It would be well for every tax-payer to digest the following Reformatory facts: Six thousand dollars were first appropriated to purchase land. Celebrated Champagnes &c., which land is not yet purchased; a second six thousand dollars for maintenance; a larger amount will be asked of the next Legislature; after which the whole affair will become a failure. How can it be otherwise? Is there one person in Honolulu who thinks otherwise? Do not the Board themselves anticipate such a contingency? And why? Because the said Board, no individual has the least pretension to experience in education spected by those interested. or educational matters-have not the common foresight and discretion to retain the services of an experienced master and matron, whose experience has doubtless clashed with some of their own crude and chaotic ideas; but have substituted a whole family, no member of which pretends to any experience or knowledge of the duties they have undertaken. Their only qualifications appear to be that they, six in number, are poor. Provision for the poor is doubtless one duty of the State; but sacrifice for that purpose the salary ing report is from the Gazette: of some useless officer, such as the Minister of Foreign Relation or the Minister of Finance, who would never be missed, except it were their gaudy would never be missed, except it were their gaudy uniforms—but not of an officer, who to quote heard by the Court and dismissed. again from the government press, was the "right Libellant.

NOTES OF THE WEEK.

A SAPIENT ENVOY .- In one of our exchanges received by the last mail, we find the following : A SANDWICH ISLAND FARM .- C. Coffin Harris, Esq. the envoy from the Sandwich Islands to our Government, has recently visited our city, his native place, after an absence of nineteen years. Six years ago he was the owner of two hundred and forty thousand acres of land in those islands. On his premises were some large volcanoes, down whose sides as far as the eye could reach, might be seen the courses of the lava. This, to be sure, was not well calculated for general farming purposes, but it is a variety in the romantic but few landholders can claim as their own. After a few years he sold the tract, about one-twelfth of the whole kingdom, for about \$5,000-making \$1,000 by his investment .- Portsmouth Journal.

It is a disgrace to the Hawaiian people that a man sent abroad in the capacity of Envoy Extraordinary should be circulating such absurd stories. The area of these Islands is nearly four millions of acres, so that his farm of Kahuku, which by the bye, gave him the soubriquet of "Duke of Kahuku," embraced only one-sixteenth of the land. The absurdity of his statement consists in the deduction which must be drawn from it, that if "one-twelfth of the kingdom" is worth only \$5,000, the whole kingdom is valued by its Minister of Finance at only \$60,000 ! If Mr. Harris could say less while abroad, it will be better for the credit of the nation.

KEEPING THE HOLIDAY .- Last week on Thursday, the wind mill of the Puuloa salt works started off on a bender, and about three o'clock, P. M., smashed to pieces. It can be repaired at some cost. THE TRASH DRIVER .- We briefly called attention in our last issue to a newly-invented machine, designed for stirring up trash while drying in trashyards connected with sugar mills. The inventor, Rev. Mr. Corwin, spent several weeks at Waihee last summer, and noticing the large number of hands employed in stirring up the trash, and remarked to Mr. Lewers, the proprietor of the estate, that the labor spent there must cost considerable and might be reduced if a proper machine was devised to perform first try the other horn of it, viz: that they have it. While riding to Ulupalakua, the subject of a machine for this purpose formed the topic of converservant of the Government, whose conduct, to use sation, and on returning to Waihee, a rude machine was constructed under Mr. C.'s superintendence, to them," to make way for the employment of an which worked as well as was expected. Mr. W. Duninteresting family, a member of which had the can has been engaged for some weeks in making a more perfect and substantial one, which appears to It is an old saying that when a Scotchman gets answer the expectations of the inventor. It consists of a strong frame about five by eight feet, set on four wheels, like an express wagon. Five cast iron cog wheels are used in its construction, and the power is obtained from one of the after driving wheels, the axle of which connects with the cog wheels and rakes. We transfer the Gazette's description of the working

of the machine : " The motion obtained by the rakes of the machine ter disregard for the feelings and services of is similar to the motion of the two hands, if one others, so that their own petty experiments may should stoop and sweep trash along, giving it a toss as it left the swing of the arms, or to that of a kick be tried, or some distant relative, or countryman by the foot. This result is obtained by applying the motion of a crank to that of a hanger. Two rakes, of three feet width, each, are suspended from a frame, the end of the long handle being attached to a crank The circular motion of the crank makes the head of the rake describe an ellipse, and as it passes the short diameter, it results in a jerk or kick. The rakes alternate in motion, and the crank is so constructed that the force required at the rake avoids the centre of motion of the crank. The power is obtained from one of the wheels-the square frame being mounted on wagon wheels-drawn by a horse. The rakes work very lively, throwing the trash away from the rear of the machine. A man, mounted on a seat which commands the lever that gears or ungears the driving wheel, will be able to do the work of fifteen men in the ordinary work of turning trash. A rough machine, made on the plantation some months since, was tried, and was found so satisfactory that the present more complete one has been constructed."

These machines can probably be made at a cost of about \$250, if it is found that a sufficient number is needed to commence their manufacture. As it requires only one horse and man to do the work of ten r fifteen Coolies or other laborers, it will be seen that the saving in one year will more than meet the original cost. It is by introducing such labor saving machines that our planters and agriculturists can economize in their expenses, and reduce the cost of their products. The trash machine above described has been shipped to Mr. Lewers, at Waihee, Maniof which (for their antecedents are well known) for whom it was made, and we suppose can be in-

FOR GUAM .- The brig Ana, which sailed on Wednesday for Guam, took away ten fine horses, to improve the breed of that island. She also carried two oil presses, one rice mill, one cotton gin, and other agricultural machinery. We are glad to see a trade springing up with that port, which has for many years been a resort of whalemen. The Ladrone Islands are twenty in number, of which Guam is the principal one. They belong to Spain, which has a Governor residing at Guam. They are located in about the same latitude as our own group, and in East longitude 144 to 145°. Five of the islands are inhabited, and are said to be very fertile and well
