187,546 piculs. Reporting the price, Meurs. Peele, Hebbeil & \$4 for per picul nominal, at which designs would sell. Some sales of superior have been made at \$4 50 per picul, but designs more ask more. Unclayed kinds, \$2 50 per picul for Taxi, and \$2 50 for Ceba."

The above quotations will show the price at which Manita can be obtained, viz., about 34 cents per pound for No. 1, and about 2 cents for reinery grades. Our planters can see from this what they have to control with. The risks attending the fong wyage from Manda to Sun Francisco are large, and raise the cest of the sugge to alread the same when landed from Man-

ther as when obtained from this group.

Rice was selling in Manila at 195@29 reals per cavan. Confage was quoted at \$13 56 per picul. Coffee had advanced some, and sales were reported at \$14 63 per pingl-about 11 cents per pound.

The bark Ethan Alles had sailed from Manila for Australia with a cargo of sugar.

REAL ESTATE SALES. The executors of the estate of the late R. C. Wyllie, sold at agetion on Wednesday last several tracts of land situated on Kauni and Onhu. Mr. C. S. Bartow was the auctioneer. The terms were cash, and the particulars will be interesting as indicating the value of real estate in the Islands.

No. 1 was a tract of 3,200 acres of came and pasture land, in the village of Koho, Kasmi, running from the sea to the mounains, in length four miles perhaps, and mostly under lease for thirty years to parties now occupying it. It sold for \$6,500, the regtal being equivalent to about 12 per cent, per annum on s amount paid. Considering that it comprises some of the best cane land in Kolon, it sold very low, about \$2 an acre. No. 2 was a tract of 25 acres of hill-side pasture land, at the

head of Manon, almost inaccessible, and about four miles from to entrust their liberties to his careful protection, as town. Paul Jarrett was the purchaser at \$190, or about \$7 60 they did once before, enabling him to show the white No. 2 was a tract of seven acres of pasture land, adjoining the premises of Musers. Bernard & Raymond, in Ewa; bought by the above parties for \$75.

No. 4 was a tract of seven acres of good saro and pasture by the unfortunate affair of the Captain of the Neltie with fish pont. Bought by Victor Chancerel, whose land Merrill who attributes his troubles mainly to the it adjoins, for \$225, or \$32 per acre.
No. 5—a small tract of kalo land in Ewa-bought by vice of gambling, to which he had become a victim.

We understand that the police authorities have ob-No. 6-a small parce of kalo land to Ewa-bought by Kama tained from him a full expose of all that he knows in No. 7-seventeen acres of kalo land in Ewa-bought by I. regard to the gambling haunts of this city-who keep

Montgomery for \$315. No. 8-two acres of kale hand-bought by the same for \$135. The whole sale realized \$7,610, and showed that kale land is valuable property, and in good demand, while pasture land is while pasture land brings only from \$2 to \$10 per acre.

SALE OF LIBRARY HALL.-The brick house on Maunaken street, long known as Liberty Hall, together with the fee simple of the limit, was sold on Saturday last by C. S. Bartow, for and protecting the rights of innocent women and children of those engaged in this lawless and infatua-\$2,200, which is probably not one third of the cost of the prop-LOCAL COMMERCIAL We are without a single arrival the past week from foreign

ports, and with vory few from domestic ports. The weather

the been calm, cost and pleasant, the trade winds being entirely integrapted, as usual at this season. The American schooner Sun Liego sailed on Wednesday for Fan Francisco, with a small freight. She has been in the employ of the United States Guano Company for the past two years as a packet cunning to How and's Island. We undertand that the Company has disposed of the right to take off grano to an English Company, who will have its own vessels fine pleasant run to and work the gando at its own expense. We observe that a Tuesday morning.

On Thursday Mr. Burtow held a farge sale of staple English goods, received by late arrivals. Although the terms were very to from 65 to 60 °, and at Capt. Paty's residence in Nuuanu as low as 57 ° on Wednesday morning. A hearly, and prices were hardly up to late quotations. There seems to be no disposition among traders to increase their stocks so long as the present stagnation in trade exists. The birth Celestis is the only packet on the berth loading

cargo of McKean's Island grano sold in Savannah recently for

We are without later dates from San Franches than those song at by the Celestin, January 5th. The clipper ship Belvideor may touch here early next kong, and bring us further advices. Gold at latest quotations was 1314.

COMMERCIAL ITEMS. New York consumes a thousand barrels, or nearly a mil-The passenger cars on the railway from Moscow to St. Pe-uraburg are two stories high, the upper story being used for Septing at night.

Beveral failures have occurred in New York in the China trade. The Post says there have been several failures in firms, all due to speculations in gold.

