ADMIRAL CAPPS TO HONOLULU

Detailed Hither to Inspect Pearl Harbor Naval Station Site.
 THE PRESIDENTIAL NOMINATION.
 Republican Convention Has Fight Over Anti Injunction Plank.

WASHINGTON, June 16.—Rear Admiral Capps, Chief Naval Constructor, has been detailed to Honolulu to inspect the Pearl Harbor site for the naval station.
 REPUBLICAN CONVENTION.
 CHICAGO, June 16.—Preparations for the Republican National Convention have been matured. After the organization today there will be a recess of two days, during which committees will meet. The nomination for President will probably take place on Thursday. Taft is in full control of the committee.
 The names of Senator Dolliver, of Iowa; Vice President Fairbanks, and James S. Sherman of New York, are being discussed for second place.
 Five planks for the platform have been formulated—those upon trusts, anti-injunction, railway rates, tariff revision, and currency.
 Speaker Cannon is leading the fight on the anti-injunction plank.
 Hopkins of Illinois will be Chairman of the Committee on Resolutions. J. M. Dowsett of Hawaii, represents A. G. M. Robertson, pending his arrival, on the National Committee.

PASTIMES OF MAD MEN.

Some of the inventions of the insane are of scientific value. A patent at Villejuif invented a "pification machine" by combining a bottle, a plank, and small metallic tubes, to which he had fitted faucets. Having set up his machine, he produced leaves of bread the size of a man's head. The bread was good—so good that it was decided to make the machine known. One day when it was in action the doctor suggested taking a photograph of it. The inventor wrenched it apart, and trumped it underfoot. The invention—an exceedingly useful one—was lost, because no one had seen him make it, and no one dares speak of it to him. To allude to it is to bring on a furious attack. Most lunatics, no matter how contented they may be, generally cherish a furtive longing to escape. They collect wax from the polished floors, take the impressions of locks, and make keys from empty sardine boxes, spoon handles, or anything to be found. Dr. Marie's museum includes a collection of knives of strange and unheard-of shapes. Some of them have blades made from pieces of glass or slate and set in handles of corset steels. Objects harmless in themselves become dangerous weapons through the ingenuity of madmen.
 Insane sculptors are as common as insane painters. The insane sculptor hews out coarse statuettes, fantastic animals, ferocious little horned and grinning devils. An ex-mechanic carves all his coup bones. That his old trade is still in his memory is shown by the little screws that he makes out of the smaller pieces of bone. He works all day at his senseless and ridiculous task. Another lunatic, who believes he is the incarnation of the soul of Beelzebub, passes his time carving toy men out of wood. Each pair of his creations are joined together, now at the necks, now at the shoulders.—Harper's Weekly.

BAND CONCERT AT AALA PARK.

There will be a public band concert this evening at 7:30 o'clock, at Aala Park, with the following program:
 PART I.
 March—"Boots and Saddles" (new)
 Overture—"Fra Diavolo" (new) Amber Intermezzo—"Russian" Francke Grand Selection—"Lucia" Donizetti
 PART II.
 Vocal—Hawaiian songs, ar. by Berger Selection—"The Grand Mogul" Luters Polka—"The Elite" (new) Luscomb Finale—"The Mayflower" (new) Beyer "Star Spangled Banner."

CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY.

This remedy has been in use for over thirty years and has proved itself to be the most successful remedy yet discovered for bowel complaints. It never fails. Sold by all dealers, Benson Smith & Co., Agents for Hawaii.

LOYAL.

"Queen Elizabeth was the greatest woman the world has ever seen," remarked the historian.
 "That shows," remarked Mr. Meekton a little haughtily, "that you never met my wife."—Washington Star.

WEEKLY WEATHER BULLETIN

FOR THE WEEK ENDED MAY 30, 1908.
 Honolulu, June 1, 1908.

GENERAL SUMMARY.

The mean temperatures did not, as a rule, vary much from those of the preceding week. On Hawaii they were generally higher, with changes varying from -0.4 deg. to +0.9 deg., excepting +2.2 deg. at Kau. On Maui the changes ranged from +0.4 deg. to +0.8 deg. in the Lahaina, Hamakualoa and southern part of the Koolau districts, and -0.1 deg. to -1.1 deg. in the remaining portions of the island. In the Honolulu and Koolauloa districts of Oahu the changes ranged from -0.8 deg. to -1.4 deg., and 0.0 deg. to +0.5 deg. in the remaining districts. On Kauai the changes varied from 0.0 deg. to +0.3 deg. in the Kona, and 0.0 deg. to -0.3 deg. in the remaining districts. The changes on Molokai varied from +0.5 deg. in the interior to -0.58 deg. on the southeast coast.
 At stations having a record of ten or more years the total rainfall for the week was below the average 0.21 to 0.92 inch on Kauai, 0.07 to 0.42 inch on Oahu, excepting an excess of 2.04 inches at Manna-wili Ranch. On Hawaii the changes in the Kohala district were +0.66 to +0.70 inch, excepting -0.05 inch at Niuli; Hamakua -0.70 and -0.71 inch, Hilo -0.38 inch to -1.05 inches, and -0.22 to -0.45 inches in the Puna, Kau and Kona districts.

