**Practical Economy**

Baking powders made from alum or phosphate may be bought for a trifle less than Royal Baking Powder, which is made from cream of tartar, derived from grapes.

Alum powders are not only cheap, but they differ greatly in leavening power.

If a cheap baking powder is used for a fine cake and the cake turns out a failure there is a waste of costly materials worth more than a whole can of the cheap baking powder.

Royal Baking Powder produces the finest food, and its use therefore, results in an actual saving.

Prettily printed labels and "this is just as good, madam," conversation don't improve the character of substitute goods. Imitation groceries put both the purchaser and purse out of temper. We've got the right idea—quality groceries at fair prices.

**An Announcement and an Invitation of real importance to you!**

WE are pleased to announce that we have contracted to sell the Maxwell Motor Car in this territory.

We have selected the Maxwell because we believe that it comes nearer to being the ideal car for the average family than any other on the market.

We were asked by various manufacturers to represent them in this territory, and before we made a decision we considered them all carefully, comparing the cars point by point, and making sure of the right choice, because you realize that taking the agency for a car means the same to us as the buying of a car does to you.

And we believe it is worth while for us to give you our reasons for the decision we made.

First we found the Maxwell complete—in every possible detail. The engine is modern, simply built, yet extremely powerful and durable. The car is light in weight, but sturdily constructed. There is an abundance of speed. The operation of the car is simple and easy. The light weight and great power, of course, mean economy in gasoline and oil.

Point by point the Maxwell is equal or superior to most cars selling for a few hundred dollars more. There is style, plenty of room for the full number of passengers which each model is rated to carry, and unusual comfort. We were gratified to find these features so pronounced in a low priced car.

The equipment is also complete. There is electric starter and electric lights, demountable rims, one man top, rain-vision windshield—everything the motorist needs for convenience and comfort.

And so when we found how the Maxwell compared in all these points—then considered the price of \$595—several hundred dollars lower than any other car offering the same advantages, we were satisfied that it was the best car to sell, because it must be the car that people will want.

We are fully equipped to give prompt and satisfactory service to Maxwell owners—and we are in a position to make immediate deliveries. We will tell you more about the Maxwell in future advertisements—but meanwhile we invite you to visit our salesroom—and arrange for a demonstration at your convenience.

We are enthusiastic about the Maxwell—but no more so than you will be when you are acquainted with it.
