

### FAMOUS OLD MISSIONS.

#### Pioneer Work Done by Jesuits in the Far Northwest.

To Them Belongs the Credit of Being the First White Men to Force Their Way Through the Forests of Oregon.

(Special State of Washington Letter.)

—the man or woman who's "run-down." Dr. Pierce's Golden Medical Discovery sets the wheels going. It starts the torpid liver into healthful action, purifies and enriches the blood, cleanses, repairs, and strengthens the system, and restores health and vigor. As an appetizing, restorative tonic, it sets at work all the processes of digestion and nutrition, and builds up flesh and strength.

For all scrofulous humors and blood-taints, and even Consumption (or Lung-scorful), if taken in time, it's a positive remedy.

Unlike the sarsaparilla, which claim to be good for the blood in March, April, and May, "Golden Medical Discovery" works equally well at all seasons.

Unlike other blood-purifiers, too, it's guaranteed to benefit or cure, in every case, or your money is returned.

On these terms, it's the cheapest. You pay only for the good you get. But it's the best—or it couldn't be sold so.

Before the cause of consumption was known (that was only a few years ago) we did not know how Scott's Emulsion of cod-liver oil did so much good in consumption and in the conditions that lead to consumption.

The explanation is interesting. We send it free in a book on CAREFUL LIVING.

SCOTT & BOWNE, Chemists, 132 South 5th St. New York.

Your druggist keeps Scott's Emulsion of cod-liver oil—all druggists everywhere do. \$4.

AN ASTONISHING TONIC FOR WOMEN.

**MCKENZIE'S WINE OF CARDUI**

It Strengthens the Weak, Quiets the Nerves, Relieves Monthly Suffering and Cures FEMALE DISEASES. ASK YOUR DRUGGIST ABOUT IT. 50 CENTS PER BOTTLE. CHATTANOOGA MED. CO., Chattanooga, Tenn.

**DR. HARTNER'S**

THE ONLY TRUE IRON TONIC

Will purify BLOOD, regulate KIDNEYS, remove LIVER impurities, build up strength, restore appetite, restore health and vitality, cure all ailments, strengthen the system, and give you a new lease on life.

DR. HARTNER MEDICAL CO., St. Louis, Mo.

MADE BY THE **DUTCH PROCESS**

**COCOA'S**

is "Treated with Carbonate of Soda, Magnesia, Potash or Bicarbonate of Soda."

The use of chemicals can be readily detected by the peculiar odor soon perceptible on opening the package, and also from a glass of water in which a small quantity of chemically treated cocoa has been placed and allowed to remain for several days.

For more than One Hundred Years the House of Walter Baker & Co. have made their Cocoa Preparations a HOUSEHOLD NAME, using NO Patent Process, Alkali, or Dye.

**W. BAKER & CO., DORCHESTER, MASS.**

Prepared by 50 Years' Use a SURE REMEDY for Typhoid and Lungs, Bronchitis, Scrofula and Consumption. Brought to the attention of the public by J. C. BAKER & CO., 115 West 11th St., St. Louis, Mo.

**BAKER'S EMULSION**

In which there is no alcohol. It is Perfect.

**SALVATION OIL**

Wanted: Sole Agents for the State of Missouri. The address of all interested parties is given on the inside of the wrapper.

The searcher after the annals of true heroism and romance cannot fail to be well rewarded by visiting the old missions which dot the northwest. He can scarcely find a single one, however humble, the history of which does not hide many a pathetic story of frontier heroism and self-sacrifice, beside which the fancies of idealizing romancers are tame, weak and flaccid. Although the great Pathfinder came short of receiving the gratitude which he fairly earned from his fellows, there can be no doubt, in the mind of the candid investigator, that to the zealous Jesuit missionaries belongs the fame which the popular notion credits to Fremont, of being the first white man to force their way over the mountains and through the forests of Oregon and plant the standard of civilization among the savages of what are now our most northwesterly states. Men of every faith and creed must unite in doing honor to the daring spirits of the early Jesuits, who counted their lives as nothing and the severest sufferings and privations as gain, for the sake of carrying their gospel to the stolid Indian fathers at the mission, who contrived to reach Wilson, and spirit him away to the mission, just before the angry prospectors were about to string him up to the nearest tree. As a token of his gratitude in later years he presented the De Smet mission with the beautiful silver lamp which still ornaments its sanctuary. The same roof has furnished hospitable shelter for both Gen. Sherman and Gen. Sheridan and their cavalry, and within those walls Col. Wright dictated his famous treaty of peace with the subdued Indians of the Cœur d'Alene, Spokane and Palouse countries. It is also said that every governor of the territory and state has been a pilgrim to this shrine. However that may be, it is certain that the old mission has played no small part in the civic, military and scholastic history of the state, and is held in respect and reverence alike by Protestant and Catholic.

