

FOR SWEET CHARITY'S SAKE.

The Grand Ball to be Given on the Ninth of December.

Common Sense Charity Club of Sacramento Making Preparations for It.

The winter's need of gaiety will soon be opened in this city with an event of unusual brilliancy. On Wednesday, December 9th, at the Capitol, will be given the first annual ball of the Common Sense Charity Club of Sacramento.

To relieve the want of the poor, and to administer charity in this city on common sense lines. Every citizen must know there is already much worthy work to be relieved in Sacramento, and that before the winter is ended there is certain to be much more.

In giving the first annual concert and ball the club aims at enlisting the sympathies of Sacramento and at raising a fund sufficient to begin its good work. Every cent realized above certain necessary expense, which the generosity of several volunteers has materially reduced, will be for the relief of the worthy poor in this city.

That the charity concert and ball will be the social event of the season goes without saying. Within a few days the list of patronesses will be made public, and this list will at once establish the character and scope of the enterprise.

WOODWARD AND KENNEDY.

Must Answer to the Superior Court on a Charge of Burglary.

In the Police Court yesterday morning R. Woodward and Neil Kennedy were held to answer to the Superior Court on a charge of having burglarized the residence of Joseph Graham, at 1222 I street, about two weeks ago, bail being fixed at \$2,000 in each case.

Graham identified the property recovered by the officers at that taken from his house the day of the burglary, and his evidence was corroborated by that of his wife.

George Chenu identified a broken puzzle ring as one Kennedy had sold to Jeweler Hollister.

Officers Higgins and Hayes testified to having arrested Woodward and Kennedy, and to having recovered some of the missing property. Kennedy and Woodward had admitted their guilt, the latter stating that he had entered the house and carried off the plunder.

Kennedy in his own defense took the stand and testified that Woodward had entered Graham's residence and afterwards told the witness what he had stolen. He gave the witness a ring to sell, which he did, and gave half of the proceeds to Woodward.

Woodward declined to take the stand in his own defense.

Articles of Incorporation.

The following articles of incorporation have been filed in the office of the Secretary of State:

American Mining and Exploration Company. Formed to conduct a general mining business. Principal place of business, San Francisco. Directors—William Kolman, Frank McCue, Lewiston, Trinity County; William H. Harrison, E. W. McKinley, J. A. Webster, San Francisco. Capital stock, \$250,000. Subscribed stock, \$250,000.

Novelty Advertising and Exhibition Company. Formed to deal in novelty supplies and to give exhibitions, entertainments, etc. Principal place of business, San Jose. Directors—O. M. Gibbs, C. Johnson, S. M. Ballard, N. W. Ballard and E. E. Johnston, all of San Jose. Capital stock, \$1,000. Subscribed stock, \$800.

The Old Bone-Mining Company. Principal place of business, San Francisco. Directors—D. R. Oliver, A. P. Johnson, S. C. Wilman, Sonora, Tuolumne County; C. S. Benedict, F. W. Wilman, San Francisco. Capital stock, \$1,200,000. Subscribed stock, \$500.

Bunker Hill Hydraulic Mining Company. Formed to conduct a general mining and milling business. Principal place of business, San Francisco. Directors—W. H. Martin, Robert Martin, Nevada City; Peter Tanthaus, E. F. Lebrich, Fred. Boeckman, San Fran-

WHITTIER SCHOOL REPORT.

Trustees Make Recommendations for Various Improvements.

The Superintendent Thinks Lack of Education Brings Many Boys and Girls There.

Andrew Mullen, W. C. Patterson and Adina Mitchell, Trustees of the Whittier Industrial School, have handed in their biennial report for the two years ending June 30, 1896, in which the recommendations of the Superintendent are indorsed, looking toward the better equipment of the institution.

The trustees estimate the per capita cost of support of children to be \$23 per month, divided as follows: Clothing \$2.50, salaries \$8.50, provisions \$5.50, material used in shops \$1.50, table linen and dishes \$1.30, school books and appliances 50 cents, fuel, light and power \$2, incidentals, medicines, etc., \$1.

