## RUSSIAN GENERALS FIGHT A FATAL DUEL

(Associated Press Cable to The Star.)

ST. PETERSBURG, March 18.—Lieutenants General Smirnof and Fock have engaged in a duel with pistols and the former is probably fatally injured. The clash of these men grew out of trouble in the trial of General Stoessel.

General Smirnof was at Port Arthur with Stoessel and it was brought out during the latter's trial that Kurapatkin at one time ordered Stoessel to turn over the command to Smirnof, and that Stoessel simply ignored the order. General Fock is another officer whose conduct was bitterly assailed during the trial of Stoessel, whose sentence to death has just been confirmed by the Czar in the face of an appeal from Stoessel for mercy. The duel between the two generals is a not unnatural result of the many recriminations and charges developed during the trial of Stoessel.

## FORD AT THE CLUB

NOTED WRITER ADDRESSES MANY HONOLULANS AT LUNCHEON OF COMMERCIAL CLUB.

The spacious dining room of the Commercial Club was well filled this noon with an enthusiastic gathering of members of the Club and their friends to listen to Alexander Hume Ford who spoke in a general way on what should be done to make Hawaii, a place where everyone would want to come.

President Smith of the Club introduced Mr. Ford to the members as one who had travelled extensively, and who was a good friend of Hawaii.

Mr. Ford in opening his address said "that every one should organize himself or herself as a Promotion Committee and work heart and soul for Hawaii."

"When I was here before, Governor Frear told me to go ahead and do all I could for Hawaii, during my trip to Australia and New Zealand. While I was there I found that the promotion committee there were to open an office in New York and to do everything possible to get tourists as well as settlers in the country."

"I told them why not include Hawaii in the work and they were heartily in favor of the idea. This idea is to have Hawaii represented in their offices, and to have some one from here to be able to answer all questions pertaining to Hawaii, giving the chances here in a business way, and also what is to be seen if tourists were to stop off."

"Australia alone spends \$20,000 a year in advertising in American papers. New Zealand spends very nearly as much and I think Hawaii should be able to spend something to get people here."

"We want small farmers, plantation hands, and tourists here, and the only way to get them is to get out and talk about Hawaii."

"My idea would be to have Mr. Bonine make a trip all over the islands, take pictures of life on plantations and other industries and many other scenes of Hawaiian life and have them shown on Ellis Island, New York to the thou-

## HAYWOOD WAVES ANARCHY'S RED FLAG

PHILADELPHIA, March 2.—William D. Haywood, secretary-treasurer of the Western Federation of Miners, recently acquitted of the charge of complicity in the murder of former Governor Steunenberg, of Idaho, addressed a meeting in this city yesterday afternoon and another one in Camden last night. He did not dwell on his personal experiences, and his addresses consisted of bitter denunciations of wealth and the Republican party, and an advocacy of socialism. At the meeting in this city the names of President

Roosevelt and Secretary Taft were hissed. The afternoon meeting was held in the Grand Opera House, Broad street and Montgomery avenue, under the auspices of the Socialist party in this city. Four thousand persons filled the theater, many standing in the foyer. Several hundred more struggled for admission, but the police ordered the doors closed.

There was only one dramatic incident. There was only one dramatic incident.

## MRS. GREEN LEFT A LARGE ESTATE

WILL DISTRIBUTING \$50,000.00 WORTH OF PROPERTY IS FILED FOR PROBATE.

The will of the late Anna Green, whose death occurred on the 8th inst, was filed for probate this morning and J. M. Dowsett appointed executor under a bond of \$50,000.

An inventory of the estate shows property to the value of \$52,300, \$5000 of which is real estate and the balance in stocks of various concerns, including \$24,000 in Honolulu Iron Works shares, and shares of the Oahu Railroad & Land Co., and the Inter-Island Steam Navigation Company.

The will which bears the date of May 30, 1904, leaves \$3000 to J. M. Dowsett, nephew of the deceased, and names him executor of the remainder, the income of which is to go in full to a daughter of the deceased, Mary Emma Georgiana, wife of J. N. S. Williams, of Kahului, for the period of her life, after which the estate is to be distributed equally to Mrs. Williams' children, or their issue, or in case none of these named being living, to be distributed to the heirs at law of the deceased, share and share alike.

## PORTUGUESE ANARCHIST CASE

TRIAL OF LIBERDADE EDITOR FOR LIBEL IS BEGUN BEFORE JUDGE ANDRADE.

The most interesting case on the calendar this morning at Police court was the libel suit brought by G. Jose Morato against Jose F. Durao and the A Liberdade Publishing Co., for criminal libel.

The complaining witness and all the other witnesses in the case were ordered out of the courtroom during the trial of the case. Attorney Peters for the defense asked that the complaining witness be excluded from the courtroom, as in his estimation he only amounted to "a ripple on the water."

Attorney Correa who is prosecuting the case for the Territory, argued at length against the demand of Peters, but Judge Andrade decided that the request was according to law and ordered the witnesses out of the courtroom.

The case will probably last for another day as there are a number of witnesses to be called on both sides.

## The Thomas "Talked" Last Night With Honolulu

MESSAGE RECEIVED LAST NIGHT AT BARBER'S POINT WHICH BREAKS ALL ISLAND RECORDS FOR LONG DISTANCE TRANSMISSION—HILONIAN, THOMAS, ENTERPRISE AND HONOLULU STATION ALL EXCHANGE LONG DISTANCE MESSAGES.

U. S. WEATHER BUREAU,  
Honolulu,  
From Thomas, thousand miles at sea.  
Nine hundred miles from Honolulu at noon weather cloudy and fine; wind, northeast, force, three; sea smooth. Temperature, 74—Barometer, 30.04. Farewell—This will be all for tonight.  
"A. T. U."

Wireless Expert A. A. Isbell returned from experiments at Barber's Point this morning. He may go back this evening and receive sparks from the Thomas at 1,300 or 1,400 miles out.

"If conditions are good we will receive from transports up to the time they're off San Francisco," said Isbell today, "there is no reason," he added "with a station of power here and under good conditions, why Honolulu can't talk to San Francisco."

Isbell is not through testing at Barber's Point and has not yet decided where to locate the long distance station on this island for the Wireless Telegraph Company of which Clinton J. Hutchinson is president and J. A. Hatch manager.

Wherever the station is placed, say the local wireless people, it will be of the best and will be ahead of the times. A large aerial surface will be employed and land of several acres will be required. If the transmission of Jute from the Hawaiian Electric Company's plant in Honolulu, to wherever the station is to be, proves impracticable or too expensive the wireless people will erect their own plant and, perhaps, use superfluous power to light a town or for other commercial purposes.

There is no doubt in the minds of the promoters that the station will be in operation by the time the fleet gets here. If the navy wireless station at Guam is improved, Honolulu, relating with the fleet en route to the Philippines will be talking to Manila by wireless before the summer is out.

The coast of the United States is already fringed with wireless stations and Japan has a few. On January 4 The Star exclusively published a story regarding steamship companies awaiting the establishment of a generous sprinkling of wireless stations throughout the Pacific before themselves putting machines aboard their vessels. As far as steamship companies combining is concerned, the only combination likely is an understanding as to the use of the wireless, "the right of way."

Last night was a night for wireless wonders; conditions were perfect and, without interruption, force waves were propagated through the magnetic field following the curvature of the earth, so that the United States Army transport will erect their own plant and, perhaps, use superfluous power to light a town or for other commercial purposes.
