

A Positive CATARRH CURE

Ely's Cream Balm

It cleanses, soothes, heals and protects the diseased membrane. It cures Catarrh and drives away a Cold in the Head quickly. Restores the Senses of Taste and Smell. Full size 50 cts., at Drug-gists or by mail; Trial Size 10 cts. by mail. Ely Brothers, 66 Warren Street, New York.

READERS of this paper desiring to buy any of the columns should insist upon having what they pay for, refusing all substitutes or imitations.

HICKS' CAPUDINE CURES ALL ACHES

And Nervousness

Put Down "EDUCATION" IDEA.

Farmers' Plea Had Weight Among Brother Agriculturists.

In the early forties, on a certain "town meeting" day in one of the small farming communities of the Granite State, there was more than the usual interest and excitement. Some audacious Philistine had secured the insertion in the warrant an article "To see if the town will appropriate \$500 for a new schoolhouse."

The sturdy yeomanry were out in force to fight down this proposition. The sympathetic moderator didn't "moderate" them worth a cent. The so-called "toneys" advocates, conscious from the start of their numerical weakness, were conciliatory and persuasive, in the hope of thus winning their standard sufficient of the opposition to carry the day. These hopes were dashed, however, when a veteran farmer, the Nestor of the guild, got the floor, and shouted in foghorn tones:

"What do you want of skulehouses, anyway? This education talk is raisin' the old Harry with the boys on the farm! There's that Danny Webster—a likely a young man's 'ever raised in these 'ere parts! Got this education idea into his head—left the farm—never's heard of afterward!"

This was a settler. The "toneys" fled the scene, and the "noes" had it.

BIRD TRAVELS WITH GIRAFFE

Red Billed Weaver Constant Companion of Animal Sky-scraiper.

The red-billed weaver bird is a constant companion of the giraffe, perching itself upon the withers and flying along when its host takes to flight, and immediately alighting again on its back at the first opportunity. The only means of defense or offense by the giraffe is by means of its hoofs, and the blows it can deliver by kicking are of tremendous power. The old males during the breeding season fight in this manner a good deal, and the female employs the same means in defending her young against carnivorous animals.

Giraffes are very swift of foot, and it requires a very fleet horse to run them down. Experienced hunters, however, charge them at full speed, and by this means are often able to run into them, and if the giraffe are fat they will soon become "blown." When running, the tall is twisted in a corkscrew fashion over the back and the hind legs at each step are thrown on the outside of the forelegs, giving a very grotesque straddling appearance. The giraffe is mute, but he has a very keen sense of hearing and of smell.

To Utilize Power of Tides.

A group of several engineers and artists, headed by William O. Weber, of Boston, believe they have revolutionized the industrial system by a new device utilizing the power of the tides so as to manufacture compressed air. A plant is about to be erected at South Thomaston, Me., to demonstrate the value of this invention.

NO MEDICINE.

But Change of Food Gave Final Relief.

Most diseases start in the alimentary canal—stomach and bowels. A great deal of our stomach and bowel troubles come from eating too much starchy and greasy food.

The stomach does not digest any of the starchy food we eat—white bread, pastry, potatoes, oats, etc.—these things are digested in the small intestines, and if we eat too much, as most of us do, the organs that should digest this kind of food are overcome by excess of work, so that fermentation, indigestion, and a long train of ills result.

Too much fat also is hard to digest, and this is changed into acids, sour stomach, belching gas, and a bloaty, heavy feeling.

In these conditions a change from indigestible foods to Grape-Nuts will work wonders in not only relieving the distress but in building up a strong digestion, clear brain and steady nerves. A Wash woman writes:

"About five years ago I suffered with bad stomach—dyspepsia, indigestion, constipation—caused, I know now, from eating starchy and greasy food. I doctored for two years without any benefit. The doctor told me there was no cure for me. I could not eat anything without suffering severe pain in my back and sides, and I became discouraged."

"A friend recommended Grape-Nuts and I began to use it. In less than two weeks I began to feel better, and inside of two months I was a well woman and have been ever since."

"I can eat anything I wish with pleasure. We eat Grape-Nuts and cream for breakfast, and are very fond of it." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in 10 pgs. "There's a reason."