To show how icon steambouts are superceding woosien ones, it may be mentioned that only forty of the latter were built in England last year, while two handred and eighty-three iron steam vessels were built. The Sucs Canal people only want a hundred millions (of france) more, and with that sum they piedge themselves to complete their work. This, it will be remembered, is the fourth hundred of millions they have asked for; they have al-

CULTIVATION OF SUGAR IN AUNTRALIA.—An "Ex-West ladian Sugar Planter" writes as follows from Cardwell, Rockingham Bay, Queensland: With regard to sugar cultivation, have no doubt whatever of its success in this district. The case flourishes equally well, if not better than in the West In-lies. The ground being new and rich, gives at present a termendous case, but a few crops will being them to a more re-

mendous came, but a few crops will bring them to a more respectable size. The juice from large overgrown cames is more difficult to crystalize. The great difficulty which I expected to encounter was that of labor—for the present, however, successfully solved by the introduction of South Sea Islanders, who work hard and are easily managed. But if a large industry arises we shall have to go to Singapote for Chinese coolies. I have not the slightest doubt as to our ultimate success here as the raw material is so luxuriant, and I hannot but wonder when I see people near Brisbaue paying enormous same -£10 to £20 per acre—and wasting time in clearing and grubbing inferior hads while there are rich plains here into which you can put a plow and take of a crop at once.

The Sender's Cape or 1867.—The Sorgho Journal says: From most of the case growing regions in the West the reports upon the condition of the crops are gloomy enough. In a few localities and small precincts, here and there, the elements seem to have been more propitions, and the came appears in a fair condition, but these more favored places are few in number and limited in area, and in most of them the spring was ler and finited in area, and in most of them the spring was unfavorable, as in other places, so that the quantity of came planted was small, and the stand poor. In the Eastern States the spring was, as with us, wet, cold and backward, deterring many from planting, and the stand poor. In the Eastern States the spring was, as with us, wet, cold and backward, deterring many from planting, and preventing the seed that was planted from making a good stand. Since the 1st of August the Atlantic court has been exposed to incressint rains, much like those which prevailed throughout the West at a corresponding period last year. These have kept the canes green and growing, and have prevented then from maturing at the proper time, so that they must be harvested in an immuture state, or left standing as they will be in many cases, until overtaken by a freezing and destructive frost. This state of things is rather disheartening to those who have enfisted in the sorghum army, and it will doubtless cause a few timid souls to "go back" on the enterprise, and call it a lost cause. But there is no fear that any great number will desert and leave the ranks. We have most with a reverse, and our forces are slightly demoralised, but we don't propose to surrender; on the other hand, the little backset we have had will atimulate to greater preparation, and store earnest efforts in the future. The road to great accesses always leads through a Buil's Run, and this is the full's Run crisis in our sorghum campaign. Its effects will be to test our interest in sorghum campaign. Its effects will be to test our interest in sorghum campaign. Its effects will be to test our interest in sorghum campaign. Its effects will be to test our interest in sorghum campaign. Its effects will be to test our interest in sorghum, give us a better appreciation of its value, and the first toucher, and on little disturbance of one of a coon ection with it. The truth is, we have gone on some year to your, making from twenty to forty million gales of syrup with so little trouble, and so little disturbance of the ordinary farm economy, that we do not realize the magnitude or approximate the importance of the business. If the pro-nection of sorghum syrup required two or three times as much stlay and trouble as is naturally bestored upon it, we should stlay and trouble as is naturally bestored upon it, we should state the discouragement at any temporary reverse. estimate it much more highly, and should be probably less in-clined to take an discouragement at any temporary reverse. It is probable that one effect of the comparative failure of the sorgham crop this year will be to sift out and relieve the business of a class of caroless, half-hearted operators, who have always been a drawback to the business. The only way these men can advance the interests of sorgham is by abandoning it forever, and we shall heartly rejoice if they can be induced to favor us with a little help in that way.

Paper Money and the Legislative Candidates.

day last, is a notice issued by Messrs. Rhodes,

Boyd, Pinehasa Wood and Makalena to the electors

of this district, asserting that the first three, who

posed to the issue of paper money. We insert a

" Again, Capt. Rhodes, Mr. Boyd and Mr. Pine-

hasa Wood were the representatives who strongly op-posed the defeated Paper Money Bill during the last

Legislature, and they will as strongly oppose it, if

brought up again during the coming session; so will Mr. J. W. Makalena."

Now this does not tally with the records of the

last Legislature. Mr. Rhodes did, indeed, oppose

the issue of notes by the treasury, in the way in

issue of two hundred thousand dollars in notes.

"A PAPER ISSUE BY PRIVATE PARTIES.

