Indigestion

Many persons, otherwise vigorous and healthy, are bothered occasionally with indigestion. The effects of a disordered stomach on the system are dangerous, and prompt treatment of indigestion is important. The only medicine I have needed has been something to aid digestion and clean the liver, writes Mr. Fred Ashby, a McKinney, Texas, farmer. "My medicine is

Theford's BLACK-DRAUGHT

for indigestion and stomach trouble of any kind. I have never found anything that touches the spot, like Black-Draught. I take it in broken doses after meals. For a long time I tried pills, which griped and didn't give the good results. Black-Draught Liver medicine is easy to take, easy to keep, inexpensive."

THE railroads were partly responsible. But it wasn't until the automobile reached its present state of development that the old barriers against travel were finally broken down.

much in this tire business for us.

More people own automobiles today than ever thought of owning a horse and buggy in the old days.

The less a man has to spend on motoring, the more important it is that his tires should be of first quality.

That's because the cost of motoring has been brought within reach of the average citizen's pocketbook.

Any tire is not good enough for the small car owner. He wants a tire that will give him just as much for his money in the small size as the big car man gets for his money in the large size.

We look upon it as part of our job to keep it there. If it weren't for the trade of the man with the medium priced car there wouldn't be

In thinking over what kind of tires we would represent in this community we tried to put ourselves in the place of the car owner. And we believe we hit it exactly when we selected U. S. Tires.

PLANTING ENDIVE IN AUGUST

The King of Winter Salads and There is Plenty of Room at This Time of Year.

Ordinary endive is the king of all winter salads that are in reach of the ordinary gardener. It should be planted from the first to the middle of August. The green curled varieties are best. There is always plenty of room in the gardens at this time of year, therefore sow the rows wide enough apart to allow banking with earth. Thin the plants to stand about four inches apart. Having it that close together will not produce large heads, but they will be finer in texture and more tender.

By the time the first freeze is expected this will be a hedgerow. Lift the outer leaves, pressing boards against the sides of the row and hold them in place with stakes. Leave it until in danger from freezing weather, then draw earth against the boards and add straw covering.

SPRING LEAVES NEED OILING

Thorough Cleaning and Lubrication of Various Parts Make Car Ride Easier.

In speaking of care of automobiles Mr. E. B. Dale, who is in charge of the automobile course at Colorado agricultural college, says, "People will find that a little care with the springs of their car will make riding easier by many per cent. All it takes is care. Anyone who is getting his interior self shook up and turned over every time he takes his car out will find this advice worth while: Remove the springs, take them apart and remove all dirt and rust which is between the spring leaves. Polish the parts of the leaves which rub together. Assemble, using plenty of graphite grease between the leaves. The result is gratifying."

REAR OF AUTOMOBILE FORMS CAMPING BED

Illustration Shows Some of Advantages Obtainable.

Spacious Hinged-Back Swings Down to Form Very Comfortable Open-Air Compartment—Canvas Covers Can Be Attached.

The system of camping by automobile shown in the drawing has many of the advantages to be obtained by using a trailer, without a trailer's disadvantages. Unlike the trailer, it is not found covered with dust after a hard day's travel, yet it is comfortable and roomy.

A light truck body is mounted on the automobile chassis. A spacious hinged-back swings down to form a sleeping porch, which is made secure by chains. Upon the inside surface of this top is

built a shallow box; the forward end of it opens out flat, and the top side swings up to form the back end of the sleeping compartment. A canvas cover can be attached, as shown, preferably with automobile curtain fasteners. Bedding is laid out on the hinged floor, extending some little distance into the body of the car. In the morning the bedding is quickly put away in the flat box, and the whole rear compartment is readily folded up into the body under the roof of the car body.—F. F. McClintock, New York, in Popular Mechanics Magazine.

AUTOMOBILE PAINTS

Too much emphasis cannot be placed on lubrication.

Two-thirds of the doctors in the United States own motorcars.

Do not allow the engine to race or to run when the car is standing.

The horn for a motorcar was patented as the first free accessory 15 years ago.

When it is absolutely necessary to run on a flat tire, keep the tire in soft dirt, if possible.

Running the engine while the car is standing causes a daily waste of 97,000 gallons of gasoline.

About the only satisfactory material for packing a gasoline connection is hemp string and soap.

BROKEN AUTOMOBILE AXLE SOON REPAIRED

Job Can Be Done With Taper Punch and Piece of Board.

Majority of Accidents Happen in Out-of-Way Places and Usually Driver is Without Necessary Tools to Make Repairs.

If your automobile's axle, either right or left, breaks, a quick "get home" job can be made with a taper punch and a piece of board.

Remove the differential case cover. Insert the punch in the hole to keep it from turning, and wire the board fast to the running board and the rear end of the spring or mud guard, as shown in the illustration. The board holds the axle in, and the punch keeps the

axle and its gear from making the differential action, thus allowing the car to be driven home under its other axle.

Nine out of ten breakdowns occur in out-of-the-way places, and usually the driver is without the proper tools or parts to repair the break. By observing other motorists' methods of emergency repairs you will not be at a loss for a solution when your breakdown arrives.—P. P. Avery in Popular Science Monthly.