OLD ST. PAUL'S MISSION AT KETTLE FALLS.

who had not yet become familiar with even the face of the white trapper and trader. Even the inception of their labors in this wilderness has a strange and pathetic history. Popular tradition has it that a fugitive Iroquois, who had heard the gospel story of the missionaries in their eastern home, represented to the Cœur d'Alene Indians. So deeply were the latter stirred by this strange, new message that, early in the thirties, they dispatched a little band to undertake the long journey to St. Louis, and ask that a missionary be sent to instruct them. The country between their Montana home and St. Louis was full of hostile tribes. The tribe waited many months for the return of its "braves." They did not come. Again the chiefs dispatched another band. Months came and went and brought no tidings of them or of the missionaries for whom they were sent. Then the third posse was dispatched and one of the number at last succeeded in reaching St. Louis, and delivered his message, in response to which Father De Smet was returned with the messenger, reaching the Cœur d'Alene in 1839.

One of the oldest and most interesting missions in the present state of Washington is the old St. Paul mission at Kettle Falls. The place was first visited by Father De Smet in 1843; but the mission was not established until about two years later, when the quaint old log church shown in our sketch was erected. This was the nucleus of a little settlement consisting at first of a Hudson Bay Fur Company trading post and a small school. The mission soon added a schoolhouse, a grist mill and a saw-mill, and still later two churches. To give more than a hint of the trials of the persistent priests, who endured the keenest privations to plant and maintain their little post, and then practiced infinite patience in piercing the stolid darkness of the Colville Indian's mind with the first rays of intelligence and decency, would be tedious. But a glance at the wonderful beauty and grandeur of the natural scenery in which generations of the Indians of the Colville country have been reared, and a casual knowledge of the persistent depravity of these aborigines.

Although, in its long, winding course, the Columbia river shows many views more magnificent than at Kettle Falls, there the scene is one of striking beauty; the crescent group of falls pouring their clear waters in a common caudron, the little village, with its old mission buildings and new manufacturing, clustered about, and the great dark fir forests in the background.

It is about "The Old Mission," as it is commonly called, that perhaps the greatest number of interesting legends and associations cluster. Not only is the mission building itself more pretentious and permanent than other mission structures, but its location is a considerable foot hill of a side spur of the Bitter Root range, and overlooks a pleasing stretch of prairie. The Church of the Sacred Heart, the most imposing of the buildings, is a mixture of classic antiquity and pioneer razziness. That it should partake at all of the latter quality was no fault of the designer, Father Beville, who was fresh from the Imperial city, where he was ordained. The heavy pillars which are ornamented the north front give a massive and almost ancient appearance to the building. The mission was first located on the St. Joe river, in 1844, but was removed to its present situation two years later. The church, however, was not completed until ten years subsequent to the latter date.

The friendly walls of the old mission have sheltered many a weary and grateful pilgrim, and have been a veritable city of refuge to more than one hard-pressed pioneer in moments of peculiar peril. A typical instance of this kind was the rescue of a mirer named Wilson in the sixties. He had organized a mining party in the 'sixties, and

### THE FARMING WORLD.

#### SHOP AND TOOL HOUSE.

No Well-Regulated Farm should be Without a Shop and Tool House.

FIG. 1.—WEST END ELEVATION OF SHOP AND TOOL HOUSE.

This building, plans for which were furnished to the Ohio Farmer by Mr. C. Lupton, consists of the main building 32x12 feet, 13 feet to square above sills, with a lean-to or shed, 32x10 feet, along one side. This shed can be omitted (in case it is not needed) without in any way spoiling the main part. The whole side of the tool-room next to the shed could then be sided up and the doors at east end used for taking implements in and out.

