

What is Pe-ru-na.

Are you claiming too much for Peruna when we claim it to be an effective remedy for chronic catarrh? Have you abundant proof that Peruna is in reality such a cathartic remedy? Let us see what the United States Dispensary says of the principal ingredients of Peruna.

Take, for instance, the ingredient hydrastis canadensis, or golden seal. The United States Dispensary says of this herbal remedy, that it is largely employed in the treatment of depraved mucous membranes lining various organs of the human body.

Another ingredient of Peruna, cordalis formosa, is classed in the United States Dispensary as a tonic.

Cedron seeds is another ingredient of Peruna. The United States Dispensary says of the action of cedron that it is used as a bitter tonic and in the treatment of dysentery, and in intermittent diseases as a substitute for quinine.

Send us for a free book of testimonials of what the people think of Peruna as a cathartic remedy. The best evidence is the testimony of those who have tried it.

USED CHURCH AS SCHOOLROOM.

Proceedings That Somewhat Astonished the Sexton.

The sexton of one church that keeps open doors all day long didn't know whether to regard the matter in the light of a desecration or a devotional exercise. He paid no attention when the three women, watched by a man who stood at the lower end of the aisle, walked the length of the church and back again. Even when they made the trip a second time he scarcely gave them a thought, but when the trio started around the church a third time and the man called out, "Step a little more briskly, please," he began to wonder, and presently made inquiry.

"I hope you won't be offended," the man replied. "I am a physical culture instructor. I am teaching these young ladies to walk. I have already taught them to walk in the street, in the drawing room, in the theater and every place else they are likely to find themselves. I am now teaching them to walk in church. Very few women can walk there properly. Some pose, some swagger, some skip, others adopt a mincing gait. All these styles are very inappropriate for church. A dignified, subdued gait alone is suitable for devotional purposes. Church is the best place for pupils in walking to receive practical instruction, therefore I have brought them here."

"Great fathers!" gasped the sexton. "What next?"

But he said no more till the walking exercise was ended. Then he followed the class to the door.

"I hope," he said, "you will practice the lesson learned to-day by coming here to church once in a while."

OCULIST A MAN OF RESOURCE.

Has a Blind Beggar Woman to Advertise His Business.

Enterprise takes various forms, even in Warsaw. A young oculist, finding that patients were few and far between, hit upon an original means of advertising.

He engaged a blind woman who sits and begs by the Church of the Holy Cross to hold a light board whereon are written his name, address, professional qualifications and consultation hours.

As the church is in the busiest thoroughfare of the town the notice attracts a good deal of attention. The beggar herself says she is quite satisfied with the results, as many people notice her who would otherwise pass by, and as the doctor has added his assurance that she is hopelessly blind benevolent old ladies throw coppers into her tin, and that their money is not wasted on an impostor. It is not yet known whether the number of patients has increased.

TUNES FAIL TO KILL; MAY BUY.

Aged Flute Player Makes Sure by Trying Score of Pieces.

A little old man entered a large music shop and asked the assistant to show him a book of flute music.

"Here, sir, is a very fine selection," said the assistant, "and cheap at half a dollar, seeing that it contains no fewer than 50 airs."

The old man took the book, opened it, and laid it on a shelf. Then he took his flute out of his coat pocket, screwed it together and began to play softly the first tune in the book.

When he had finished the first tune he turned the page and played the second. Then he played the third.

An hour later he was still playing. The assistant thought it was time to hurry him up a bit.

"Well, sir," he said, "do you think the book will suit you?"

"I like these so far very much, thank you," said the old man, putting his instrument to his lips again, "but I have only played half the tunes so far!"

English Sense of Humor.

In one of his burlesque sketches on English history Bill Nye spoke of Julius Caesar's jumping into the water as he approached the English coast, wading ashore, running up to London, and walking through Regent street.

"An acquaintance of mine reported to me," said Mr. Nye, "that he had asked an Englishman how he liked the story. 'Not at all,' not at all," was the reply. 'That fellow Nye doesn't know what he's about. There wasn't a Regent street then, you know.'"

