This dividend is made in the face of unusually large expenditures, the taking over of a large concern, the Burke Company and improvements. It is also encouraging to note the fact that the Covington branch (the Covington Grocery & Grain Co.) has largely increased its business, being one of the best branches.

### LETTERS OF DENIAL.

(Continued from page 1)

It has already been demonstrated in a small way that proper drainage will so greatly increase the value of our lands and the extent of their productive power that it is quite beyond the limits of this letter to describe.

It is not the purpose of the writer to try in any way to create sentiment favoring drainage in any particular part or district of the parish at this time, but it is to urge you to investigate the matter fairly and squarely, and let us work it out together in a general way to the satisfaction of all concerned.

Our institution, as you know, has always stood for progress, and realize fully that as the surrounding country prospers, so do we prosper, and you can be assured that it will be our aim to assist our farming friends to make this the garden spot of the South, and that is not only possible but probable if we all work together to that end.

The St. Tammany Progressive League, through its committees have arranged a series of meetings throughout the parish for the purpose of fully discussing the subject matter from every viewpoint, and since it is impossible to reach every one by letter, I am enclosing six tickets for yourself and friends for a meeting to be held at ... on ... and look forward to the pleasure of seeing you there.

Yours cordially,  
C. A. EVERITT,  
Vice President and Cashier.

DUUNCAN BUIE,  
State Highway Engineer.  
FRANK M. KERR,  
Chief State Engineer and President  
Board of State Engineers.

Prompt work by the fire department at the fire Tuesday night brought the machinery into play in time to prevent a fire and to restrict the loss to practically nothing. The fire was near the depot. Water was playing on the blaze practically before the alarm had quit sounding. Good work.

While we are exceedingly careful to avoid error of statement, inaccuracies will at times occur. We can only say that we have never attempted intentional misrepresentation. As long as I am at the head of this paper, it will never be truthfully said its support has been gained for any project or for any political candidate unless there is behind that support a feeling that it is for the public good. We believe drainage is a good proposition and we hope to see it put through, but we do not wish to see it accomplished against the question by the people. We do believe, however, that a study of its great value, and that even if we are wrong in this supposition, we still will have done a public service by the campaign. We expect to prove to the people that we are right or to have the people prove to us that we are wrong.
