Col. Gadsden and Gen. Sam Houston.

The Texas mail of Thursday brought us copies of a very spicy correspondence.

It was commenced by Col. Gadsden, who, as one of the Executive Committee of the Convention held in South Carolina last May, forwarded to Gen. Houston a copy of the resolutions adopted there.

which in bitterness of invective and unmediated insult could not easily be surpassed.

He tells Houston that he has been "flattering and oppressing with Benton and the other-few self-abandoners in their nefarious designs."

He hints, too, at some formidable disclosures it is in his power to make, in the following mysterious terms:

"I have reported relations which have passed at my disposal history which you cannot dispute."

"I have reported relations which have passed at my disposal history which you cannot dispute."

"I have reported relations which have passed at my disposal history which you cannot dispute."

Important from Central America.

Large papers from Nicaragua furnish the following interesting intelligence:

Mr. E. G. Squier, U. S. Charge, had arrived at Nicaragua, and been received with great consideration by the Government.

It is held in all the journals as a new era for Nicaragua, and he entered the city amid discharges of cannon, martial music, and the most tumultuous and enthusiastic rejoicings.

On being presented to the President, Mr. Squier made a long address, tendering his thanks for the warmth of his reception, and assuring him that these sentiments are fully reciprocated, and that it is the earnest desire of the Government of the United States to cultivate in every way the most cordial relations with the Republic of Nicaragua.

He assures him, further, that it shall be his aim to confirm the present harmony between the two Republics—and "to this end, and to secure the permanent welfare of both, it is essential that they should pursue a policy exclusively American."

He stated as follows: "The national principle of the policy is a total exclusion of European influence from the commerce and industry of the American Republics."

"The national principle of the policy is a total exclusion of European influence from the commerce and industry of the American Republics."