Splitting One at a Time.

"Gracious, Nora!" called the housewife, impatiently. "Isn't dinner nearly ready?"

"No, mum," responded Nora, through the speaking tube, "awn it won't be ready for two hours yet."

"Two hours! Why, what in the world is the cause of the delay?"

FARMER AND PLANTER

Undismayed.

He came up smilin'—used to say He made his fortune that-a-way; He had hard luck a-plenty, too, But settled down an' fought his way through;

An' every time he got a jolt He jist took on a tighter hold, Slipped back some when he tried to climb

But came back smilin' every time.

He had th' grit an' pluck an' vim, So he's on Easy street, an' turned. This is an' I don't think his luck is earned! No matter if he lost sometimes, He's got th' stuff in him that climbs, An' when his chance was mighty slim, He came up smilin'—good fer him!

Work in Home Grounds.

The sternerberg lilia is a bulb which gives us its blossoms in September, often extending into the latter part of October. A clump of them is very striking, the flowers being of a pure golden yellow in color.

The most satisfactory bulbs of all are the fleur-de-lis, iris, or lags; the narcissi and the daffodils. The ground in which they are planted should not be overfertilized, as this causes the bulbs to "run to leaf" and give but scanty blossoms.

Once in three years, in the fall, the daffodils, the narcissi and fleur-de-lis need separating, and if grown in long rows of each flower the effects is beautiful and gratifying.

Last spring I saw an acre of daffodils, narcissi and jonquils growing as carefree and blowing in the spring wind as gracefully and as happily as a field of daisies and buttercups in the meadow.

It was a wonderful sight and attracted a great deal of attention from passers-by. They were planted in the grass and when their blooming time was past they were cut down, long with a scythe.

Where but a border of these bulbs is desired the choicest should be selected, such as the Empress and the Emperor, large trumpet narcissi; the single Van Sion; the Chalice Cup, or Star Narcissus; the Poet's Narcissus, the double daffodils, the Gardenia daffodil, the Narcissus Jonquils and the paper.

A great show can be made of iris. There are several species of this gorgeous flower and each specie has many varieties—there is the Spanish iris, the iris Susiana, the Japan iris, German iris and several new varieties and novelties. Every garden ought to have a collection of these beautiful flowers. They are easy to grow and enjoy the sunshine in a deep, rich soil.

The lily of the valley grows best in shaded position. I have two beds of these deliciously sweet flowers, and they are subjected to different treatment. One bed is along the west side of a fence and when the lawn is dressed in the fall the lillies get their share of the fertilizer.

The other bed is shaded from the southern and western sun by a high brick wall. They have been there many years and last spring from the bed which is 8-feet square over 5,000 blossoms were picked and sold.

The first bed blossomed in the early part of May and were gone by Decoration Day, while the bed under the wall with the northern exposure bloomed as late as June 15 and the blossoms were large and full, while the flowers which have much more care were smaller and became scorched by the sun much sooner.—Julie Adam Powell.

Summer in the Poultry Yard.

Young ducklings are easily killed by the hot sun.

Ducks are in good demand in July and August. Watch the market reports and sell when prices are high.

The late, wet season has been pretty hard on young chicks and will, therefore, require careful attention all summer to bring them through in good condition.

Thousands of chickens die from bowel trouble during the summer months. This is generally caused by wet feed, which sours quickly during the hot weather.

If the late hatched chickens are allowed to run with the early birds the little fellows will get the worst of it at feeding time.

We are apt to neglect the hens as soon as they fall off in egg production. Careful and regular feeding, however, will keep up the egg supply fairly well, even during hot weather.

If the hens are allowed to run through the dew-laden grass every day or two they are not likely to be troubled with scaly legs, which are caused by parasites.

It is downright cruelty to keep fowls in yards hot and not well shaded.

Help; Don't Meddle.

There is a vast difference between helping our neighbors and meddling with their affairs. Nobody likes a boss in the home or out of it, and most people like to do things in their own way, even if they have a suspicion that they are not doing them just right.

