HANDSOME WAIST SET OF RICH LACE.

Side frills are seen everywhere. Milady wears them with her best tailored suit no less than with her pretty house blouse. The frills are of all shapes and of various widths. The one pictured here is about ten inches wide at the point. The frill, collar and sleeve frills are all of lace to match.

THE RED HAT COSTS \$5000

ROME, November 18.—There is now only a week before the creation of the three new American Cardinals and more than a dozen of other nationalities. The Eternal City is already astir over the great event. A cardinal has been defined as "the caprice of a pope," which is more true today than when it was first said, as the Pontiff now nominates almost without the advice of the members of the Sacred College, while in other times, each cardinal of the Curia (that is, living in Rome), was consulted.

On the day of the consistory the cardinal-designate waits in his apartments, dressed in beautiful robes, usually surrounded by friends, until the papal master of ceremonies formally announces the honor to which he is about to be raised and accompanies him to the Vatican.

In the old days, when news traveled more slowly than now, many a cardinal died before the news of his election reached him, while William Mykielefeld, a fellow at Oxford, was raised to the purple when already dead.

Cardinal Barnabo, on the other hand, forgot all about the consistory, and, on being searched for, was found hearing confessions while the court awaited him at the Vatican.

Every cardinal has two sets of robes—those for solemn occasions and those for ordinary days. The first consist of a red cassock, which sweeps the ground and is made of soft broadcloth in winter and of moire in summer. Over this a short lace rochet is worn, and a cape of the same material as the cassock. The shoes with gold buckles, the stockings, gloves and hat are also red.

The every day costume is much less gorgeous, but is also picturesque. It is composed of a short, black cassock, made with false sleeves and a simple cape, with red pipings, and buttons. The saeb, mantle, stockings and skull cap are red, while the hat, under which the skull cap shows, is black trimmed with red and gold.

Hats off to the women of California. Once more women have scored a victory for equal suffrage. California women now have the opportunity to make their influence felt at the ballot box, and new laws for the betterment of social conditions are expected to follow.

Having won this victory for themselves, they propose to educate themselves for public speaking. The Woman's Political League of California have suggested that women must have something to say, before going on the platform. It is going to be just a little less than treason for a woman to speak in public unless she is prepared.

Such action must result in making friends for the Woman's Political League. Those who have opposed the suffrage of women will change their attitude, when women demonstrate the fact that they know what they are talking about, and are seriously educating themselves for political responsibilities.

No women in the world are better fitted to assume these responsibilities than the women of California. Born of sturdy pioneer stock, and brought up in a rapidly developing country, they have inherited characteristics which make them particularly fitted for these new responsibilities.

California women have for years been considered the finest physical specimens of women in to be found in the world.

Beautiful because of splendid physique, clear eyes, ruddy complexion, and every movement suggestive of health.

Surely these women of sound bodies trained in the splendid educational institutions which California possesses, and the club life which is possible when school days are over, are splendidly equipped for the political field which they enter.

They are able to assume these new responsibilities. We hope they may demonstrate that women are capable and persistent in using the ballot for the best interests of the state.

The world is looking at you, California women. Set a new pace in politics.

When the time for refreshments came they fled into the dining-room and sat about the long low table which had been especially prepared for them. The table was loaded with candies, cakes, flowers and a horn for each of the thirty-five guests.

The birthday cake had four tiny candles.

Those who wished Allen Moore "many happy returns" were Jessie

The Matchless Modart FRONT-LACED CORSETS

We bespeak for the Modart Corset the attention of every woman who wears a corset of the front-laced variety. Experiment and experience have shown us conclusively that no front-laced corset yet devised so happily combines elegance, comfort and faultless accuracy of lines. This is also the consensus of opinion of those women who have examined this corset in our Corset Department and tested its merit by actual wear.

In Rome there are several restrictions on the liberty of a cardinal. For instance, he is not allowed to walk in the city, but he must have a two-horse closed carriage, and he can not leave town without express permission.

It is difficult to estimate the initial expense of being raised to the purple, because it much depends upon the individual, but a certain expenditure is obligatory. For instance, the new cardinal must pay \$422.24 for the cardinalate bulls, \$600 for the cardinal's ring, \$53.75 to the secretary of the Sacred College, \$215 to the acting master of ceremonies, \$64.45 to the Sistine Choir, which includes the payment for their singing at his Requiem Mass when he dies, \$53.75 to the priests of the Consistory, \$28.20 to the Master of the Wafer, \$53.75 each to the functionaries of the Sacred College, \$32.25 among the lackeys and chairbearers, \$37.55 to the household of the Cardinal Secretary of the State, and \$738.30 to the household of the Pope.

Then there are the liveries for his servants, furnishing of his chapel, his cross, and other ornaments, obligatory entertainments, and small fees here and there. Hence, his first expenses can not, even with economy, be much less than \$5000.

CANAL TO BE MADE SAFE. NEW YORK, November 17.—Panama canal will be the most brilliantly lighted waterway in the world. It is intended that the canal shall be as safe by night as by day, no matter how crowded its traffic. There will be 34 tower beacons, built of concrete, 57 other beacons, 37 gas buoys, 76 spar buoys and 7 nun buoys, a total of 251 lights. Every part of the waterway will thus be made clear.

In addition, a powerful light and fog signal will be installed on the west breakwater, near Limon Bay. One thousand acres of land will be cleared to afford the mariner an unobstructed view of signal lights at the terminals. With this wealth of illumination, it will be possible for ships to follow closely upon each other in all kinds of weather, and at all hours of the night.

Electric fans will insure the comfort of the birds.

The premiums this year include silver medals, cups, cash and "special" ribbons. Exhibiting at these annual shows is an opportunity to place stock more effectively before the people of the Territory. As the entries close tomorrow at five o'clock, those desiring entry forms or information should call at E. O. Hall & Son's today.
