A \$25 Nursing Bottle

for 25 cents.

The "Best Nursur" is worth \$25 to any mother—we think more. Why? Because it will prevent wind-colic, collapsed nipple, cross baby.

The plan of this bottle is simple, yet scientific. In the bottom of the bottle is a valve. As fast as the milk is drawn the valve allows the air to enter, this prevents the child from sucking in wind because the air comes in back of the food, not through the nipple, which causes so much wind-colic.

If there were only a few "Best Nursers" they would be worth \$25 each, but we will give you all you want for 25 cents apiece, complete with nipple and valve.

AS a rule a child takes a better Photo than an adult. Grown up people are generally self-conscious and are hard to divert from the fact that they are being recorded. With a child it is different—one touch of the spring of a mechanical toy and the subject smiles in interest of the manoeuvre. We make a specialty of taking children's photos.

TO YOU PERSONALLY:

You read this because you want to buy a wheel. We want you to learn about the solid STERLING. People are going round and saying that bicycles don't cost much to build. Some don't. It depends upon the builder. One uses iron instead of steel castings, or stampings instead of drop forgings. Saves where and when he can. Builds a wheel—true; but not a High Grade wheel. The other builder buys the strongest and best material for every purpose. Looks not so much on what he can save as what he can accomplish. Spends his best endeavors in building the best he knows how, and brings forth a work of art and skilled workmanship—a High Grade Modern Bicycle. These are details to be thought of.
