Enjoy Cold Days in a Maxwell

JUMP into a Maxwell, bundle up, and in a second or two you're off.

No stone cold engine, no getting out to crank.

A few revolutions of the engine and it is running with midsummer action.

You get over ground quickly, get to your destination faster than in a bigger car.

This cold weather efficiency in a Maxwell is traceable to the Hot Spot and Ram's-horn, which warm up, "break up" gas into a fine vapor.

The moment this reaches the cylinders it is converted into full power and you avoid the troublesome experience of "trying to get a car warmed up on a cold day."

This high efficiency and the fine quality of steels used in its construction have made for Maxwell friends by the thousands—to date more than 300,000 of them. 100,000 Maxwells are being built this year; which will supply but 60% of the demand.
