**SAVINGS SERMONETTE**

Number Twenty-Two.

**THE NEWLY WEDS**

A happy future is assured to those who commence their married life with a savings account. It provides for emergencies which are bound to arise at times in every life. Prepare for these emergencies by putting aside a portion of your income regularly. Be frank with your wife; tell her exactly the amount of your salary or income and ask her to help you to set aside a certain sum to be saved every month. Get in the habit of feeling that this amount must be saved. The time will come, as it does in every one's life, when a good savings account will enable you to take advantage of an exceptional opportunity or enable you to meet trouble bravely.

Don't put off starting your savings account—do it at once, and by this time next year you will have an account to be proud of.

We invite your account and will be interested in its growth.

**SHERIFF'S SALE.**

I. B. Rennyson vs. Succession of Mrs. Annie B. Koepf Rivers, wife Grover C. Rivers.

No. 3271.

Twenty-Sixth Judicial District Court, Parish of St. Tammany.

Notice is hereby given that by virtue of an order of seizure and sale issued out of the honorable Twenty-Sixth Judicial District Court for the Parish of St. Tammany, Louisiana, and to me directed, I have seized and will offer at public sale at the principal front door of the courthouse in the town of Covington, La., between legal sale hours, on

Saturday, December 4, 1920, the following described property, to-wit:

A certain lot or parcel of land together with all buildings and improvements thereon, lying and being situated in the Town of Slidell, La., St. Tammany Parish, and being more fully described as being lots Nos. 7 and 8 in Square No. 22 of the said town. Each of said lots measures 60 by 120 feet, and the said square is bounded by Carey, Brakefield, Robert and First streets, according to the map and plan of survey of the said town.

Being the same property acquired by the vendor from Will J. Morgan by act before L. V. Cooley, notary public, on the 1st day of March, 1919, registered in C. O. B. 74, folio 455 and M. O. B. "Z" page 481, St. Tammany parish.

Terms of Sale—Cash, without appraisal.

WALTER GALATAS, Sheriff. oc30-6t

**SHERIFF'S SALE.**

H. J. Smith & Sons vs. Ancil M Baham.

No. 2611.

Twenty-Sixth Judicial District Court, Parish of St. Tammany, Louisiana.

Notice is hereby given that by virtue of a writ of fieri facias issued out of the Honorable Twenty-Sixth Judicial District Court for St. Tammany Parish, Louisiana, in the above numbered and entitled suit, I have seized and will proceed to sell, at the principal front door of the courthouse in Covington, St. Tammany parish, Louisiana, on

Saturday, December 18, 1920, between legal sale hours, the following described property, to-wit:

1. Two certain pieces of ground in St. Tammany parish, designated on a plan drawn by Paul L. Guzman, surveyor: (1st) Lot 1 in tier 4, containing 5.09 acres; (2d) Lot 1 in tier 5, containing 12.36 acres, which fronts on the Turnpike Road, acquired by Ancil Baham in Conveyance Book 40, page 166.

2. A certain piece of ground situated 1 1/2 miles east of the Town of Madisonville, designated on a plan drawn by Paul L. Guzman, surveyor, as north half of lot 1 in tier 2, containing 2.70 acres, with a front on the Turnpike Road, bounded north and east by streets. Acquired by Ancil Baham in Conveyance Book 40, page 165.

3. South half of southwest quarter of section 8; east half of north-west quarter of section 17 to 5 south range 10 east, containing 161.16 acres, less 40 acres previously sold. Acquired by Ancil Baham in Conveyance Book 50, page 317.

4. East half of northeast quarter of section 18; west half of northwest quarter of section 17 to 5 south range 10 east. Acquired by Ancil Baham in Conveyance Book 43, page 472, and Book 42, page 461.

5. Southwest quarter or northwest quarter of section 15 to 6 south r 10 e, containing 37.87 acres. Acquired by Ancil Baham in Conveyance Book 52, page 421.

6. East half of southeast quarter of section 29 to 6 south range 10 east, containing 51.22 acres. Acquired by Ancil Baham in Conveyance Book 40, page 163, and Book 40, page 167.

7. West half of northwest quarter and northwest quarter of southwest quarter of section 30 to 6 south range 10 east, containing 122.36 acres. Acquired by Ancil Baham in Conveyance Book 40, page 167, less right of way granted to the Baton Rouge, Hammond & Eastern Railroad Co., recorded in Conveyance Book 48, page 349.

8. Northwest quarter of section 33 to 6 south range 10 east, containing 165.48 acres. Acquired by Ancil Baham in Conveyance Book 40, page 163.

Terms of Sale—Cash, with the benefit of appraisal.

**Beats Gasoline at 15 Cents a Gallon**

New Invention Makes Fords Run 34 Miles on Gallon of Gasoline and Start Easy in Coldest Weather—Other Cars Show Proportionate Savings.