The abundant rains have produced a fine hay crop this season, also a large and vigorous crop of mosquitoes. Nature generally evens things up and keeps us from becoming too proud.

Exterminate the Fly.

The health authorities of Chicago, in common with those in many other cities, are waging a vigorous war on the house fly. Dr. W. A. Evans, health commissioner, thus characterizes the insect: "He is the filthiest, most dangerous and most common of disease-producing insects that infest these parts in summer. He is born in and lives on decaying vegetable and animal matter. He was a maggot before he was a fly. It is only natural

What is Made From Corn.

Corn enters into more than 140 commercial products.

Among them are included the manufacture of hominy grits, brewers' grist, corn flour and special brands of concentrated stock feed. The hominy mills consume large quantities of corn. Many breakfast foods are now manufactured from corn. Some of the best pancake flour contain a liberal amount of corn flour. A blending of wheat flour and corn flour make a better quality of bread, many believe, than straight wheat flour, but the blending privilege was abused and it is no longer possible to obtain the mixture that was on the market a few years ago.

A judicious blending gives not only a better bread, but a cheaper bread. This is an important subject, one that the Exposition will illustrate and the producer of grain, the miller and the consumer desires to know more about it.

The glucose industry is probably the largest individual market for corn. Twelve factories consume from 40,000,000 to 50,000,000 bushels of corn per annum. Some of the factories grind 30 cars—a train load—of corn in 24 hours.

Until recently the glucose industry devoted most of its attention to the manufacture of starch and starch products. Starch is worth from \$45.00 to \$55.00 per ton. Corn oil is worth from \$95.00 to \$105.00 per ton. The process of extracting the oil from the kernel of corn is of comparatively recent development. Oil to the value of about 10 cents per bushel is now extracted from the kernel.

From corn oil such products as lardseed oil substitute, oil for soap making—a vegetable oil instead of filthy offal grease which was formerly used by some manufacturers, also a pharmaceutical glycerine, nitroglycerin, smokeless powder, and by a refining process a splendid substitute for olive oil.

One of the most valuable and intractable products is vulcanized corn oil—a rubber substitute which may be used instead of Para rubber except where tensile strength is needed. This rubber is used for insulating wires as a non-conductor of electricity and in the manufacture of linoleum, oil cloth window shades, cushion packing, water-proof cloth, and in the manufacture of rubber boots and shoes, when properly blended.

Starch forms the basis of gigantic lines of manufacture. The potato crop of New York state formerly furnished a large part of the raw material for the starch industry, but today the corn crop furnishes most of the world's supply. From starch, glucose is made. Glucose is a pure, wholesome, healthful food, which enters into food products consumed daily in most homes. Glucose sugar is extensively used in the manufacture of high-grade wines and beer, because it is sweet and does not revert or "go back to sugar." It does not have a granular crystal of its own and therefore, when corn sugar is once dissolved and remains in the liquid instead of settling to the bottom, as would be the case with cane or beet sugar. Glucose does not have a flavor of its own and therefore lends itself readily for blending purposes.

For this reason, glucose is often abused by improper adulteration. Commercial preserving and canning establishments use large quantities of glucose and glucose sugar. Some of the cheapest and some of the very best candy is manufactured largely from glucose and glucose products.

Starch also furnishes the basis for dextrine and dextrose manufacture. Dextrose is frequently used in the preparation of special foods for infants and invalids, as it is easily assimilated and digested and is also nourishing.

Dextrine is a sticky substance such as you can find when you have licked a postage stamp. Dextrine enters into many gummy compositions where adhesiveness is desired, such as in the manufacture of gum paste, British gum, library paste, gummed paper, and in the manufacture of envelopes, paper bags, boxes and by proper blending also veneering. A mordant composition is also used as a mordant in stamping figures and colors in the manufacture of gingham and calico.

Most homes and many lines of business find some of these products entering into everyday use.—Farm and Stock.

