FOURTH WARD CLUB.

Republicans Perfect Their Permanent Organization.

The Fourth Ward Republicans met in the Courthouse last night and effected a permanent organization by the election of the following officers for one year: President, J. M. Avery; First Vice President, Grove L. Johnson; Second Vice President, James O. Prewett; Secretary, David Falconer; Treasurer, F. L. Atkinson; Sergeant-at-Arms, Phil Claguez.

A standing committee on high jinks, consisting of George Sherman, David Barnes and Y. F. Gunn, was appointed. The club starts out with a membership of 145 old-line, stalwart Republicans, who are determined to make the solid Fourth Ward the banner ward of the city.

After the signing of the roll by the members present, Supervisor Gill told of his experiences at the first Republican meeting he ever attended, the character of the speakers and the burning questions that occupied the public mind at that time. He said that what he learned at that meeting he had never forgotten, and has been a Republican ever since.

John C. Ing, the Republican candidate for Trustee in the Fourth Ward, addressed the meeting in a neat and vigorous speech. He dwelt on questions that were likely to be considered by the Trustees in the near future, and spoke of the stand he proposed to take on taxation, water and sewerage, so that his friends and neighbors might know just where he would be found on these questions, if elected.

Vice President J. O. Prewett congratulated the club on the vim and enthusiasm shown, and had no doubt that the Fourth Ward would be sold for Republicanism and expansion. The next meeting of the club will be held on Tuesday in the Courthouse, when an Executive Committee will be named to pilot the candidates to victory.

RETURN OF HERMAN GRAU. He Visited the Water Systems of Both Kansas Cities.

Herman Grau returned yesterday from an extended trip to the East, looking well after his visit. While there he visited Buffalo, New York and other cities. He witnessed the Dewey Parade and says that no description can begin to do justice to the vastness and beauty of it.

While absent, Mr. Grau visited Kansas City, Mo., and Kansas City, Kansas, and by request made an investigation of their means and methods of water supply, and will report to the Water committee the results when he gets his data arranged. He found that the water plant at Kansas City, Mo., consisted of settling basins, covering about seven acres, into which the water of the Missouri River is pumped. That of Kansas City on the other side of the river, is a filtering plant, but it is not entirely satisfactory.
