

DEWEY'S VICTORY AT MANILA.

Stories Told by Witnesses of the Great Battle.

Bad Marksmanship of Spaniards the Salvation of American Fleet.

Every Gun of the Enemy's Ships and Shore Line Turned Loose Upon Dewey's Fleet, but Nearly All of the Shots Fell Wide of Their Mark.

SAN FRANCISCO, June 6.—The steamer Belgic arrived from the Orient via Honolulu early this morning, but was sent into quarantine, three cases of smallpox having developed on board since her departure from Hongkong.

There is an interesting party of travelers on the Belgic. It is made up of not less than four of Uncle Sam's officers who took part in the great fight in Manila Bay on the morning of May 1st.

Dr. Kindelberger and Guner Evans are going home on account of expiration of their service. They are now, under the rules, expected to perform shore duty for three years, but both will endeavor to go back to the sea.

The American ships, and could also see the battle plans of the Spaniards. "For two hours," says Mr. Loud, "the steady thunder of cannon was kept up. The roar was something terrible. A fierce fire was kept up from the forts and the Spanish ships upon our fleet. It looked to us from the McCulloch that our vessels could not possibly survive the awful fusillade. Heavy shells and solid shot fell around them like hail from the clouds, and many exploded immediately over the ships.

"At one time I really thought we would be beaten. This was after the fire had been kept up for an hour. It looked like every gun on the Spanish ships had turned loose on us all together, and the shore line was a veritable blaze of fire from the batteries. The din was simply indescribable. Tons upon tons of shot fell over our ships. Yes, there was steel enough to have sunk our entire fleet.

"Our salvation was in the bad marksmanship of the Spaniards. The heavy shells fell like boys. Nearly all of their shot went wide of the mark. Most were high, flying over the fleet and falling into the bay beyond. Some of the batteries, however, were better trained. Several guns maintained a raking fire on the fleet. Nearly all of our ships were struck by both large and small shot, but no damage of consequence was done.

"We left Manila on the 6th. At that time Commodore Dewey was in possession of the shore forts and arsenal. Considerable ammunition and some fair guns were captured from the Spanish vessels resting easy on the bottom of the bay. Several were burned to the water's edge, and, as you know, one was blown up.

"Manila, on the opposite side of the bay, had not been taken; it was not the property of Commodore Dewey to do so at that time. Of course the city and its suburbs were completely at the mercy of our guns, and we could have laid it in ruins in a very short time. But the force on the warships is too small to land and take possession. When the troops arrive from San Francisco Commodore Dewey will demand the immediate surrender of the city and the troops stationed there. If a refusal is given, fire will at once be opened from the warships, and forcible possession will be taken at once.

"There will be no difficulty in holding Manila and the Philippines. Complete subjugation of the Spanish forces in the group will be accomplished with-out trouble, and with very little danger to American life. The insurgents are very friendly, and at the time we left were besieging the town in large forces. They are acting under the orders of Commodore Dewey."

Dr. Kindelberger gives a graphic account of the terrific fight. He was on the Olympia through it all. "In the first assault," he says, "the flag-ship took the lead, the other vessels following in her wake at four ship's length. The Spanish fleet was approached by laps each turn bringing the contestants nearer together. By this plan the American vessels frequently poured broadsides into the enemy, but were themselves more exposed to the fire.

meet the Olympia. The entire American fleet concentrated fire on her, and she was so badly injured that she turned around to put back. At this juncture the Olympia let fly a 9-inch shell, which struck her right pier, pierced through almost her entire length, exploding finally in the engine-room, wrecking her machinery. This shell killed the Captain and sixty men, and set the vessel on fire.

"The Spanish Admiral immediately transferred his flag to the cruiser Isla de Cuba. Several smaller vessels of the American fleet, led by the Boston, centered fire on this ship, and literally tore her to pieces. The Admiral was slightly wounded, and escaped in a small boat into Baker Bay, and finally to Manila.

"In the heat of the fight two torpedo boats moved out to attack the fleet. They were allowed to come within 800 yards, when a fusillade from the Olympia sent one to the bottom with all on board, and nearly 200 dead were accounted for on the spot. Holes in the beach covered with blood.

"In the second fight the Baltimore was sent to silence the fort at Cavite. She plunged into a cloud of smoke, and opened all her batteries on the fortification. A very few minutes a shell struck in the ammunition magazine, and blew up with a deafening roar. The work of the Baltimore was glorious.

"After the principal ships had been destroyed, the Concord, Raleigh and Petrel, being of light draft, were sent close to handle the remaining vessels of the fleet. They made quick work of them.

"Several tugs and a large number of launches and small boats were captured. The vessels destroyed were three torpedo vessels, the series of fortifications at Cavite, neighboring the fort on Corregidor Island, at the head of the bay, were captured.

"In taking possession of the land forts several hundred wounded Spaniards fell into the hands of the Americans, and nearly 200 dead were accounted for on the spot. Holes in the numbers had been hastily buried were found. The dead were returned to relatives, as far as this could be done, and the wounded were cared for in the best manner by the American surgeons.

"The Spanish loss for the day, it is estimated, 600 wounded and a property loss of anywhere from \$6,000,000 to \$10,000,000.

SITUATION IN PHILIPPINE ISLANDS.

