

**"A Scorcher."**

# Battle-Ax PLUG

Tobacco Dealers say, that "BATTLE AX" is a "scorcher" because it sells so fast. Tobacco Chewers say, it is a "scorcher" because 10 cents' worth goes so far. It's as good as can be made regardless of cost. For 10 cents you get almost twice as much as you do of other high grade brands.

There is a shortage here in all kinds of crops. The fruit crop is almost an entire failure. If the weather remains favorable, the later crops will be far. The temperature ranged from 60 to 80 degrees.

**SAN DIEGO.**  
The haying season is approaching its close, and the quality was never better. Beans are looking remarkably well in this section. Fruits and vegetables are doing much better, and the corn crop is growing finely.

**HUMBOLDT.**  
Grain and hay have taken a new lease of life, and the fruit prospects are looking more hopeful.

**MENDOCINO.**  
Crops are coming on finely. Some fields will be short on low and wet grounds. Oat and barley hay are about ready to cut; the second crop of alfalfa will be a good one. Sheep-shearing has been delayed on account of the wet weather.

**MONTREY.**  
Cloudy weather has prevailed during the week. Wheat is heading out rapidly. Haying has just begun.

**SAN LUIS OBISPO.**  
The week has been cool, with high westerly winds, and green crops are much benefited by the damp weather.

**SISKIYOU.**  
The weather continues favorable, and everything is growing rapidly. From present indications, haying will be from eight to ten days later than usual.

**SHASTA.**  
Haying has commenced, and what hay was down was not benefited by the rains of Tuesday. Continued warm weather, with showers, has been beneficial to all growing crops.

**PLUMAS.**  
Oats in the valley is beginning to take an upward move; potatoes are a scarce article. The outlook for the season is discouraging.

**EVERYTHING LOOKING WELL.**

weather. No harvesting will be done for the next ten days or more.

**SUTTER.**  
The Hessian fly is working havoc with our wheat fields. There is a heavy hay crop in the valley country.

**YUBA.**  
Haying is in full blast, but there will only be a light crop, but the grade of it will be A1. The crop is short for the reason that the season has been favorable to the development of grain. In the grain fields many patches of barley have taken on the light color which indicates maturity.

**PLACER.**  
Haying has progressed rapidly during the week, as the weather has been very favorable, and a splendid quality of hay will be secured. All crops have made good growth during the week, except watermelons, and they appear to be a failure.

**SACRAMENTO.**  
The weather has been very good for all growing and maturing crops. Highest and lowest temperatures, 92 and 46 degrees.

**YOLO.**  
The weather has been rather threatening for some time, and has put the haymakers on the anxious seat; a little fruit is being shipped daily, but there is no rush in that line at present.

**SOLANO.**  
Haying is in full blast, and the grain is beginning to ripen, as is also early peaches and apricots. Grapevines are growing fast, and are now in bloom. Highest and lowest temperatures, 83 and 50 degrees.

**CONTRA COSTA.**  
Hay making is in progress all over the valley.

**NAPA.**  
It is good to know that this valley will raise enough fruit this year, despite the frosts, to make things lively for our packing companies.

**LAKE.**  
The shortness of the fruit crops from the late frosts will be largely compensated by the more excellence of quality.

**SONOMA.**  
The grape outlook is improving, but the vineyards are spotted; prunes run from a full crop to light, and none in some orchards.

**ALAMEDA.**  
Black cherries will be all finished picking the coming week; garden truck is looking well; haying is in full blast.

**SANTA CLARA.**  
Fruit of all kinds is progressing finely, and the general outlook is good; Royal Ann cherries are beginning to ripen and are of good size and free from blemish; cling peaches are being thinned; the plum crop will be a short one.

**SAN BENITO.**  
Haying is in full blast; all crops are looking well, and considerable grain will be harvested this season.

**SAN JOAQUIN.**  
The wheat has been good for grain and haymaking; barley is taking on the golden color of maturity; the berries are plump and of good quality; wheat is filling out well, and haying is well under way; fruit is slowly advancing to maturity, but the crop of all varieties will be short except pears. Highest and lowest temperatures, 81 and 45 degrees.

**MADERA.**  
Haying is well along, and the crop is a good one; fruit is advancing slowly on account of the cool weather.

**FRESNO.**  
Apricots, plums and cherries are now ripe and on the market in abundance; early peaches are ripening rapidly, and it will be but a short time until the orchards will be filled with all kinds of fruit.

**TULARE.**  
As yet the second crop of grapes has not advanced far enough to tell for a certainty whether the crop will be heavy or light. Wheat is looking fine.

**SANTA BARBARA.**  
The cool weather has been favorable to the slow maturing of grain, but not so good for summer crops. Haying is about completed, and grain is being headed. The fruit crop is a light one. Highest and lowest temperatures, 72 and 50 degrees.

**VENTURA.**  
Crops are looking well. Lima beans, as a whole, is a good stand. The foggy nights, which have just commenced, are very beneficial to crops. Haying is about over.

**LOS ANGELES.**  
The weather for the past week has been favorable to all growing crops.