A new carburetor which cuts down gasoline consumption of any motor, including the Ford, and reduces gasoline bills from one-third to one-half is the proud achievement of the Air-Friction Carburetor Co., 3072 Madison St., Dayton, Ohio. This remarkable invention not only increases the power of all motors from 30 per cent to 50 per cent, but enables everyone to run slow on high gear. It also makes it easy to start a Ford or any other car in the coldest weather without previously warming the motor. With it you can use the very cheapest grade of gasoline or half gasoline and half kerosene and still get more power and more mileage than you now get from the highest test gasoline. Many Ford owners say they now get as

**TO DETERMINE WHEAT DOCKAGE**

Filling a Measure of Wheat Preparatory to Weighing it and Determining Grade of the Wheat.

Of prime importance to the wheat-growing farmer is an understanding of dockage as the term is used in federal wheat grades, and how dockage in wheat is determined, since in grading wheat under federal standards one of the fundamental principles is to determine the numerical grade on a dockage-free basis. With a few exceptions the dockage is first removed from the samples and the grade determined with the clean or dockage-free wheat. Dockage is the foreign material screened from a sample of wheat to be graded, by the use of appropriate hand sieves or other cleaning devices, and consists of sand, dirt, weed seeds, weed stems, chaff, straw, grain other than wheat, and any other foreign material. It also may contain finely broken or small, shriveled grains of wheat. In cases where such material cannot be separated from dirt and other foreign material by the use of appropriate sieves.

Factor in the grade and definite percentages are permitted in each numerical grade.

**Dockage Easily Removed.**

Ordinary dockage can be removed from quantities of wheat with comparatively simple cleaning machinery, such as is installed in many grain elevators and mills, or it can be removed on the farm with an ordinary portable fanning mill equipped with a screen having perforations like those specified for the dockage sieves.

Dockage found in wheat in many cases is of real value, while in other cases it not only may have no value, but may contain ingredients positively harmful if ground with the wheat. Dockage frequently contains quantities of other grains and weed seeds, such as mustard, flaxseed, oats, or other cereal grain. Much of this can be used to good advantage as poultry or stock feed.

**Importance of Dockage System.**

It should be understood that it is optional with a farmer whether he remove dockage or not. The point which United States department of agriculture officials emphasize is that it is to his advantage to understand dockage and, in many cases, to remove it himself. If the dockage system is not employed, the foreign material in the wheat may cause a lowering of the grade. If no grading system is employed (grading usually is not compulsory for the farmer in selling wheat at country points, though all shipments to terminal markets are graded), and the country miller or grain dealer buys wheat as delivered at a flat rate, or on the basis of the average quality delivered, the price paid usually is sufficiently low to protect the buyer against loss caused by objectionable foreign material delivered with the general run of the grain.

Under the dockage system of the federal standards, however, the amount of such foreign material separated and considered as dockage is deducted from the weight of the wheat purchased and, in any event, does not affect the grade of the wheat after it has been cleaned. This results in a higher grade, and the price paid is on the basis of this grade.

After the dockage is removed from the original sample and the test weight per bushel has been determined, the sample is then examined to ascertain whether an analysis is to be made for any other factors which determine the grade.

**Methods of Handling Dockage.**

Various satisfactory methods of handling dockage may be employed in normal times. Where wheat is cleaned on the farm or at the country elevator and only the screened wheat is delivered to the local buyer, there is less possibility of difference of opinion regarding the grade of wheat delivered. Such an arrangement tends to establish greater confidence in the grades given by the local buyer. When noxious weed seeds are present it is advisable to have the removed dockage ground before feeding to prevent the further spread of these weeds on the farm. In many cases such material has a relatively high feed value and often farmers will find it to their advantage to remove the dockage themselves or have their local buyers do it for them. The bulletin describes other methods of handling dockage and making allowance therefor.

Further information as to the correct method of determining dockage in wheat may be obtained by writing the United States department of agriculture, Washington, or by writing to or visiting the nearest office of federal grain supervision. Such offices are located in the large grain markets. A farmer or country grain dealer may also mail a sample to the nearest grain inspector and receive for a small fee an official certificate showing the grade and dockage on that particular sample. This sample should be two quarts in size, of which at least 1 1/2 pints is inclosed in a clean, airtight container. The remainder, if any, with the container, should be placed in a clean cloth sack. The address of the nearest licensed grain inspector can be secured by writing the department or any supervision office.

**Apply to Foreign Material.**

Two terms in the federal wheat standard apply to foreign material—"dockage" and "foreign material other than dockage." The former is foreign material that is separated from the sample of wheat by the proper use of appropriate hand sieves. "Foreign material other than dockage" is the foreign material not separated in the screening and remains in the dockage-free sample. "Foreign material other than dockage," on the other hand, is a