The main causes for sickness in poultry are bad odors, impure food and water, decaying matter within reach, old bones, tin cans not rinsed out, and rubbish of all kinds. These should be removed at once. A box of lime in the hen house is a splendid deodorizer. Try it.

Make up your mind that you will not get mad and misuse the calf you are trying to teach to drink, no matter what the little fellow may do. Be patient. You will think more of the calf, and surely of yourself.

Without intending any discredit in the least to the cause of charity, I am led to observe that the zeal of some persons working for that cause is remarkable. I have known of solicitors who begged the year round and got no more than they could have earned in a decent week's work. What a fascination there is in getting something for nothing.

Patrol costs pretty high these days, but it will pay in the long run in saving the buildings—provided it is good patrol.

Well Brewed Postum Always Palatable

The flavour of Postum, when boiled according to directions, is always the same—mild, distinctive, and palatable. It contains no harmful substance like caffeine, the drug in coffee, and hence may be used with benefit at all times.

"Believing that coffee was the cause of my torpid liver, sick headache and misery in many ways," writes an Indiana lady, "I quit and bought a package of Postum about a year ago.

"My husband and I have been so well pleased that we have continued to drink Postum ever since. We like the taste of Postum better than coffee, as it has always the same pleasant flavour, while coffee changes its taste with about every new combination or blend.

"Since using Postum I have had no more attacks of gall colic, the heartiness has left my chest, and the old, common, every-day headache is a thing unknown."—"There's a Reason."

Name given by Postum Co., Battle Creek, Mich. Read "The Road to Wellville," in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

FULLY FILLED THE BILL.

Aunt Mandy Was Thoroughly Satisfied with New Husband.

Aunt Mandy is an old colored woman who for years has done washing for several families. She has had several matrimonial experiences, and when her last husband died one of her customers attempted to console with her.

"I was very sorry to hear of your husband's death, Aunt Mandy," she said.

"Yaas, ma'am," said Aunt Mandy. "He was a powerful good man."

"What did he die of?"

"Ah really don't know, ma'am."

"You don't know—Gracious! Couldn't the doctor tell you?"

"Ah didn't have no doctah, ma'am," said Aunt Mandy. "He jes done died a natchal death."

It wasn't long, however, before Aunt Mandy had another husband.

"I hear you are married again," remarked her patron one day.

"Yaas, ma'am," giggled Aunt Mandy. "I was done married las' Sunday."

"And is your new husband equal to the last?"

"Yaas, indeed, ma'am," said Aunt Mandy. "He's jes as equal, if not equaler."

CURED HER CHILDREN.

Girls Suffered with Itching Eczema—Baby Had a Tender Skin, Too—Relied on Cuticura Remedies.

"Some years ago my three little girls had a very bad form of eczema. Itching eruptions formed on the backs of their heads which were simply covered. I tried almost everything, but failed. Then my mother recommended the Cuticura Remedies. I washed my children's heads with Cuticura Soap and then applied the wonderful ointment, Cuticura. I did this four or five times and I can say that they have been entirely cured. I have another baby who is so plump that the folds of skin on his neck were broken and even bled. I used Cuticura Soap and Cuticura Ointment and the next morning the trouble had disappeared. Mmes. Napoleon Duceppe, 41 Duluth St., Montreal, Que., May 21, 1907."

MISS SENTIMENTAL—Tell me, are you sure, Milton, that I'm the first you've asked to marry you?"

Mr. Manyack—Do you mean this present month or do you include last as well?

STATE OF OHIO CITY OF TOLEDO, LOCAL COUNTY.

FRANK J. CHENEY makes oath that he is senior partner of the firm of F. J. CHENEY & CO., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CARTER'S LIVER PILLS that cannot be cured by the use of any other cathartic.

FRANK J. CHENEY, Notary Public.

Hall's Catarrh Cure is taken internally and acts directly upon the blood and mucous surfaces of the system. Send for testimonials, free.

W. F. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

A Few Funny Facts.

