

See Third Page for CITY NEWS, &c.

Board of Health. The reason is at hand—for that matter it has been at hand all the winter...

The Board of Health has hitherto pursued the policy of "masterly inactivity." It has allowed all sorts of epidemics to get a foothold in the city...

The art and science of civil engineering is a great thing; it has, we understand, something to do with Latin and Greek and the Commentaries of the Christian Fathers...

The excitement produced by the recent riot in New York has to a great extent subsided, and the press has spoken out its opinions...

Now we make no pretensions to engineering science, the most learned, if not the only, work which we have read upon the subject...

The habit of paying attention to the opinions which foreign nations may entertain of our laws and customs, deserves not only the contempt we feel for vanity and imbecility...

ATTAKAPAS GAZETTE.—We see that Mr. Wm. Hutchings has become joint editor and proprietor of this journal. We wish him success in his new vocation...

Mr. Daniel Duncan, of Ohio, died in Washington on the 18th inst., at half past five o'clock.

HUNKER CONVENTION.—The New York Hunker State Convention, to nominate State officers, is to assemble at Syracuse on the 5th of September next.

The New York world of fashion was set all agog on the 17th inst. by the marriage, at Grace Church, of young Mr. Curran to the daughter of one of the wealthiest citizens of Gotham.

OLD GOLD DOLLAR.—Mr. James Goodloe, of this city, says the Cincinnati Commercial, has had in his possession for twenty years a gold dollar of the coinage of 1828.

NAVIGATION BILL IN THE HOUSE OF LORDS.—The following extract from a private letter from London, comes, says the N. Y. Evening Post, from a source deserving of confidence.

The best informed people here think that the navigation bill, which passed the Commons on Monday by a majority of 61, will also pass the Lords...

We understand that Mr. George Blackman, of this city, will pass on the 15th of June, a school for both sexes, at the Pass Christian Hotel.

Fernando Bernandi has been appointed and recognized Vice Consul of Portugal for the port of Philadelphia and other parts of Pennsylvania, and States of Delaware and New Jersey.

The Crevasse.

We yesterday paid a visit to the Crevasse. The body of water passing through it is not quite so great as it was a fortnight ago, the river having fallen considerably since, and we suppose that if Mr. Grant has good luck and the river continues to fall he may close it in time...

No proper hospital for the cholera patients has yet been selected, but a large room in Anthony street is used for their temporary accommodation. This was not secured without violent opposition from the people of the neighborhood...

The art and science of civil engineering is a great thing; it has, we understand, something to do with Latin and Greek and the Commentaries of the Christian Fathers.

Another absurd case, similar to that of the ship Franklin, before the Boston police courts, was tried on the 22nd inst. before the Hon. Judge Williams...

Boyden, the counterfeit, who had the plate of the New England Bank of Providence copied by an engraver of his in Madison street, was tried, and yesterday afternoon sentenced to five years imprisonment.

From Havana. By the brig Salvador, Capt. Evans, we have received Havana papers to the 20th.

El Diario de la Marina has received dates from Honduras to the 18th, and from San Salvador to the 13th ult. The State of Guatemala is in a lamentable condition. It will be recollected that a treaty had been entered between the Government and the chiefs of the pueblos or mountaineers...

Now we make no pretensions to engineering science, the most learned, if not the only, work which we have read upon the subject, being the essay of the State Engineer, published in the Picayune, on "the law which governs fluids," and the application of that law to levees and ditches...

The habit of paying attention to the opinions which foreign nations may entertain of our laws and customs, deserves not only the contempt we feel for vanity and imbecility, but also the censure which is due for whatever distorts our ideas of the right and the wrong, of the just and the unjust.

ATTAKAPAS GAZETTE.—We see that Mr. Wm. Hutchings has become joint editor and proprietor of this journal. We wish him success in his new vocation, to which as appears from his address "To the Public," he has served an apprenticeship of ten years.

Mr. Daniel Duncan, of Ohio, died in Washington on the 18th inst., at half past five o'clock. He has been sick since the adjournment of the last Congress, of which he was a member.

HUNKER CONVENTION.—The New York Hunker State Convention, to nominate State officers, is to assemble at Syracuse on the 5th of September next. The call is somewhat lengthy, and reviews the grounds of difference between the hunkers and hunkerites, asserting that the former adhered to, and the latter deserted, "the principles and usages of the party."

The New York world of fashion was set all agog on the 17th inst. by the marriage, at Grace Church, of young Mr. Curran to the daughter of one of the wealthiest citizens of Gotham.

Correspondence of the Crescent.

Cholera and Cleansing of the Streets.—Cholera Hospital—Origin of the Epidemic—Preventive Measures—Sanitary Company—Barriers—Case in Boston—Boys—Dead.

Eds. Crescent.—The cholera in this city forms a subject of very general conversation, but no special exhibit is manifested, as the fullest confidence is placed in the energy and wisdom of the authorities who the measure are laid out with good judgment. I am sorry to say...

CITY LYRICS.

Oh! Mr. Mayor, how can you sleep When the water in rivers is nearly deep. And the mud and frogs are playing so deep. As if their dear mothers "did not know they were out."

Why did you let this big crevasse come down. To play a short visit to its friends here in town. With its "cortège" of pollwogs, fishes, and snakes: Its sister "the liver"—its brother "the snakes."

Our Aldermen, too—the most learned group That ever did justice to tortle-shell soup. Are now of the opinion, that till something is done, The flood from the river will continue to run.

With astounding munificence—they've provided for all. And by paying the boatman two times, or three. Will quick take you home—wherever it be. Our town-fathers, in their mirth and their glee.

For sometime past, a pious wish I have had: "To tie them together, and do 'nothing' at all." Than to tumble them into the dirtiest water.

There let them wallow and paddle about! And no hand be stretched forth to help them get out. Till they sink out themselves, dirty, nasty, and muddy: And crawl home to their den, and "our Engineer's" study. New Orleans, May 27, 1890. CROTCHET.

Eds. Crescent.—The various opinions which we have been reading of, and the necessity of stopping the crevasse at Mr. Saucé's plantation, and the various modes proposed for preventing such accidents for the future, are truly amusing from their absurdity. The Metairie Ridge is a natural protection for the city for all breaks in the levee...

Mode of Preventing Overflows. The various opinions which we have been reading of, and the necessity of stopping the crevasse at Mr. Saucé's plantation, and the various modes proposed for preventing such accidents for the future, are truly amusing from their absurdity.

From Madisonville. MADISONVILLE, La., May 25, 1890. Eds. Crescent.—I would permit an old subscriber and reader of your journal to accept of a short paragraph in your issue of the 25th inst. regarding the cholera epidemic in this city...