(SPECIAL BUREAU CORRESPONDENT)

pany of Spanish infantry and rebels and ex-rebels on both sides have been shot because they were suspected of treachery to their respective Generals. The Spaniards are endeavoring by every means to win over the rebels, who are attracted by promises of pardon and high offices. But Aguinaldo's attraction is stronger. He has completely surrounded Manila, by cutting the railroads and holding the rivers by which food had previously reached the city. The rebels have started into surrender the rebels may carry it, having now an increased number of rifles and field guns.

"Aguinaldo's treatment of the Spanish prisoners is exemplary. Few excesses are reported except where priests were mutilated before being killed.

"Admiral Dewey is not assisting the rebels, but it is probably due to him that Aguinaldo's forces avoid excesses.

"Foreigners, with the exception of the French nuns, remain in Manila, but are ready to board the refugee steamers as soon as the necessity arises.

"Hilo is quiet."

PROBLEM CONFRONTING MERRITT. WASHINGTON, June 7.—The press reports of the fierce fighting that has been going on in the Philippines between the insurgents and the Spaniards were read with the greatest interest at the Navy Department, where the officials realize the very grave nature of the problem that confronts Admiral Dewey. The naval officers say that the administrative difficulties with which Admiral Dewey must contend are indicated with the greatest interest by Major-General Merritt when he reaches the Philippines. A complete understanding of the nature of the agreement that exists between Admiral Dewey and Chief Aguinaldo seems to have been reached, and the fact that some of the press reports state that the insurgent leader is receiving the surrender of Spanish troops, and has proclaimed himself dictator pro tempore, that General Merritt's functions as Military Governor will be very limited.

AGUINALDO'S DESIRE. LONDON, June 7.—The Hongkong correspondent of the "Times" says: "A proclamation issued by Aguinaldo, the insurgent chief, points to a desire to set up a native administration in the Philippines under an American protectorate. Aguinaldo, with an advisory council, would hold the dictatorship until the conquest of the islands, and then would establish a republican government."

"Aguinaldo has issued orders that the lives and property of Europeans, Chinese, and all Spanish non-combatants are to be protected, and that all excesses are to be avoided."

TROUBLE AT BELFAST.

Renewal of the Rioting Begun on Monday.

BELFAST, June 7.—To-night there was a renewal of the rioting that began yesterday during the demonstration in honor of the revolution of 1788 and anniversary of June 6, 1884, when seven civilians were shot on Shank's Hill road by the constabulary.

The military has been ordered out, and it is feared that there will be a renewal of disturbances. To-night's troubles are due to inadequate police precautions. Some of the bolts and nuts used as missiles weighed from a quarter to a half-pound. For some time the fighting was very hot, but the appearance of the military the rioting ceased, but dangerous excitement prevails.

RED CROSS SOCIETY.

Services as Auxiliary to Hospital Accepted.

NEW YORK, June 7.—Secretary Alger has accepted the services of the American National Red Cross as auxiliary to the hospital services of the army of the United States, in the following letter to Miss Clara Barton: "Dear Madame: The tender of the services of the American Red Cross, made this day, is accepted through the Department of State, under date of May 25th, for medical and hospital work as auxiliary to the hospital service of the army of the United States, is accepted; all representatives and employees of said organization to be subject to orders according to the rules and discipline of war, as provided by the sixty-third Article of War."

Case of Carranza and Du Bose. MONTREAL, June 7.—No actual move has yet been made in the capture of Carranza and Du Bose, but their counsel will try to have the capture postponed to-morrow or next day, and if successful, will have Detective Keller arrested again, this time for malicious arrest. It appears that though a seizure was put upon their deposit at the Bank of Montreal, the Spaniards managed to withdraw their money before the papers were served.

The Cruiser Columbia. NEW YORK, June 7.—The United States cruiser Columbia, which has been laid up at the Navy yard since Decoration Day, was floated today. New plates have entirely repaired the starboard side of the vessel, which was torn in by the Foscobia, and the hull is as sound and well protected as when she was first put into commission. The ship will probably resume active service before the end of the week.

Cut in Klondike Rates. NEW YORK, June 7.—A big cut in Klondike rates was announced today by the West coast and the Nickel Plate railroads. These rates have put in force a new through second-class passenger rate of \$25 from this city to Seattle, against a previous rate of \$69 75. This is the first time the Vanderbilt roads have taken part in the Northwestern passenger rate war, which the Canadian Pacific began.

WAR REVENUE BILL.

Conferees Have Not Yet Agreed Upon a Report.

WASHINGTON, June 7.—After sitting until past midnight last night, the conferees of the two Houses in the war revenue bill resumed their sitting promptly at 10 o'clock today. When the conference adjourned at noon Senator Allison expressed the opinion that it would be able to report to the Senate and House by tomorrow. He said that excellent progress was being made, but that it was impossible, for the present, to give details of the proceedings. The House members are manifesting a disposition to accept the minor amendments, with-out cavil, and the indications now are that at least 40 per cent of the amendments will be returned without serious dispute. The more important amendments are naturally the ones upon which there is most controversy, and so far the senatorial position has proved to be the most difficult problem with which the committee has had to deal. The Republican members of the conference are naturally opposed to any provision for coining the silver in the treasury, but they realize there will be great difficulty in getting the Senate to accept a report that does not make some provision of this character. The probabilities now are that a substitute silver provision will be reported.
