THE LEMUR A CHARMING PET
Eha in His "Naturalist on the Prowl"
Describes Little Animal—Servants Afraid of Him.
Pets are of all sorts. One of the most amusing and attractive is described by Eha in his "Naturalist on the Prowl." This little animal was a lemur, and besides many gentle and caressing ways, it seemed as if it possessed a certain sense of humor. Says Eha:
"I used to take its soft hand and examine its pretty nails. Each hand had one long, sharp claw. Such a curious arrangement puzzled me, until one day a flea showed me the use of that claw. It bit the lemur under the ribs. I expect the little beast had reason to be thankful that nature had spared one toe when it promoted it to the order of four-handed animals.
There never was a more charming pet. He took life so gayly, and the antics were so original. When my man let him out of his cage in the morning, he would scamper straight to my bedroom, look round with large eyes brimming over with mild curiosity, and, lightly as a rubber ball, spring to my dressing table, where he would examine everything. Then he would bound across the bed and land on my shoulders, handle my ears gently, wondering what was in the hole, and thrusting in his long tongue to find out.
That was beyond human endurance, and I would roll the little fellow into a ball, wind his long, fluffy tail about him, and fling him into the bed. He would be unwound in a moment, and would skip away to explore some more.
His hind legs being longer than his fore, he walked slowly, with his head down; but when in a hurry he would stand up and bound along like a kangaroo, tall in the air, arms extended, fingers spread, looking like nothing one ever saw.
The servants regarded him as uncanny, and fled at his approach. He would give chase, and there never was finer sport than to see the fat butler in full flight up the long stairway, with the gleeful little demon after him, three steps at a bound.—
Youth's Companion.

SICK, SOUR, UPSET STOMACH
Indigestion, Gas, Heartburn or Dyspepsia Relieved Five Minutes After Taking a Little Diapepsin.
Here is a harmless preparation which surely will digest anything you eat and overcome a sour, gassy or out-of-order stomach within five minutes. If your meals don't fit comfortably, or if you eat like a lump of lead in your stomach, or if you have heartburn, that is a sign of indigestion. Get from your Pharmacist a 50-cent case of Pape's Diapepsin and take a dose just as soon as you can. There will be no sour risings, no belching of undigested food mixed with acid, no stomach gas or heartburn, fullness or heavy feeling in the stomach, Nausea, Debilitating Headaches, Dizziness or Intestinal griping. This will all go, and, besides, there will be no sour food left over in the stomach to poison your breath with nauseous odors.
Pape's Diapepsin is a certain cure for out-of-order stomachs, because it takes hold of your food and digests it just the same as if your stomach wasn't there.
Relief in five minutes from all stomach misery is waiting for you at any drug store here in town.
These large 50-cent cases of Pape's Diapepsin contain more than sufficient to thoroughly cure almost any case of Dyspepsia, Indigestion, Gastritis or any other stomach disorder.

FINE IVORY NOW THE VOGUE
Toilet Table Accessories at the Present Moment Are Costly but Decidedly Smart.
All the toilet and dressing table requisites are now found in fine ivory. The only care needed is to rub off with a fresh, soft cloth, occasionally using a rag moistened in alcohol if spots occur. These, too, are more costly than silver, but are considered very smart.
The backs are monogrammed in black, brown, and occasionally in raised gold. Sometimes the sets are shown with floral decorations, but this is not so good style as is seen in many of the imitations.
White celluloid sets with a monogram in black, dark green, blue, or brown are now to be found in good designs with simple lines. The latest preparations are no longer combustible, and a full celluloid toilet set is a good investment for a guest room, for a girl at college, or for the chronic traveler; for use in a bag they are much lighter than any other ware.
The searcher after novelty can have her dressing table appointments in antique gilt, old Japanese lacquer, or Dresden china.
Such a selection is not for the average buyer, as, unless rare workmanship and corresponding cost are had, the results are likely to be poor.
Not Seeking Trouble.
"I should think it would be the bug-bear of your life trying to get up new brand-new jokes," said the sympathetic caller.
"That," said the humorist, cheerfully, "is the least of our troubles."
He Wasn't Afraid.
"Oh, well," said the grocer to the dissatisfied customer, as the argument waxed warm, "don't get put out about it."
"I don't intend to," snapped the customer. "And you can't put me out."
Our Transitory Heroes.
"He woke up one morning and found himself famous."
"Well?"
"And then went and made a monkey of himself in time for the afternoon papers to get hold of it."
Probably a Pessimist.
"What should be done to a man who spends every Sunday afternoon playing a trombone?"
"Somebody should take him out and show him that life is still worth living."