"I would like," the report continues, "to emphasize a recommendation made by our predecessors that an additional 100 acres of land be purchased. This additional acreage would not only add to the efficiency of the work attempted by giving employment to a greater variety of agricultural lines, but it would contribute no small amount toward lessening the amount of expenditure for maintenance. With sufficient land, all vegetables, hay and grain might be produced, whereas now a large quantity must be purchased.

Brick-making has been successfully tried in the last few months, and we find that excellent brick can be made from the clay on our own grounds at a cost not to exceed \$3 per thousand.

"A contemplated addition to the Trades School building, to cost not to exceed \$30,000, is to be built of brick made by the boys of the school. It is proposed in this building to better accommodate the trades already taught and to add to them plumbing and carpentry, a cannery, a machine shop and small foundry, a sloyd room for the small boys, and a well-equipped gymnasium.

"It seems a misfortune that owing to the crowded condition of the institution boys committed here have to be in county jails from one to five weeks before they can be received. An additional double cottage, to cost about \$12,000, from the clay on our own grounds at a cost not to exceed \$3 per thousand.

"For the better care of the sick and their more complete isolation from those who are well a separate hospital building is badly needed. This, together with a Superintendent's residence, which is also a necessity, can be built for \$12,000.

"With the increase of land the herd of cattle should be increased by at least twenty high-grade milk cows."

The Superintendent's report is a very interesting document, and while it is of considerable length, deals with a great many questions of interest. It shows that during the five years the school has been in existence there have been admitted 888 boys and 181 girls.

Financial and statistical tables showing movement of population, etc., for each fiscal year accompany the report, which are expected to greatly aid in forming plans for the future improvement of the school.

The Superintendent calls attention to the desirability of a good compulsory education law, and contends that lack of education on the right lines and want of the care and training which are received by regular attendance at school, are prolific causes of many boys and girls starting on the wrong road.

Allowed to spend their time on the streets or with vicious and depraved companions, with no one to guard them from the dangers they encounter, it is not surprising that so many boys and girls become the wards of the State.

The educational history of the 1,099 children so far received at Whittier's shows that the average time spent by them in school has been 4.19 school years of nine months each. Over 16 per cent of the number, or 172, have attended school for one year or less, and 78 never attended school at all. Only 28 have attended school more than eight years.

Many of the boys have been tramps and spent years wandering from place to place with older companions, acquiring the most depraved and degrading habits.

In this connection the following figures are submitted, showing the percentage of pupils in the school. Pupils whose parents were separated when committed to school 212, or 19.85 per cent; pupils whose parents were deceased 94, or 8.70 per cent; pupils whose fathers were deceased 203, or 18.98 per cent; pupils whose mothers were dead 108, or 10.1 per cent; pupils who knew nothing of their parents 48, or 4.49 per cent; pupils whose parents lived together 404, or 37.70 per cent. It is thus shown that proper paternal guidance has been foreign to a great majority of the children.

It is also recommended that agents to represent the school be appointed in the several counties in the State, and when application for admission is made it should be the duty of the agent to make thorough investigations and report to the courts whether such applications should be allowed. The data on this subject are as follows:

The Superintendent urges that in reforming a pupil all possible information about his life, antecedents and environment generally should be at the command of the school, and as much of this was given in testimony before the committing magistrate it is recommended that a transcript of the evidence taken in each case be forwarded with the commitment.

The pupils are divided into companies of fifty each, arranged with a view to keeping the different classes, marked by age, criminal record, and as nearly separate as possible, and for this reason the cottage recommended by the Trustees is needed.

Under the present law girls are subject to commitment between the ages of 8 and 18, but a girl must be discharged at 18, though 17 years and 11 months old at the time of commitment. It is urged that the law be amended so that a commitment would read, "until they are 21 years of age," for, it is contended, a girl of 18 needs direction and guidance more at that period of life than at any other.

The net cost of maintenance for the year ending June 30, 1895, was \$11,340.12. Daily average attendance of pupils, \$30.80. Cost of maintenance per diem per capita, .753 cents; cost of
