

RAILWAY MILEAGE IN THE COUNTY.

Its Apportionment Among School and Road Districts.

The South Yuba Water Company Asks Privileges From the County Supervisors.

The Board of Supervisors held a meeting yesterday morning to apportion the number of miles of railroad in each school district for special tax purposes and to transact such other business as might come before it.

Dr. C. Van Arden, resident director of the South Yuba Water Company, addressed the board, saying that the company has at present 900 horse-power of water running to waste near Newcastles, and about 1,000 horse-power running to waste a few miles from there—about 2,500 horse-power in all, which they were anxious to transmit to the city by electric wires.

He asked for the granting of a franchise allowing the company to place its poles on the side of the county road at such places as was necessary, between here and Antelope, under such regulations as the board might prescribe.

The board did not see any present objection to granting a franchise, but took the matter under advisement and for reference to the District Attorney.

The segregation of the railroad track for taxation purposes to the several school and road districts through which it passes was then made. It shows that the Central Pacific and Northern Railroads run through Arcade, American River, Center, Elder Creek, Elk Grove, Florin, Grant, Gait, Hicksville, Jackson, Sylvan, San Joaquin, Victory, Junction, Antelope, Alder Creek, Brighton, Capital,

Granite, Kinney, Howard, Washington, White Rock, Alabama, Laguna and Buckeye Districts.

A communication was received from the Dept. of Public Works, stating that it believed that the county should pay the same rates for its advertising as private individuals do, it should hereafter charge the county its regular advertising rates.

On motion of Jenkins the city members were appointed as a committee to superintend putting rock screenings on the surface of the new road that has been graded beyond Willow Slough.

Curtis said that he had orders from two parties to do the grading on the Jackson road for \$75 per mile.

Morrison said he was not advocating the employment of any particular person. At his request, however, Charles Studarus had examined the road and reported that he could grade the road at \$70 a mile. His idea was that the Commission of the district should be empowered to have the road graded at a cost not to exceed \$70 per mile. That was, he thought, the proper way.

Those present who wished to grade the pieces of road north of Florin presented bids.

W. A. Smith and A. J. Macy's bid was \$57 25 a mile, and C. Bartholomew's was \$55 for the whole distance, amounting to two miles. The Finance Committee reported in favor of Bartholomew's bid as the lowest, and the report was adopted.

Jenkins said that there was a piece of adobe road below Franklin which the people wished to face with gravel after the adobe had been graded up. He was directed to get an estimate as to what the work could be done for and report it to the board.

He said also that he had two miles of road near Clay Station plowed up, and as it was an outlet the people there had over which to haul their wheat to market, it should be graded immediately.

On motion of Morrison, he was authorized to have it graded at a cost not to exceed \$85 per mile.

Curtis was also authorized to have the four miles on the Jackson road graded, at a cost not to exceed \$75 a mile, and the mile of cross-road north of Walshe's station graded, at a cost not to exceed \$80 a mile.

Jenkins was authorized to have the road running north from Birch's corner, near the Excelsior Schoolhouse, graded, at a cost not to exceed \$85, and the road east of Elk Grove, between the lands of Foulkes and Ehrhardt, at the same price, and that between the lands of Ehrhardt and Crocker, not to exceed \$70 per mile. County Surveyor Boyd advised the board that some person should be appointed to inspect the driving of the piles at the Johnston place and see that it is

done properly. It would take about seven days and would cost \$3 a day. It was so ordered.

An appeal was made to the board of the slaughter-house near Island and Y streets be opened so as to let the flood-water pass through.

The board took an adjournment till the October meeting.

LARGEST EVER MADE.

Immense New Oak Casks at the California Winery.

The proprietors of the California Winery on Twenty-first street have the assurance of the San Francisco cooper who furnished them, that the fourteen new casks which are this week being set up in their cellars are the largest ever constructed. Certainly they are the most capacious of any in use on this coast, and it is believed that in the matter of dimensions they are world-beaters.

The amount of money which is invested in these new casks is about \$7,000, as they will cost very close to \$500 each. They are of uniform size, being eleven and a half feet high and ten feet across the heads. The material is the finest Arkansas-grown quarter-sawn selected oak. The heads and staves are three inches in thickness, except where the latter are made slightly thinner at the belly. Over a ton of iron is consumed in the massive hoops of each cask.

The aggregate amount of wine which they will hold is 38,000 gallons, or 7,600 gallons each. The heads are to be hand-hewn and finished, bringing out the beautiful grain of the wood, while the staves will be planed and sandpapered to a high degree of smoothness. Although consigned to the use of the wine cellars of the company, they are nevertheless by no means unsightly objects.

The California Winery is receiving grapes daily now, mostly of the Mission and Zinfandel varieties, which will probably be made in the course of the season some 7,000,000 pounds. Sherry, port, burgundy and line clarets are made, especially pride being taken in the sherry which captured the medal at the late State Fair exhibit.

Five other prizes were taken at the same time for excellence and purity of wine, one being a cash prize of \$100. Affairs at the California Winery are under the complete direction of Ernest Kinzel, who has been in charge since the resumption of the works three years ago.

"BUCKSKIN JOE." The Veteran Guide and Soldier in the City. Joseph G. Garrison, formerly known here to many old-timers as "Buckskin Joe," was in the city yesterday. He came from San Diego, where he has been ill for several months, and is on his way to the Georgetown Divide, where he intends to spend the winter.