NATIONAL CAPITAL AFFAIRS

Postoffice Department May Pay Out

WASHINGTON.—The estimates of Postmaster General Hitchcock for next year show that the postoffice department promises fair to pay its bills. The mail service comes nearer to the people than any other branch of the government, for it reaches every home as well as shops and offices. It costs a lot of money. Mr. Hitchcock asks for \$250,733,943, and the appropriation for the department always is set forth in the expenditures for each year, but the earnings from the mails bring back the outlay to the treasury. This business is not reported in the current daily statement of the treasury which set forth only the deficit paid. This accounted last year to \$17,000,000, and will be \$6,000,000 less for the current twelve months, while it is predicted that it will disappear in the next fiscal year. The department gets no pay for the vast tonnage of matter which it carries for other branches of the government. If it did the offset against the deficit would be very large. The rent of offices in Washington and in public buildings elsewhere does not cover this traffic.
The work done by the postoffice is a marvel of cheapness. In volume and in extent of territory covered there is nothing to be compared with it. The reduction in rates since the days when 25 cents was charged for a letter from New York to Columbus, O., does not cease to be a wonder. The system which for two cents delivers a message in writing weighing an ounce from Maine to San Francisco not only but to the Philippines, or from the southern point of Florida to the northern extremity of Alaska, is a model of efficiency at the minimum of cost. When we consider also the burden of mails overseas to certain countries where the foreign rates are the same with our domestic charge, the challenge is bold that the world presents no parallel to the economy and to the achievement.
Europe is compact in population with distances measured by hundreds of miles only. This is especially true of Great Britain. There penny postage is proclaimed as a triumph and an example. Americans forget that the British penny is the equal in current value of two cents of our money. The cent is often called a penny, but it is only half a penny, and thus the term is a misnomer. Our postal rates on letters are now just those of Great Britain. Penny postage has long prevailed here as well as there. That with free rural delivery and with transmission over the continent and to the islands, the earnings are to cover the expenses, may well gratify officials and citizens.
Europe is compact in population with distances measured by hundreds of miles only. This is especially true of Great Britain. There penny postage is proclaimed as a triumph and an example. Americans forget that the British penny is the equal in current value of two cents of our money. The cent is often called a penny, but it is only half a penny, and thus the term is a misnomer. Has Plan to Care for Ex-Presidents

WASHINGTON.—The great movement for the conservation of the natural resources of the country, at the present time exerting salutary influences upon every important national activity, has embraced a new field. A safe, sane and successful method of conserving and finding a method of caring for our ex-presidents is the latest idea in the conserving line. A provision in the constitution of the national conservation congress is responsible for the proposal, and serious consideration is being given it, not by the political dreamer or theorist, but by the great public figures of the country.
Bernard N. Baker, retiring president of the congress, by virtue of a clause in the constitution, becomes a member for life of the executive committee, and will, so long as the congresses are held, continue to give the benefit of his counsel and experience to the president.
The suggestion has been made, and has already crystallized into an organized sentiment, to adopt the same method with the president of the United States, make him, for life, an advisory member of the president's cabinet and give him a competence sufficient to make him independent. Speaking of this proposal, Mr. Baker said that it was really surprising how many men there were in the west who thought that this method furnished the solution of the perpetual perplexing question as to what disposition to make of our ex-presidents.
"On its face the proposition is certainly a plausible one. It stands to reason that after a man has been president for four or eight years he knows the problems and difficulties which confront the man at the helm of the ship of state better than does his successor. If the ex-presidents could be made advisory members of the cabinet of the president, the latter would get the benefit of the advice of the former. No matter if there should be a change in the administration, this would make no difference to broad-minded men.
"Of course, there would have to be legislation providing that when a man is elected to the presidency his succession to the cabinet position necessarily follows. All this is not mere theory. It is endorsed by some of the political thinkers of the country."

Expert to Head the Economy Bureau

WASHINGTON.—The central staff, of which Mr. Cleveland is to be the chief, will be composed of four men in addition to the chief. Its function will be to keep the president informed as to conditions in the several departments. It might properly be called a bureau of inspection. The economy and efficiency commissions already organized in each department will undertake to ascertain if greater efficiency can be obtained without increasing the cost of the service.
It is explained at the White House that the general movement does not contemplate the dismissal of government clerks, but the gaining of greater efficiency. The president has come to believe that the departments work at cross purposes in some instances and that it is frequently the case that in a particular department money is wasted because the service is not organized or centered as it should be.
One of the first reforms contemplated has to do with the making of the appropriations bills by congress estimates submitted by the several cabinet officers. It is the hope and expectation that Mr. Cleveland and his staff will be able to prepare a new form of estimates that will appeal to the appropriation committees of congress. The executive department, of course, has nothing to do with the making of appropriation bills, but it is responsible for the estimates on which the bills are based.

