Immigration and Labor Conditions. In the growth of this nation from its inception down to within twelve months of this date, immigration has been an important factor.

The statement emanating from the Bureau of Information to the effect that the emigration from the United States exceeds the immigration for the first time in eighty years, gives rise to serious reflection. The hebra from the United States is referable to the existence here of hard times.

This is, however, but one feature of the case. It may now be acknowledged that stage of growth where its young people will emigrate to other countries. Currents of emigration are set in motion by the disparity of conditions relating to prosperity as between two countries having communication with each other.

Conditions, however, are now equalized. Hereafter for every immigrant that we receive we will lose a native, because we can receive the immigrant only by wedging him in. Our vessel is full, and every drop of accession will be followed by its equivalent overflow.

between the demand for labor and its supply will in turn produce adversity.

NEVER AGAINST NON-OFFENDERS. Debs and Sovereign, in their letter to the President of the United States of America, that by the way is a document the issuance of which does the cause of honest labor infinite harm, say that whenever the Federal military arm has been invoked in aid of civil authority in any conflict between corporations and the people, it has been put forth against the industrial people.

Now, there is not a school boy of 17 in the land who does not know this to be untrue, as all schoolboys of that age are presumed to have studied the history of their country. There is no citizen of intelligence enough to come in out of the cold and wet who does not know that there has not been an instance in the history of the American nation, not one, in which the Federal military authority has been exercised against any human being who was not violating the law of the land and trespassing upon some vital constitutional guarantee of the people.

Both Mr. Debs and Mr. Sovereign know, and they knew it when they wrote what they did, that there is not in the entire history of the nation a single instance of the Federal military arm or the State military arm being used, except in maintenance of some law made by the people, and never yet has there been turned against a law-abiding body of the American people the force of the Federal Government.

Mr. Debs, in his letter to the President, says: The transmission of the United States mails is not interrupted by the striking employees of any railway company, but by the railway companies themselves, who refused to haul the mails on the trains to which Pullman cars were not attached.

While riding on a handcar on the north levee on Saturday evening, Percy Douglas, the 13-year-old son of Officer Douglas, was struck in the right eye with a handful of dirt, thrown by a member of what is known as "The Tweeth-street gang," and it is feared the sight will be destroyed.

DR. WELDON, Dentist, has opened an office at 806 J street. MRS. WINSLOW'S SOOTHING SYRUP has been used over fifty years by millions of mothers for their children while teething with perfect success.

Rev. T. J. Horner Makes a Patriotic Appeal.

"Two Wrongs Never Yet Made One Right, and Never Will"—Strong Words.

Rev. T. J. Horner, in his sermon at Unity Hall yesterday, said, after reviewing American history somewhat, that if we as men and as citizens neglect the heritage the past has bequeathed to us we shatter the glowing hopes of the future.

Nothing has ever been produced to equal or compare with Humphreys' Witch Hazel Oil as a CURATIVE and HEALING APPLICATION. It has been used 40 years and always affords relief and always gives satisfaction.

Character is formed in the home, and character after all is what must rule the Nation.

Government is simply the reflection of the average character of the people in all their activities. If the Government corrupt it is its own fault. If the railroads control the elections it is because the people who are largely in the majority can be bought.

The United States manufactures every year over two hundred and twenty million gallons of alcoholic liquor, worth on the average \$1 a gallon. The working men of America drink most of it, yet whooping hundreds of strikes against this monopoly? It is because men can be controlled through their appetites that the saloons have become the centers of corruption and machine politics.

Eradicating this great evil and the match behind the tinder in all great social upheavals like that which we are now passing through is the duty of every citizen. We would listen to reason where passion now alone controls them.