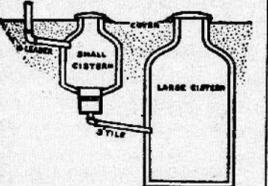

ROAD AND FARM IMPROVEMENT

CISTERN FOR DRINKING WATER.

Arrangement by Which Filtered Water Can Be Obtained.

In digging a cistern, dig it deep and arch well under ground, closing in the arch to receive a two-foot tile to form the neck, which can easily be closed tight against toads and insects. By the side of the big cistern, dig a little filtering cistern, as shown in cut, that will hold from ten to 15 barrels. Wall, arch and cement the same as large cistern, except that in the center of the bottom, which should be slightly basin shaped, dig and cement a hole large enough and deep enough to receive a bucket that will hold five or six gallons.

Have bottom of bucket perforated with small holes and fasten a strong

Plan of Large and Small Cisterns.

bale to bucket by which to lift it out. Have a strong flange turned close to the top of the bucket to rest tight on the bottom of filtering cistern round top of hole. You can make it water-tight by resting flange on packing. If bucket is not good and strong, place a rest under the bottom, as there will be a heavy pressure when filtering cistern is full. From the bottom of the hole under bucket connect filter with cistern with a three-inch sewer tile thoroughly cemented in.

The advantages in this method are that the filtering material can be packed in bucket close enough to permit the water to filter through very slowly. The filtering cistern being but one-third the depth of the cistern proper, any time the water is below the tube connecting filter with cistern, the bucket of filtering material can be lifted out and material removed. By closing the tile leading to cistern, so that water will not run through, one can go into the filtering cistern and wash it thoroughly without disturbing the water in cistern. By filling the bucket with pounded brick, charcoal and slate packed in clean washed sand, the water will filter through very slowly. After packing the bucket and before setting it in the hole, run water through to wash all sediment out.

A DITCH CLEANER.

Good Thing to Use in Connection With Road Scraper.

In connection with the road scraper a ditch cleaner is used to pass the earth from the side ditches up the grade far enough for the road scraper to reach it. The ditch cleaner is made something after the fashion of a snow plough, but the left-hand side is made shorter and the side is made vertical, so that in practice this per-

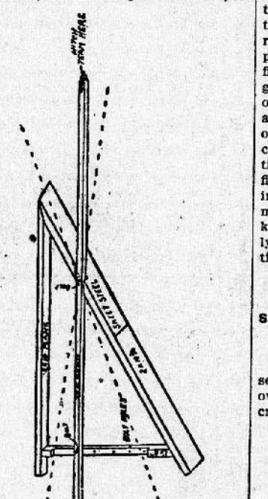

Diagram of the Ditch Cleaner.

pendicular side acts like a landslide. The other side is beveled something like a ploughshare and is faced with steel. This side, says the Montreal Herald, is made longer than the other and it is this side that shoves the earth out of the ditch. The hitch is not at the point like a snow plough, but about ten inches to the right of the point, as shown in the illustration, which is adjustable.

HANDLING THE ICE CROP.

Keep the points sharp on the ice tools.

An old crosscut saw makes a good ice saw.

Spread a good layer of sawdust over the bottom of the ice house.

Felt boots with good rubber articles are the best footwear to use on the ice.

Wear an apron made of a grain sack and put on a dry one as often as it gets wet.

While the block of ice freeze solid while it is being put into the house, if possible.

It's no fun to handle heavy ice, therefore plan to gather it before it gets too thick.

Two strong men with short handled tongs will load ice quicker and better than any derrick device.

Ice keeps best when the blocks are 14 to 16 inches thick, but blocks six to eight inches thick will do it well packed.

Mittens made from a pair of old woollen trousers beat leather gloves or mittens for handling ice. They dry soft and without shrinking, when wet.

—Farm and Home.

OUR COMMON ROADS.

They Should Not Be Neglected While Waiting for Hard Roads.

In the excitement of the good roads commotions there is danger that farmers will let our common roads go without much work being done on them and wait for the public improvement. Farmers now by neglect of the roads and the principles of elementary road making are paying an enormous tax; the very great cost of drawing loads over poor roads. The first principle of good road making is, keep the water off from the road, and the second is, get the water off from the road.