Opium Invades Army at the Presidio

WASHINGTON.—The war department is advised that the opium, the insidious enemy of the armies of the world, has invaded the ranks of the United States troops stationed at the Presidio, near San Francisco, to such an extent that a strong campaign, in which are involved more than 2,500 men, has been launched in an effort to crush it out.
The officers admit the seriousness of the situation, and declare it to be the gravest problem they have been called upon to settle. Drastic measures are now being taken to rescue those of the troops who have fallen victims to the subtle opiate. With all the energies of the department of war bent to the battle, an appeal has been made to the civil authorities.
Just how general the use of the poppy juice has become is not estimated, but it is admitted to be more alarming than ever before in the history of the army. Acting Commander Col. C. Deems said that in all his career he had never encountered such a general addiction to the drug, and that at worst his observation had never disclosed a higher percentage of opium using than two to three per cent. It was at first estimated that forty per cent of the men at the Presidio were using the drug, but this was declared excessive, a more probable figure after company and hospital statistics had been compiled, being ten per cent.
Alarmed at this high percentage, appeals were directed by Colonel Lundeen, commanding at the post, to the district attorney's office and to the office of the chief of police, with the result that raids on opium dens by the civil authorities are being made.
No Demand.
"Why don't people write poems like 'Paradise Lost' or 'Dante's Inferno' asked the sincerely literary person.
"What's the use?" rejoined the confident scribe. "All the people I know of who bought the works you mention had to be persuaded to buy them for the sake of the pictures."

WOULD BE OF MORE VALUE

Father O'Leary's Facetious Rejoinder to John Philpot Curran an Example of Real Wit.
One day the famous John Philpot Curran, who was also very partial to the said corned mutton, did me the honor to meet him. To enjoy the society of such men was an intellectual treat. They were great friends and seemed to have a mutual respect for each other's talent, and as it may easily be imagined, O'Leary versus Curran was no bad match.
One day after dinner Curran said to him: "Reverend father, I wish you were St. Peter."
"And why, counselor, would you wish that I were St. Peter?" asked O'Leary.
"Because, reverend father, in that case," said Curran, "you would have the keys of heaven, and you could let me in."
"By my honor and conscience, counselor," replied the divine, "it would be better for you that I had the keys of the other place, then I could let you out."
Curran enjoyed the joke, which he admitted had a good deal of justice in it.—From Kelly's Miscellanies.

Strong Preaching.
The minister's eight-year-old daughter was returning with her parents from church, where the district superintendent had that morning occupied the pulpit.
"Oh, father," asked the little girl, her face alive with enthusiasm, "Don't you think Brother C. is a very strong preacher? I do."
"Gratified by this evidence of unusual intelligence on the part of his offspring, the minister eagerly inquired into her reasons for her statement.
"Oh," replied the little miss, artlessly, "didn't you see how the dust rose when he stamped his feet?"—Judge.

Too Free.
Seymour—What caused the Allcome Life Insurance company to fail?
Ashley—It was altogether too free in accepting risks. I don't believe it would have even refused to insure the life of a turkey the day before Thanksgiving.
Capacity.
Knicker—How many will your motor car hold?
Bocker—Five and a cop.
Strong Winds and Sand Storms cause granulation of the eyelids. PETTIT'S EYE SALVE soothes and quickly relieves. All druggists or Howard Bros., Buffalo, N.Y.

Can You Blame Him?
"Pa, what does 'skeptical' mean?"
"That describes a man's feelings when a woman tells her age."
Mrs. Winslow's Soothing Syrup. For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. See the bottle.
Silence may give consent or it may give offense.

You Can Work Near a Window

in winter when you have a Perfection Oil Heater. It is a portable radiator which can be moved to any part of a room, or to any room in a house. When you have a
PERFECTION SMOKELESS OIL HEATER
Absolutely smokeless and odorless
you do not have to work close to the stove, which is usually far from the window. You can work where you wish, and be warm. You can work on dull winter days in the full light near the window, without being chilled to the bone.
The Perfection Oil Heater quickly gives heat, and with one filling of the stove, which is usually far from the window. You can work where you wish, and be warm. You can work on dull winter days in the full light near the window, without being chilled to the bone.