The greatest amounts of rainfall for the week were reported from the Koolau, Hamakua and Hana districts of Maui, the central portion of the Koolau district of Oahu, the southeastern portion of Molokai, and the northeastern portion of the Puna district of Hawaii and ranged from 2.05 to 4.37 inches. In the remaining districts the amounts, in inches, were: Hawaii—Kohala 0.96 to 1.62, Hamakua 0.07 to 0.12, Hilo 0.71 to 1.69, southern Puna 0.91, Kau 0.00 to 0.58, and Kona 0.90 to 1.06; Maui—Hamakualoa 1.06, and 0.00 to 0.23 in the Kula, Lahaina and Wailuku; Oahu—Koolauloa 0.39, northern and central Koolau 0.45 to 0.90, Honolulu, Waianae and Ewa 0.00 to 0.06; Kauai—Koolau and Puna 0.25 to 0.52, and 0.03 to 0.71 in the Kona; and central Molokai 0.24.
 The following table shows the weekly averages of temperature and rainfall for the principal islands and for the Group:

	Temperature.	Rainfall.
Hawaii	70.9 deg.	1.05 inches.
Maui	73.9 deg.	1.56 inches.
Oahu	75.5 deg.	0.75 inch.
Kauai	74.4 deg.	0.34 inch.
Molokai	72.9 deg.	1.62 inches.
Entire Group	73.1 deg.	1.05 inches.

At the local office of the U. S. Weather Bureau in Honolulu partly cloudy and cloudy weather obtained, with measurable rainfall on two dates, and traces on the remaining. The rainfall was .42 inch, .42 below the normal for the week and .17 less than during the preceding week. The maximum temperature was 82 deg., minimum 68 deg., and mean 75.0 deg., 1.0 deg. lower than the weekly normal, and .3 deg. lower than last week's. The mean daily relative humidity varied from 64 per cent to 70 per cent, and was 67.4 per cent for the week. The prevailing winds were E, on the 25th, 26th and 27th, and NE, on the remaining dates, and for the week, with an average hourly velocity of 9.6 miles.

U. S. DEPARTMENT OF AGRICULTURE, WEATHER BUREAU

The following data, covering a period of 33 years, have been compiled from the McKibbin and Weather Bureau records at Honolulu, T. H. They are issued to show the conditions that have prevailed, during the month in question, for the above period of years, but must not be construed as a forecast of the weather conditions for the coming month.

TEMPERATURE.

(18 years 1890-1907.)
 Mean or normal temperature, 77 deg.
 The warmest month was that of 1900, with an average of 78 deg.
 The coldest month was that of 1905, with an average of 75 deg.
 The highest temperature was 88 deg. on the 22nd, 1900.
 The lowest temperature was 63 deg. on the 1st, 1891.

PRECIPITATION.

(Rain 21 years, 1877-94, 1905-7.)
 Average for the month, 0.92 inches.
 Average number of days with .01 of an inch or more, 14.
 The greatest monthly precipitation was 2.40 inches in 1885.
 The least monthly precipitation was 0.24 inches in 1877.
 The greatest amount of precipitation recorded in any 24 consecutive hours was 0.81 inches on the 22nd, 1885.

RELATIVE HUMIDITY.*

Average 9 a. m., 67 per cent; average 9 p. m., 73 per cent (1893-1904.)
 Average 8 a. m., 66 per cent; average 8 p. m., 71 per cent (1905-7.)

CLOUDS AND WEATHER.

(18 years, 1890-1907.)
 Average number of clear days, 13; partly cloudy days, 15; cloudy days, 2.

WIND.

(Direction, 23 years; velocity, 3 years.)
 The prevailing winds are from the NE, (1875-94, 1905-7.)
 The average hourly velocity of the wind is 8.3 miles (1905-7.)
 The highest velocity of the wind was 24 miles from the E., on the 27th, 1906, (1905-7.)
 Station: Honolulu, T. H.
 Date of issue: May 28, 1908.
 *9 o'clock averages from records of Territorial Meteorologist; 8 o'clock averages from Weather Bureau records.

WM. B. STOCKMAN,
 Section Director, Weather Bureau.