Explanation of ground plan, Fig. 2: For convenience in description, the points of the compass are given (the building, however, can be set to suit any location), the main building to the north, standing end east and west shop is to be the west end, 16x12, with good matched floor; 8 feet story; 2 windows, in north and west side, will give plenty of light, door 3 feet wide in southwest corner, for ordinary purposes. Double doors to east between shop and tool-room, 9 feet wide (4 1/2 feet each), to be used in making implements—saws, harrows, and the like—in and out for repair, etc.

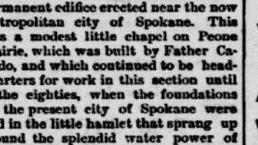

FIG. 2.—Ground plan, S, shop, 12x12; 8 feet ceiling, T, tool-room, 12x12. D, driveway, 10x20. E, open side, no load and unload tools, etc., W, windows.

giving a 7-foot story if floored (6 more, with dirt floor). This is to allow more room above in the opening next to shed (3 feet under eaves of main building) for loading and unloading tools from wagon. The shed or lean-to is 32x10 feet, on south side of main building, with double doors at each end, and two windows on south side, for the storage of drills, binders, mowers, wagons and the like. This is to have dirt floor, with beams overhead in the west half (opposite shop) for the storage of ladders and light lumber. A stairway, 30 inches wide, leading from shop to tool room loft, gives easy access to the upper story.

The shop loft is 12x16 feet, 4 feet to square, with collar beams across rafters, floored with matched flooring, one window in west end, door in east end next to tool room loft. This room can be used for storing wool and many other things that are wanted under lock and key.

FIG. 3.—Shop loft, 12x16; 4 feet from square to floor, 30 inches wide, leading from shop to tool room loft, gives easy access to the upper story.

The shop loft is 12x16 feet, 4 feet to square, with collar beams across rafters, floored with matched flooring, one window in west end, door in east end next to tool room loft. This room can be used for storing wool and many other things that are wanted under lock and key.

Tool room loft is 12x16 ft., 5 ft. to square; collar beams on rafters; matched floor; window in east end. This room to be used for storing small tools, hoes, shovels, rakes, picks, grain cradles, etc. The south side of this

### SOME REFLECTIONS.

Scraps of Philosophy by a Man Who Has Had Experience.

When a man is too busy to talk around a mud-hole he should not be commended for bravery in walking through it.

If you wish to scold your husband, or wife, as the case may be, procure cold water and heat it before using it.

To brood over the past is to mispend the present, and to jeopardize the future.

Unlucky is the man whose bread is buttered on both sides.

Beware of excessive concealment that provokes malicious guessing.

Vulgar wealth is a repellent thing, but it is entitled to the forbearance, at least, of vulgar poverty.

### THE SICK ROOM.

#### Some Suggestions Concerning Its Temperature and Ventilation.

Physicians tell us the proper temperature of a sick room should be from sixty-five to seventy degrees Fahrenheit, and the heat should not go below or much above these points. Abundance of fresh air and sunshine is the rule in all cases, except where the order of the physician prohibits the light.

FIG. 1.—WEST END ELEVATION OF SHOP AND TOOL HOUSE.

It is far more dangerous of the patient becoming enervated by close, foul air than there is from ventilation. English physicians insist that an open fire is a necessity to the proper ventilation of a sick room, and an eminent authority on this subject says: "I do not consider any room suitable for a patient to occupy during a prolonged illness where there is not an open fire burning on the hearth, in order to secure proper ventilation."

A light stove or furnace register will not serve any such purpose. On the contrary, the stove throws out a dry heat which can only be partly counteracted by keeping boiling water on the stove. It does not solve in any way the problem of ventilation.

The furnace register too often brings up a current of foul air from the cellar or the kitchen, into which the cold air has opened. Unfortunately it is quite the exception to have the cold air box open outdoors, as it should. Even when it so opens, the furnace register does not assist materially in ventilating the room. One of the best methods of removing odors is to take a shovel of burning coals, sprinkle it with coffee and pass it around the room. Where there is infectious disease, deodorizing solution should be obtained from the physician and used in the water in which the utensils of the room, the bedding and clothing of the patient are washed.—Scientific American.