Mr. Garrison is now 70 years of age and is wonderfully well preserved. He was formerly a United States Western guide, and came to California first in 1846. He is a veteran of the Mexican and civil wars, and also served in several of the Indian wars. He was one of the charter members and organizers of Summer Post, G. A. R., of this city. He is still one of the best rifle shots in the State.

CLEAN UP, THE ORDER OF THE DAY. Four Assistant Sanitary Inspectors to be Employed.

The Board of Health Given Full Power to Act by Order of the City Trustees.

There was a special meeting of the Board of Health last evening for the purpose of considering plans for having the city put in the best possible sanitary condition.

Dr. Huntington, President of the board, returned from a consultation with the City Trustees and reported that the latter body had adopted a resolution offered by President Lawton empowering the Board of Health to incur any necessary expense in improving the condition of the city, that it may be the better prepared to deal with cholera should that disease—now prevalent in China, Japan and the Sandwich Islands—reach this coast.

Dr. Parkinson thought there should be four inspectors employed to thoroughly inspect the city and report all nuisances.

Dr. Nichols said he had made a casual inspection of a good portion of the city and found it in a very bad sanitary condition, but there are many localities that need looking after.

President Lawton of the City Board of Trustees here called and said the latter body had adopted a resolution to the effect that to any expense that in its judgment might be deemed necessary to prevent or cure any epidemic that might visit the city.

Dr. Ward remarked that, in relation to the employment of inspectors, it was his opinion that more than four inspectors be employed. The season was well advanced, and rains might come and impede the work of the inspectors. He thought it best to employ plenty of men and have the city placed in the best possible condition at the earliest moment.

Dr. Nichols said he was free to say that he believed that the Board of Health should block down town a worse condition of affairs than in some parts of Chinatown.

Dr. Parkinson moved that the Secretary of the board be authorized to employ four special inspectors at a salary of not to exceed \$100 per month each for such time as might be deemed necessary to do the work required.

After some discussion Dr. Parkinson's motion was adopted.

On motion of Dr. Waggoner, the Secretary was instructed to issue a general notice to the public to at once set about cleaning up their premises.

It was the expression of the board that while it is necessary to have the city placed in the best possible sanitary condition, there is no occasion for a scare among the people. People should go right about the task of cleaning up their premises and be prepared for an epidemic of cholera, should it come. If the scourge should be kept out of the State, the cleaning-up process will not be without good results.

Nichols read applications from B. E. Brown and Edmund Ellis for appointment as assistant inspectors, and the names of Charles Farren and William Shadwin were submitted.

The board after a general talk on sanitary matters, adjourned till the regular monthly meeting on Tuesday next.

Christopher Gogger Wanted. Mrs. Hudson Fowler of Port Jefferson, Suffolk County, New York, has inquired of Governor Budd the whereabouts of her uncle, Christopher Gogger. She states that he has been living in the vicinity of San Francisco for the past thirty years, and lived in that city about four years ago.

The State Tax Equalizers. The State Board of Equalization met yesterday and directed the Clerk to communicate with Attorney-General Fitzgerald and inquire of him whether or not he can come up from San Francisco and consult with the board on some important points of law in regard to which all the members of the board do not agree.

That Tired Feeling should be overcome on Monday and most seriously. Take Hood's Sarsaparilla now and prevent sickness and suffering later in the season.

Hood's Pills are the best family cathartic and liver medicine. Harmless, reliable, sure.

FOR SALE BY ING & ALLEE, 712 J STREET.

IN FALL MONTHS.

Neuralgia, Rheumatism, Can Now Be Cured.

Old Time Obsolete Diseases Are Easily Curable.

PAIN'S CELERY COMPOUND IS THE GREAT SPECIFIC.

It Restores the Neglected, Faded Nerve Parts.

It Replaces Worn-Out Tissues With New and Vigorous Ones.

Pain's celery compound is the one assured remedy for rheumatism and neuralgia that is every day accomplishing all that physicians claim for it!

Both these old-time, obsolete diseases are to-day speedily and permanently cured by Professor Edward E. Phelps' great prescription.

Neuralgia and rheumatism are merely names for a certain reduced state of the nervous tissues. As far as causes go, they do not much differ from nervous debility, headache, dyspepsia and sleeplessness.

The mischief is the same in every case, a nervous system robbed of life and substance by over-exertion and scanty nutrition. The cure for all these is likewise in the same direction. Strengthen and restore the nerves to their normal condition with Pain's celery compound.

It is the advice of the ablest physicians everywhere.

As soon as all the countless nerve centers and fibers have been made sound and strong, not only rheumatism and neuralgia, but every kind of nervous trouble, disordered liver and heart palpitation, vanish without a trace to remind one that their presence was not at all a fearful dream.

Pain's celery compound does its curative work in a simple, straightforward way. It wastes little time on the minute and puzzling classification of diseases, but bends all its energies at once to feeding the worn-out, shattered nervous system, filling the arteries with rich new blood, and building up the body for its fight against disease.

Low spirits lose their power when the system feels the buoyancy of returning health, such as soon comes from taking Pain's celery compound. The rapid gain in weight that follows its use is a reasonable indication of the strengthening processes that are going on among the vital organs.

Many men and women who recommend Pain's celery compound do so in what, to others, may sometimes seem extravagant words. But Pain's celery compound has made them well.

MEETING NOTICES.

REGULAR MEETING OF COURT AT SACRAMENTO, 8:00 A. M. OF A. F. OF A. T. TUESDAY EVENING AT 7:30 O'CLOCK. FORESTERS' HALL, 11th Street. Visiting Brothers cordially invited. W. BENNING, C. R. JOHN MORRIS, R. S.