Go over the road as soon as the snow is off and see how often these rules are violated. Often the water runs from the ditch into the road and then runs for roads, washing the material out, ruining all that was done the previous year and making the road nearly impassable. Yet, says the Farm and Home, by only a few minutes' work the road might be saved and the water turned out. Every supervisor or roadmaster ought to go over the road late in the fall and turn the water off. On the hills and at foot of hills, and elsewhere when necessary, add open ditches.

At the Ohio state farmers' institute, D. W. King of Indiana, gave a method of making and improving roads. Mr. King lives in northern Indiana, in the "Gumbo" region, where the earth is black and very sticky. The result is a very good road at small cost. He uses a split log drag. Hitch with chain on rod so that all surplus dirt will be carried to center of road. The hitch is one of the most important features.

Usually use the flat side forward, but when smoothing or packing the dirt, use rounding side forward. Go over the road as soon as it thaws and smooth down all dirt carried to the center. Repeat the dragging after each rain as soon as the surface is dry enough to work. It is not necessary to wait till the ground is all thawed out. Begin as soon as there is an inch thawed. This will give the water a chance to run off; water running in the road is one of the worst things for the road. Following it up after each rain will turn the water, distribute the travel over the road, avoid and prevent ruts, and keep the road good.

To make the plan most available, each farmer should have such a drag, and each one drag from his house to the next house, thus each doing the work at a very small cost. A road worked in this way will keep good all summer and fall. Less than a week's rain will hardly affect it. In spring the road is in good condition much sooner than on other roads not treated.

OIL UPON DUSTY ROADWAYS.

Way of Treating Roads in Liverpool Proves Satisfactory.

The English cast oil on the troubled roads. Dust raising is a nuisance of such magnitude that various civic and official anti-dust experiments have been made. Quite satisfactory results have been secured in Liverpool through the use of oil sprinkled upon macadam roads. The surface appearing the cleanest and whitest appearance was that coated with crocus oil mixed with resin, while that covered with creosote mixed with tallow had the least odor. The Texas crude petroleum gave the most lasting results. After giving the wear and tear of the road appears to be less, says the Chicago Tribune. The surface of the road dries more quickly after rains, and the number of loose stones picked up has been reduced. The first sprinkling kept the surface in good order for three weeks, at the end of which time it was thought advisable to recover the area. The effects of the oil on the surface after a second coating had been applied had not entirely disappeared after the lapse of five weeks. Oiling wood pavements in Liverpool was done in the same manner and the dust satisfactorily kept kept down, a result not previously obtained even by watering four times a day.

STILE OVER WIRE FENCE.

Saves Clothing and Trouble in Crossing Fields.

A correspondent of Prairie Farmer sends a sketch of a stile that he uses over a wire fence which he has to cross occasionally, but does not wish

Stile for the Wire Fence.

to cut for a gate. The fence is four and a half feet high. The side pieces to the stairs are seven feet long, slightly imbedded in the ground. The steps are put in and a hand support built up one side.

Stile for the Wire Fence.

Caring for the Ice Pond. When winter thaws and heavy rains after freezing weather wash sand and trash onto the ice in the pond it will be spoiled unless attended to at once. Drain off extra water over the dam by cutting holes in the ice. Scrape off the dirt with a hoe and shovel or it will make the ice porous. In late fall or early winter the ice pond should be drained, the weeds and trash on the banks cut and the pond then refilled with clear water. This will prevent the ice being filled with grass and sticks which hasten its melting. Absolutely pure ice keeps much longer than that containing sticks and trash.

Larger Herds.

The urgent need of the dairy interests are larger herds, better care and feed, utmost cleanliness and application of practical business methods.—Prof. C. D. Smith, Mich. Agricultural College.

Sympathy Not Needed.

Dr. Fridtjof Nansen, Norway's famous arctic explorer, now minister to Great Britain, makes light of the sympathy expressed by many persons among the "hardships" of travelers. He says: "There never was such misery as a man who has lived in the wilds. Most men who travel in out-of-the-way parts of the world do so because they like it. People who live in the center of what is called civilization do not understand, cannot realize, the spell that getting close to nature, battling with nature, has on the heart." He does not believe in the use of alcoholic beverages, holding that while liquor will raise the temperature for a few minutes, after that it falls lower than before.