### HE DIDN'T SCARE.

The Young Man Tried To Be Feary, But Failed Miserably.

A young man who is now well established in his profession told a reporter a story of an experience he had when a student in a Chicago medical college. In his college there was an irascible old janitor upon whom the young medics were always playing tricks. In the basement of the college were two "pickling vats," and one day the boys decided that one of their number should slip down and conceal himself between the tanks, and when the janitor made his tour of that portion of the building to appear before the old man wrapped in a sheet. In due course the sheet and the janitor yet in an appearance, making his final round of inspection of the building for the night.

As the janitor approached the tanks the young man came out from his hiding place and said in a sepulchral voice, "I want to get out of here." The janitor was unnerfed for an instant only; then, taking in the true situation, he seized the student by the nape of the neck and around the waist, and saying, "You will not get out of here, go back where you belong," lifted him up and threw him bodily into one of the vats, which contained several subjects.

The young man was extricated from his horrible position by his companions, who was close at hand to enjoy the janitor's scare, but it was several weeks before he could forget his experience sufficiently to enjoy his meals.—Washington Post.

### STATE OF OHIO, CITY OF TOLEDO, LUCAS COUNTY.

FRANK J. CHERRY makes oath that he is the senior partner of the firm of F. J. CHERRY & CO., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay to each of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1888. W. G. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free. F. J. CHERRY & CO., Toledo, O.

There is always a bad of welcome ready to be offered to the strange umbrella.—Pittsburgh Press.

The Only One Ever Printed—Can You Find the Word?

There is a 3 cent advertisement in this paper, this week, which has no two words alike except one word. The same is true of each new one appearing each week, from the Dr. Hartner Medical Co. This word places a "Crescent" on everything they make and publish. Look for it, send them the name of the word and they will return you book, valuable lithographs or samples free.

The man who can sign a large check has written that he is universally respected.—Washington Star.

Best of All To cleanse the system in a gentle and truly beneficial manner, when the Spring comes, use the true and perfect remedy, Syrup of Figs. One bottle will answer for all the family and costs only 50 cents; the large size, 75 cents. It is pleasant. Manufactured by the California Fig Syrup Co. only.

Minnons are for the indolent; they encourage idle reflections.

ART STUDIO.

The Tolonia gallery has been bought by the Italian government to form the nucleus of a national gallery in Rome.

The Associates Guild is a society in Paris, for the purpose of making a home for English-speaking girls in the art schools of Paris.

A LIFE-SIZE bust of Cardinal Gibbons is being modeled by Samuel Kitson, the Boston sculptor. When the marble is finished it will be sent to the Catholic university in Washington.

The French artists are making so much money in portrait painting that the exhibitions now show a disproportionately great number of portraits. Eight thousand dollars for a full-length picture is said to be about the top price.

**RISE SUN STOVE POLISH**

It is a timely and attractive issue of the favorite magazine, The Frontiersman, illustrating Miss Brewster's characteristic story of "A March Mood," capably written, and there are March pictures and poems suitable to the season. Mrs. Harriet Maxwell-Converse concludes her entertaining chapters on Iroquois life with a spirited account of the Indian children's "Fire-fly Song." Lieut. Col. Thorndike contributes to his series of "One Man's Adventures," an account of his startling experiences. "An War Correspondent," the serial stories, "Jack Brewster's Three Months' Service," by Maria McIntosh Cox, and "The Lanes of Kanana," by the entertaining storyteller who conceals his identity under the Arabic "Abd el Ardavan." The poetry is from such verse-makers as Herbert D. Ward, Elsie Kendall, Clara Doty Bates and others. The Men and Things department is full of entertaining things worth remembering.

**"August Flower"**

"I am ready to testify under oath that if it had not been for August Flower I should have died before this. Eight years ago I was taken sick, and suffered as no one but a dyspeptic can. I employed three of our best doctors and received no benefit. They told me that I had heart, kidney, and liver trouble. Everything I ate distressed me so that I had to throw it up. August Flower cured me. There is no medicine equal to it." LORENZO F. SLEEKER, Appleton, Maine.
