A Cow can give milk to her fullest capacity only when fed the right proportion or balance of milk-making materials. Milk is made up of Protein, Carbohydrates, Fat, Minerals and Water, in proportions that, practically speaking, can't be varied. Instead of making imperfect milk, a poorly fed cow gives less milk.

Feed Purina Cow Chow

and your cows will get all the Protein and Calcium needed to balance your Carbohydrate roughness.

All we ask is that you give Purina Cow Chow a trial and let your milk scales show you why you should keep on feeding it

Does More For Less

THAT the Ford One-ton truck does more for the farmer or the merchant is proved by the great number of them now in daily use,—that it does this at less cost is shown by the actual figures—a smaller first cost and a much lower expense for operation and upkeep.

The Ford One-ton Truck has proved a great money saver, as well as a labor saver. It has solved the problems of economic transportation between the farm and the city.

The Ford One-ton truck has all the merits of the Ford car, with added strength for greater capacity. The worm drive of aluminum bronze gives unusual and positive power at a very low cost.

Come in and let us show you how the Ford One-ton Truck will help you and save you money in your work.

IMPORTANT

We are prepared to furnish the Ford Truck equipped either with Standard or Special Gearing. The Standard Gearing gives the truck a maximum of power. The Special Gearing increases the speed of the truck from five to seven miles an hour, converting it into a Fast Delivery Car.

BECAUSE you carry a policy of insurance does not always mean that you are insured. You must read your policy carefully and ascertain that the company which issued the policy is a solvent one. Few people do this, and that is why we try as far as is humanly possible to write your policy carefully, and in first class companies.

We state it as our honest belief that the tobaccos used in Chesterfield are of finer quality (and hence of better taste) than in any other cigarette at the price.

Science Plans Model Homestead

Nebraska's College of Agriculture has constructed a model farmstead for that state. In the picture model, which is herewith printed by special arrangement with Popular Science Monthly, the various buildings have been laid out, so that the farmer walks around the circle in doing his chores. Many farmers, it is said, think of wasted motion only in relation to their machinery, never in relation to their own movements.
 In this plan, the barns and yards are located so that the prevailing wind will carry offensive odors away from the house. All the buildings also are placed so as to make for pleasant appearances and good views.
 yards. Nearly all fences serve two purposes. The barn has a central alley to allow the winds to blow through it from south to north. Generally, the plan lightens drudgery and aims to make for pleasant appearances and good views.

"TIDE WATER" CYPRESS
 THE WOOD ETERNAL

It's a waste of time, labor and money in making repairs—(or doing new work)—with lumber that will rot out quickly.

"He Who Uses Cypress Builds But Once."

Cypress lasts and lasts and lasts and practically refuses to wear out or rot out. Cypress means "double money's worth," and often more if you **BUY THE GRADE THAT FITS THE JOB.**

For many uses the lower grades are exactly the thing. This fact gives wise buyers a still further advantage over those who simply order "some lumber." You see the point.
