WEDNESDAY, AUGUST 3, 1894.

It is announced that one or two men, whose names are on the annexation roll, have refused to take the oath and perform jury duty. If this is the case their names should be immediately stricken from the roll.

Those gentlemen who have refused to take the oath and yet hold commissions from the Republic are reminded that if they are acting on principle their commissions can be returned at once in place of waiting until September 1st.

How would it do for the Royalists to publish that autograph letter from President Cleveland to the ex-queen, together with those "other valuable documents," said to have arrived on the Monowai. This is the first time on record the Royalists ever received any sort of alleged favorable news which they have refused to publish. Or is it possible they have actually received that long-looked-for letter and it has shun them up in an unexpected manner? News that will not bear the light is not generally good news.

THEY DON'T COUNT.

That semi-official British-Royalist organ the Bulletin wants to know very, very much what the supporters of the Republic will say to the failure Tuesday of fifteen out of thirty-six foreigners to take the oath as jurors. Well this is probably another of those knotty, depthful conundrums which are occasionally propounded by astute lime-juicers for the sole and deliberate purpose of making the average Yankee's head ache.

No, good Royalist-Britisher, it wasn't Cleveland and it wasn't any violent love for semi-savage institutions and, in fact, it wasn't any sort of political mystery that even called for the asking of a question. The wonder in the community is that the editor in question did not solve the conundrum by using his eyes and recognizing his kith and kin, rather than demanding an explanation from Americans.

Well, fair sir, after careful consideration, a twenty-four hour's splitting headache and a midnight vigil we have this to say: In the first place fifteen out of thirty-six is not a majority in Hawaii; and in the second place a majority of the fifteen who did refuse to take the oath to support the Republic were Englishmen. Now we will be real kind, and, although you didn't ask it, will give you a little pointer "gratis for nothing," as the boys say: When it comes to establishing Republics and supporting them Englishmen don't count.

JAPANESE COMPETITION.

Some time ago complaints were heard that the Japanese were successfully pushing trade competition against lines at present occupied by white merchants. There is no doubt there are both truth and facts behind this complaint. The same evil that followed the introduction of Chinese labor, without proper restrictions, will likely be aggravated, if the Japanese are allowed to follow the same course.

There are reasons for this statement. In trade matters the Japanese show much more energy and push than the Chinese. Since the opening of the ports of Japan to the commerce of the world that nation has taken rapid strides in extending her trade. A few years ago almost the entire Asiatic coast and Straits Settlements trade was supplied by the factories of Europe and the United States. While this is largely retained in the great business centers, it is very different in the outlying districts and the Straits Settlements.

In the latter place, Japan has not only come into competition with foreign trade, but has largely driven it out. In the matter of matches, Japan of late years has been able to drive both the English and Swedish products out of that market. Welsh coal has been almost wholly replaced by imports from Japan at from fifteen to twenty per cent. less a ton. Personal articles, from umbrellas to soap, of Japanese manufacture, have driven similar goods of British manufac-

ture out of the Straits trade; and even that cheapest of all articles, the American clock, has been imitated and undersold by the ingenious Japs.

The complaints which have already been heard here have sprung from the gradual importation of a similar line of Japanese manufactures. Matches, beer, dry goods, and nicknacks, have already come into direct competition with American and British manufacturers here; and it is in such out-of-the-way places as Hawaii and the Straits Settlements, rather than in trade centers, that such competition will be planted, and if not checked will rapidly increase.

A TRUMPED UP "IMPRESSION."

If there is any impression abroad, as stated by the Bulletin last night, "that the orders countermanding the departure of both the American and British warships indicate international jealousy between the local representatives of those nations" it certainly did not come from the Americans, or from their representatives, or from the supporters of the Republic of Hawaii. The Bulletin is to be congratulated upon discovering the alleged "impression" was not well founded on its side of the international house.

By the way the Bulletin has a similar impression, that is equally without foundation, as was doubtless known when it was written, viz: that President Dole called upon the U. S. Philadelphia lately "for the purpose of imploring" the American Admiral not to leave the city unprotected. There was not an iota of authority for this statement as the man who wrote it knew perfectly well. The assertion it is "affirmed on good authority" is the usual shield from the direct use of that journal in cases where its imagination is being drawn upon.

In the present case there was really no call for the statements made in the Bulletin, as the Republican press had for certain reasons ignored that usual and characteristic petition for the retention of the Champion, which has bobbed up from the same source every time a British ship has been in port since the revolution. The fact is the Government does not need the protection of any war ship, Americans have not asked and will not ask for home protection, and it is hard to see who does need protection in Hawaii, so long as law and order are not broken or intended to be violated. Even in such a case the Republic will be amply able to give protection to its own citizens and any weak-kneed foreigners who may apply. The support back of the Republic is made of sterner stuff than that formerly behind the monarchy, and unstable government has completed its course for ever in these Islands.

The Bulletin has spoken for its friends, and as far as Royalist and anti-American sentiment is concerned, it probably knows what it is saying. As far, however, as it speaks for the supporters of the Republic, for resident Americans, and for the United States Government, it is performing the usual Royalist feat of talking through its hat.

For the Good of Others

Rev. Mr. Williams heartily endorses Hood's Sarsaparilla. We are pleased to present this from Rev. A. A. Williams, of the Sabbath School Christian Church, Lynn, Mass.: "I see no reason why a clergyman, more than a layman, who knows whereof he speaks should hesitate to approve an

Nervous Headache

for which the found little help. He has tried many things that promised well but performed little. Last fall he tried Hood's Sarsaparilla. It seems surprising that what simply one bottle could do for him. The attacks of headache decreased in number and were less violent in their intensity, while his general health has been improved. Her appetite has also been better. From our experience with

Hood's Sarsaparilla I have no hesitation in endorsing its merits." A. A. WILLIAMS. HOOD'S PILLS are the best family cathartic, gentle and effective. Try a box. Price 25c. Hobron Newman & Co Wholesale Agents.
