop. Reports from Washington, Oregon and California indicate the coming crop to be fairly good, and a healthy condition. Even the growers who have new yards and expect small crops hereafter, now have a good year's yield than was ever before known on this coast.

There was a good demand for Vegetables of all kinds this morning. Potatoes were steady, onions were firm. Prices elsewhere are steady. The fresh fruit market is quiet. The market is for fruit, and is quiet at quotations and stocks are plentiful. Fine ranch eggs are firm. Cheese, butter, and other dairy products are steady. The poultry market is dull, with heavy receipts. Another carload of Eastern is due tomorrow.

PRODUCE MARKET. FLOUR—Trade is of small proportions, and prices are anything but firm. We quote: Not cash prices, but quotations for 100 lb. bags, 40c; 20 lb. bags, 45c; Bakers' Extras, \$4.25; 20 lb. Superfine, \$2.00; 20 lb. Superfine, \$2.00; 20 lb. Superfine, \$2.00.

GRAIN—Wheat, 1892-93, No. 1, 1.22 1/2; No. 2, 1.15; No. 3, 1.05; No. 4, 1.00; No. 5, 0.95; No. 6, 0.90; No. 7, 0.85; No. 8, 0.80; No. 9, 0.75; No. 10, 0.70; No. 11, 0.65; No. 12, 0.60; No. 13, 0.55; No. 14, 0.50; No. 15, 0.45; No. 16, 0.40; No. 17, 0.35; No. 18, 0.30; No. 19, 0.25; No. 20, 0.20.

WHEAT—Cheaper to sell. California spot lots, 5c; 10c; 15c; 20c; 25c; 30c; 35c; 40c; 45c; 50c; 55c; 60c; 65c; 70c; 75c; 80c; 85c; 90c; 95c; 1.00; 1.05; 1.10; 1.15; 1.20; 1.25; 1.30; 1.35; 1.40; 1.45; 1.50; 1.55; 1.60; 1.65; 1.70; 1.75; 1.80; 1.85; 1.90; 1.95; 2.00.

Mesmin's French Female Pills.

Exciting! For 29 years I had heart disease very seriously. Was treated continuously five years, and was still in a feeble condition. I tried many different remedies, but none did me any good. I was told to try Mesmin's French Female Pills, and I did so. I had taken only one box when I felt a great relief. I had taken only two boxes when I was able to get up and walk. I had taken only three boxes when I was able to go to work. I had taken only four boxes when I was able to do all my usual work. I had taken only five boxes when I was able to do all my usual work, and I was feeling as well as I have ever felt in my life. I had taken only six boxes when I was able to do all my usual work, and I was feeling as well as I have ever felt in my life. I had taken only seven boxes when I was able to do all my usual work, and I was feeling as well as I have ever felt in my life. I had taken only eight boxes when I was able to do all my usual work, and I was feeling as well as I have ever felt in my life. I had taken only nine boxes when I was able to do all my usual work, and I was feeling as well as I have ever felt in my life. I had taken only ten boxes when I was able to do all my usual work, and I was feeling as well as I have ever felt in my life.