The Georgia legislature has had under consideration a bill which would make null and void a matrimonial compact into which a woman has wheedled a man by means of paint, powder, perfume, cosmetics, artificial teeth, false hair, corsets, hoops, high-heeled shoes, low-cut waists, lace or rainbow hosiery, or by any other artificial means or practices. Why not limit the woman's "wheedling" privileges to the method of absent treatment? It is plain the poor men need at least a ten-mile start.

When the Little Man Scored.

A meek-looking little man with a large pasteboard box climbed on the car. As he did so he bumped slightly into a sleepy, corpulent passenger with a self-satisfied look and two little dabs of side-whiskers. As the car rounded a curve the box rubbed against him again and he growled: "This is no freight car, is it?"

"Nope," returned the meek little chap with the box, "and when you come right down to it, it ain't any cattle car, either, is it?"

Not Guilty.

"Now, Mrs. McCarthy," said counsel for the defense, "please tell us simply as you can your version of this affair. It is alleged that you referred to Mrs. Callahan in disparaging terms."

"Not a bit av it. I didn't say anything about disparaging nor disparaging nor any other garden truck, except that I said she had a nose like a squash and her complexion was as bad as a tomato in the last stages. You can see for yerself if it ain't the truth."

REMAINS THE SAME.

The flavour of Postum, when boiled according to directions, is always the same—mild, distinctive, and palatable. It contains no harmful substance like caffeine, the drug in coffee, and hence may be used with benefit at all times.

"Believing that coffee was the cause of my torpid liver, sick headache and misery in many ways," writes an Indiana lady, "I quit and bought a package of Postum about a year ago.

"My husband and I have been so well pleased that we have continued to drink Postum ever since. We like the taste of Postum better than coffee, as it has always the same pleasant flavour, while coffee changes its taste with about every new combination or blend.

WHAT THE TRADE MARK MEANS TO THE BUYER

Few people realize the importance of the words "Trade Mark" stamped on the goods they buy. If they did it would save them many a dollar spent for worthless goods and put a lot of unscrupulous manufacturers out of the business.

When a manufacturer adopts a trade mark he assumes the entire responsibility for the merit of his product. He takes his business reputation in his hands—out in the limelight—"on the square" with the buyer of his goods, with the dealer, and with himself.

The other manufacturer—the one who holds out "inducements," offering to brand all goods purchased with each local dealer's brand—sidesteps responsibility, and when these inferior goods "come back" it's the local dealer that must pay the penalty.

A good example of the kind of protection afforded the public by a trade mark is that offered in connection with National Lead Company's advertising of pure White Lead as the best paint material.

That the Dutch Boy Painter trade mark is an absolute guaranty of purity in White Lead is proved to the most skeptical by the offer National Lead Company make to send free to any address a blow-pipe and instructions how to test the white lead for themselves. The testing outfit is being sent out from the New York office of the company, Woodbridge Building.

WHICH?

Visitor—Can I see the editor, my lad?

Office Boy—Are you a contributor or gentleman?

Cape Cod Fog.

"Yes," remarked the Down Easter, "we do have fog along Cape Cod sometimes. One night the fog came up and in the morning when I went to milk I couldn't find the old cow. Knew where she was in the habit of lying, though, and followed her easy enough. Got to her just in time, too.

"Why, I just went through the hole she made in the fog—sort of a tunnel like—and pretty soon I came up to her. She was almost smothered. You see the fog had packed ahead of her and she'd jammed her horns into it and got stuck. Had to chop her out. You may believe it or not, but I'll show you the cow any time you come 'round."—Philadelphia Public Ledger.

Appreciates Teachers' Work.

One woman says that when her children bring home their school reports at the end of the month she always finds five minutes in which to write a personal letter to the teachers. If there is something that the children have learned that surprised her she writes a note of thanks and appreciation, and if the reports are unsatisfactory she writes offering to help the teacher in any way she may suggest. Needless to say, the teachers are appreciative, as any one will know who has ever taught school.

Where Others Failed.

"Each spring for five or six years I broke out with a kind of Eczema which nothing seemed to relieve permanently. Finally I tried a box of Hunt's Cure, which promptly cured me. Two years have passed but the trouble has not returned."

