AN OLD MAN'S STOMACH.

As we grow older and less active, less and less food is required to meet the demands of our bodies. If too much is habitually taken, the stomach will rebel. When a man reaches the advanced age of 55 or 60, you will find that he is a light eater. He is a real as you will, however, you will occasionally eat more than you should and will feel the need of Chamberlain's Tablets to correct the disorder. These tablets do not contain pepsin, but strengthen the stomach and enable it to perform its functions naturally. They also cause a gentle movement of the bowels.

NOTICE TO BIDDERS.

THRIFT WILL WIN THE WAR.

President Wilson said, "I suppose not many fortunate by-products can come out of the war, but if the country can learn something about saving out of the war, it will be worth the cost of it in money and resources."

That thrift idea you've had in mind to practice in the dim and distant future—it's just the thing for thrift day. Start something—get action—that's what thrift day is for.

War times have made every day a thrift day in America. Open an account with us, if it hasn't been done.

Mobilizing a Nation's Fighting Strength

Great military cities have sprung up all over the land; and linking these training camps, aviation fields, coast defenses, naval stations and even most remote points where our forces are gathering, is the Universal Bell Telephone system—linking each with the other and all with the departments at Washington.

Upon the declaration of war the Bell system was placed unreservedly at the disposal of the government, whose already enormous demands for telephone service are continually increasing. Likewise, unprecedented are the service requirements of private business, which necessarily must be subordinated in times of emergency.

So far as the local service is concerned we are not only unable to increase our revenue by accepting a volume of new business, but we are in the awkward position of seeing our service suffer and our present patrons inconvenienced. The delays and inconveniences due to the congestion are more embarrassing to us than to the public.

Any sacrifice we may make is accepted cheerfully and if our difficulties are reflected in your telephone service, we ask that you bear this in mind.

The patriotic American public can co-operate most effectively with the government by discouraging unnecessary use of the telephone.

SAVE SUGAR

- SAVE SUGAR.
- Sugar means Ships
- Ships means Soldiers
- Soldiers mean Victory.
- ONE SPOON PLEASE.
- Make one spoon of sugar
- Do the work of two
- Every day until
- The war is through.

The hotels, restaurants and other eating places throughout Louisiana, have upon their own initiative, been ordered to take the lead in conservation of meat and sugar. Both are vital for war purposes. The Americans under arms will not only obtain their full supply, but there will be reserves built up for the Allies as well as for them. The difference in the showing made by Italy in the last drive was due as much to American food as any other cause. The result is inspiring enough to make every American determined to do his food bit, even if sacrifices were asked. Instead of sacrifices, however, the Government is only protecting the remainder so that all will share according to their actual needs, the humblest individual as well as the largest industry.

The great general rule for catering resorts, which include boarding houses and commissaries, is the abolition of the open sugar bowl. The resolutions were adopted at a meeting of hotel and restaurant men in New Orleans, presided over by Theodore Grunewald, chairman of the Division, and Edward O. Wild, acting manager. Joe Parker declares that the rules will be strictly enforced, even if he has to take command of the inspectors in the field.

The sugar plan for eating places is the same as for families, the allowance being based upon three pounds per person per month. Most of the bonifaces are already serving sugar portions in little bags. One teaspoonful is allowed for a small cup, two for a large cup, and three for a pot of coffee or tea. Two teaspoonfuls are the measure for cereal or fruit orders. A lump of sugar is counted as equivalent to a teaspoon. Cane and beet sugar are barred from bakery and kitchen. Meat saving is to be accomplished by using only eight to nine pounds of meat for ninety meals served. Meat is limited to Monday's mid-day meal. Stewed beef or beef hash to Wednesdays and Saturdays mid-day meals, and steaks in any form, including hamburger, to Thursday's mid-day meal. By-products, such as tongue, liver, etc., may be used as substitutes. Further substitutes are fish, crabs, shrimp, sea food of all kinds, rabbits and wild game. There will be plenty to eat and there will be a reserve built up for the soldiers. The latter duty leaves this country with only a three day's supply ahead, and conservation is wisdom.

The rush for sugar certificates has swamped the Food Administration office, but with the aid of volunteers the work is going bravely on, with very little delay to anybody. The rush has not prevented a good stroke in securing assurance of a large sugar supply for Louisiana, her portion under existing distribution threatening to fall short of the certificates issued. The United States Food Administration has already tied up the coming Louisiana crop by ordering that no deals ahead be made without permits. The Sugar Control Committee is still confident that Louisiana will receive about a cent per pound more for her crop than last year.

The United States Food Administration has issued similar orders with regard to the sale of clean rice, and it is evidently the intent to limit the fall supply, needed by the Government, before the product is made available to the public. Rice has been greatly popularized as a food through the broad advertising given by the Government, and the price has virtually been fixed with all branches of rice production and selling.

A SERIOUS COAL SITUATION

New Orleans, July 4.—The seriousness of the fuel situation this winter is brought sharply home to Louisiana in the announcement from Washington that 15,000,000 tons of coal must be saved by little economies in homes, residences, schools and municipal buildings other than factories.

The 15,000,000 ton saving represents ten per cent of the consumption of coal in homes, schools and the like.

Louisiana's new quota is to be met through the patriotism of city folk and the rural communities. "Cut A Cord Now" slogan will be pushed vigorously from now on; the minute the farmers have laid aside their crops, they are urged to cut wood for their fuel reserve of the winter. In the cities, where wood is not available, housewives are to be urged to pledge themselves to save a thoughtful of coal a day, which, it is said, is equivalent to half a loaf of bread.

A cord of wood has a heat value of three-fourths of a ton of coal, and with millions of cords of firewood available in Louisiana, a great saving of coal can be effected through the patriotism of the farmers and others. The coal thus saved will mean Uncle Sam can speed more troops and supplies "over there," provide more munitions of war, and "make it hot for the Kaiser" in general.