TERRIBLE ITCHING SCALP.

Eczema Broke Out Also on Hands and Limbs—An Old Soldier Declares: "Cuticura is a Blessing."

"At all times and to all people I am willing to testify to the merits of Cuticura. It saved me from worse than the tortures of hades, about the year 1906, with itching on my scalp and temples, and afterwards it commenced to break out on my hands. Then it broke out on my limbs. I then went to a surgeon whose treatment did me no good, but rather aggravated the disease. I then told him I would go and see a physician in Erie. The reply was that I could go anywhere, but a case of eczema like mine could not be cured; that I was too old (80). I went to an eminent doctor in the city of Erie and treated with him for six months, with like results. I had read of the Cuticura Remedies, and so I sent for the Cuticura Soap, Ointment and Resolvent, and continued taking the Resolvent until I had taken six bottles, stopping it to take the Pills. I was now getting better. I took two baths a day and at night I left the lather of the Soap dry on my head, and washed it with great effect after washing it warm water, to stop the itching at once. I am now cured. The Cuticura treatment is a blessing, and should be used by every one who has itching of the skin. I can't say any more and thank God that He has given the world such a curative. Wm. H. Gray, 3303 Mount Vernon St., Philadelphia, Pa., August 2, 1905."

A Misunderstanding.

Apropos of a misunderstanding on the canteen question, Gen. Frederick D. Grant said at a dinner in Washington:

"It is like the case of my friend Maj. Green. Maj. Green said to me servant one morning:

"James, I have left my mess boots out. I want them soled."

"Yes sir," the servant answered.

"The major, dressing for dinner that night, said again:

"I suppose, James, that you did as I told you about those boots?"

"James laid 95 cents on the bureau."

"Yes, sir," said he, "and this is all I could get for them; though the corporal who bought 'em said he'd have given half a dollar if pay day hadn't been so far off."

Missed Chance for Fame.

The astronomer, Lalande, narrowly escaped being made famous by a discovery. He accidentally struck Neptune with his glass on May 8, 1785, but supposed it was a star. He put it down in his notebook as a star and recorded its exact situation. Two days later he struck it once more and made a record of it. But when he looked over his notes he found he had it down as being in two different places, and as a star cannot move in 48 hours he supposed he had made a mistake in one of his notes. If he had used his mind a little less mechanically he easily might have been a Columbus.

Rich Prize for Scientists.

The person who discovers a method of communication between planets will receive \$20,000 from the French Academy of Science.

Followed Adam's Example.

"My wife taught me," said Charles Caffiere recently, confessing to robbing Denver stores of Oriental rugs.

DOES YOUR BACK ACHE?

Profit by the Experience of One Who Has Found Relief.

James R. Keeler, retired farmer, of Fenner street, Casenovia, N. Y., says: "About fifteen years ago I suffered with my back and kidneys. I doctored and used many remedies without getting relief. Beginning with Doan's Kidney Pills, I found relief from the first box, and two boxes restored me to good, sound condition. My wife and many of my friends have used Doan's Kidney Pills with good results and I can earnestly recommend them."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

God has many names, though he is only one being.—Aristotle.

Museum Gets Fine Pulpit.

King Friedrich August of Saxony has given to the Germanic museum at Harvard a full-size reproduction of the sandstone pulpit of the Church of Wechsburg, near Leipzig. This gift is regarded as the most important made to the museum since the fine collection of casts was sent by the German emperor. The pulpit belongs to the beginning of the thirteenth century, and is a massive structure, 15 feet high, resting on Romanesque columns.

FRANK J. CHERNEY makes oath that he is senior partner of the firm of F. J. CHERNEY & Co., doing business in the City of Toledo, County and State of Ohio, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CATARRH that cannot be cured by the use of DODD'S KIDNEY PILLS.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D., 1905.

FRANK J. CHERNEY, A. W. GLEASON, Notary Public, Toledo, O.

Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for sample bottle free. F. J. CHERNEY & Co., Toledo, O. Sold by all Druggists. Take Hall's Family Pills for constipation.

When a man thinks he knows it all he is seldom able to get his neighbors to endorse his thoughts.

You Lack Prematurely Old

Because of the early, gray hairs. Use "LA CROIX" HAIR RESTORE. Price, 61.00.

Mrs. Winslow's Soothing Syrup.

For children teething, soothes the gum, reduces inflammation, always relieves, cures colic. 50c a bottle.

Success is often a hundred-to-one shot that the talent overlooks.

All Cloth Hats, Children's Dresses, etc., made to look like new with PUTNAM FADELESS DYES.

A woman's idea of a perfect gentleman is any man who agrees with her.

FITS, St. Vitus Dance and all Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. Sent for Free \$2.00 trial bottle and treatise, Dr. R. H. Kline, Ld., 631 Arch St., Philadelphia, Pa.

Costly Water Supply.

New York city burns 110,000 tons of coal a year to pump water into the public reservoirs in Brooklyn, Queens and Richmond boroughs.

National Pure Food and Drugs Act.

The Garfield Tea Company's preparations comply in every respect with the requirements of The National Pure Food and Drugs Act, June 30th, 1906. Serial No. 384, assigned by the Government, will appear on every package of their goods.

Thinks Clergy Are Losing Ground.

Mr. Charles Booth, the great social scientist, in his volume on "Religion in London" is convinced that the clergy are losing ground by becoming servers of tables and organizers of charity instead of spiritual guides to their flocks.

Only Two Weeks to Christmas.

There is still time to send to Lord & Taylor, Broadway, 5th avenue and 20th street, New York, for a copy of their catalogue, and from over 500 articles shown, select some remembrance for the one you have in mind. Don't imagine that it costs more to purchase your gifts from a house of the high standing of Lord & Taylor, because it doesn't; in fact, it's the most economical method not only in money saved, but in the satisfaction which comes from buying your goods from a firm whose reputation is second to none in the country.

Tea on the Down Grade.

Tea drinkers are finding scant encouragement in a report recently made by a large tea exporting house in Yokohama to its American customers. Incidentally it indicates that the United States is not alone in facing increased cost of living. The report says: "Owing to the rapidly increasing cost of living in Japan labor costs more, and in consequence cultivation of the tea gardens is less generous and extensive than formerly, and less care and skill are expended in picking and curing the leaf. Hence the average quality of the teas now offered for sale is below that of seasons prior to the war, and for the same reasons we are not likely in the future to see any reversion to the excellence of former years."—New York Sun.

India's Railroad Industry.

One of the main schemes of the railway board is to have rolling stock built up partly in India, which will give manufacturing firms in this country an opportunity for tenders for the construction of wagon frames and bodies. The experiment will also be extended to state lines, tenders being received up to 25 per cent. part in India, which will give the total number of wagons sanctioned for construction yearly, while axes, wheels, etc., will be obtained by each railway administration on indent from home and be supplied to contracting firms.—Indian World.

If a man has a marble quarry he asks: What can I do with marble? He builds, he seeks other builders. The possession of a power, like the possession of an estate, impels to use, to gain, to service.

Woods at Eight Dollars a Pound. "French walnut is the finest wood we have," said the cabinet-maker. "It comes from Persia, but it is prepared in France. I have seen French walnut worth \$3 a pound, and it is a common thing to pay \$2 a pound for it. Of course it is used principally for veneering. Only millionaires could have chairs and tables of solid French walnut."

"Mahogany, wonderful as it is, rarely fetches such high prices. From \$3 to \$4 is a very good price per pound for this wood."

"Ebony, if it is in a particularly large piece, so that it will cut well, will often bring \$5 a pound in the wood market."

Worth Knowing.

That Alcock's Plasters are the highest result of medical science and skill, and in ingredients and method have never been equaled.

That they are the original and genuine porous plasters upon whose reputation imitators trade.

That Alcock's Plasters never fail to perform their remedial work quickly and effectually.

That for Weak Back, Rheumatism, Colds, Lung Trouble, Strains and all Local Pains they are invaluable.

That when you buy Alcock's Plasters you obtain the best plasters made.