MRS. KATE HOWARD, Little Rock, Ark.

Thoreau's Sensible Answer.

When the forest-haunting hermit Thoreau lay on his deathbed, a Calvinistic friend called to make inquiry regarding his soul. "Henry," he said, anxiously, "have you made your peace with God?" "John," replied the dying naturalist, in a whisper, "I didn't know that God and myself had quarreled!"

For the Blues.

If you are blue, dejected, and feel like the world has it "in for you," the chances are your liver is taking a few days off. Put it to work by using Simmon's Liver Purifier (in boxes); it's the best regulator of them all.

Instruments of Torture.

"You don't seem to be keepin' up very well this summer," said Finner's Came to Mother's slipper.

"True," acknowledged the handy sparker, regretfully, "I've been falling astern lately."

No Others.

It is a class to itself! It has no rivals. It cures where others merely relieve. For aches, pains, stiff joints, cuts, burns, bites, etc., it is the quickest and surest remedy ever devised. We mean Hunt's Lightning Oil.

Methodists at Settle will build a large institutional church for the Japanese of that city, preferably installing as pastor Rev. S. Yoshio, the preacher at the First Methodist church.

The superior pian, being virtuous, is free from anxieties; wise, he is free from perplexities; bold, he is free from fear.—Confucius.

Mrs. Winslow's Soothing Syrup. For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

A woman is known by the acquaintances she cuts.

On the Doctors.

Mrs. Mary G. Baker Eddy, who, of course, has no faith in medicine, told a Western Christian Scientist, at one of her latest audiences, an anecdote about a friend of hers.

This friend, a thin and nervous woman, could not sleep. She visited her physician and the man said: "Do you eat anything just before going to bed?"

"Oh, no, doctor," the patient replied.

"Well," said the physician, "just keep a pitcher of milk and some biscuit beside you, and every night, the last thing you do, make a light meal."

"But doctor," cried the lady, "you told me on no account to eat anything before retiring."

"Pooh, pooh," said the doctor, "that was three months ago. Science has made enormous strides since then."

Baseball Technically.

A few weeks ago some boys were playing ball in an apartment house yard. A colored waiter came out of the kitchen and in a very cross manner told them to stop right away. One boy, who had gone to get a drink came back and found the others making ready to leave; he asked, wondering, "What is the matter?" and another one calmly answered, "the game was called off on account of darkness."

It.

An itching trouble is not necessarily a dangerous one, but certainly a most disagreeable affliction. No matter the name, if you itch—it cures you. Hunt's Cure is "It." Absolutely guaranteed to cure any form of itching known. First application relieves.

The value of this year's crops of various sorts raised in the United States is placed at \$8,000,000,000, or nearly nine times the interest bearing debt of the country and enough over to buy all the railroads of the land.

Hicks' Capudine Cures Women.

Periodic pains, backache, nervousness and headache relieved immediately and assists nature. Prescribed by physicians with best results. Trial bottle 10c. Regular size 50c and 90c at all druggists.

Even the prude isn't averse to sitting in the lap of luxury.

SICK HEADACHE

Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coalited Stomach, Pain in the Side, TORPID LIVER, They regulate the Bowels. Purely Vegetable.

SMALL PILL, SMALL DOSE, SMALL PRICE.

GENUINE SMALL BEAR FAC-SIMILE SIGNATURE.

REFUSE SUBSTITUTES.

Every Meal a Feast

Not only a feast, but actual nourishment. If the baby's stomach is not right, each meal only adds to the burden. Make sure that your baby enjoys and profits by its food by keeping its stomach in condition with

Dr. McGee's Baby Elixir

Regulates the Stomach and Bowels, corrects Sour Stomach, cures Diarrhea and Summer Complaint. The teething period is dangerous. Baby Elixir will take your baby through in perfect safety. Pleasant to take; contains no poisons, opium or laudanum. At your druggist's, 25 and 50c a bottle. Be sure and get the genuine.