WELL BASED AND THOROUGHLY GUARDED, I

WOULD FAVOR, but I am not in favor of the Gov-

ernment going into any such matter. Now I come

to one of the remarks made by the Minister of Finance

when he stated that the faith, honor and credit of the

Government were not considered as good as private

dence and loyalty to the Government, but can differ

on such a matter from ministers and honorable gen-

tlemen. There is something in passing an act to issue paper money, and in the execution of it after it goes

into effect. My attention was mostly drawn to the

fifth section of the bill, as it is contrary to the laws of

the country, and that is one of the reasons why the

bill is incomplete. Although I am not in tayor of the

Government issuing paper money, YET I WOULD FAVOR A BILL FROM WEALTHY PRIVATE PAR-

TIES, WHERE THEY WOULD HAVE TO DEPOSIT

A CERTAIN SUM AS BONDS IN THE TREASURY

SO AS TO PROTECT THE PEOPLE AGAINST ANY

LOSSES. * * * I consider it improper to enter

into speculations with Government money. It may

look very well upon paper, but when put into execution would look different. This is the sole objection

I have to the Government issuing paper money. If

they issued this paper money it would make the com-munity feel very hard towards them. But if paper

money was is uel by private parties who had nothing

PAVOR SUCH A STEP, as it would bring capital

There is certainly no ambig ity here. Mr.

Rhodes appears to have opposed the bill before

the House simply because it was not rightly

money by " private parties." Therefore, all that

the Ministers have to do is to bring in a bill altered

vernment concerning it, I SHOULD

curing a delegation opposed to paper money in any form; while those who vote the opposition ticket may find themselves deceived, and during the next two years see some paper money scheme saddled on to the country. No one now knows that any such proposition will be brought forward, but it may be; and if it is, it is safer to have delegates whom the people can trust.

The facts should be known, and no one should vote without being thoroughly posted up regarding the views of those whom he votes for.

Alaska or Russiana.

So little is known about the newly-acquired Russian possessions of the United States, that the following facts relating to them which we have learned from Mr. Alex. Smith, who was recently connected with the U. S. revenue cutter Lincoln, will be of interest to our readers. The vessel was one of several despatched by the American Government in July to take formal possession of the new territory. The coast north of Vancouver's Island, is lined with an almost continuous chain of islands, which make a sound or enclosed passage along the shore, varying in width, but affording a safe and pleasant route for steamers. ting vice, to say nothing of the rights of honest tra- The Lincoln took this inner route.

The town and port of Sitka are on an island of the same name. The harbor is small, and appears to have been selected on account of its convenient location for trading with the Indians. The climate is exceedingly unpleasant, rains and fogs prevailing almost constantly. During three months that the Lincoln was there, the sun-ap-

peared only on eleven days, The country is very heavily wooded with large pine and other trees suitable for ship building and lumber. These trees grow down to the very water's edge along the shore of the sound, and so dense is the shrubbery that it is next to impossible to find a place to land. Along the coast, the country is cold and inhospitable, but miners sent it there as much milder, and more pleasant.

Kodiack Island, which lies about five bundred miles due west from Sitka, has a very different climate. It is 75 miles long by 50 miles wide. Here vegetation of all kinds flourishes, pasturage abounds for cattle and horses, and any of the vegetables grown in temperate regions thrive. Port Constantine has a most excellent harbor, and is capable of being made a strong naval station, for which, owing to its milder climate, it will undoubtedly be preferred to Sitka.

Kodiack Island being located in the center of the fishing banks, where cod and other fish abound, must one day become of some importance. Whales also abound here and along the islands which skirt the shores of the Peninsuh of Alaska. While near Onolaska Island (which is off Cape Alaska) twenty-eight whales were counted in one day. As a whaling ground Mr. Smith thinks this sea and the neighboring islands will be more frequented than formerly, America and England, the idea of introducing when the Russians strictly forbade whalers coming it into France has not yet been thought of. The near the shores, and the Indians from trading with them. Potatoes and all kinds of vegetables as also beef and mutton, being obtainable in abundance at Port Constantine, this will be another inducement for whalers to cruise in that

Coal abounds along the shores of Alaska. On a small island near the east shore of the peninsula of Alaska, a Russian steamer procured over thirty tons of good fuel, with no other implements than the rude picks and crowbars they had with them. On Sitka also, a valuable vein were members of the last Legislature, were op- of coal, seven feet thick, has been discovered, and the probability is that it abounds along the entire coast. This will give an impetus to steam navigation along the north-west coast.

Kodiack Island lies due north from Hawaii about thirty-eight degrees of latitude, and probably the passage from Honolulu to it can be made in about the average time required to run to San Francisco. It will not be many years before business relations will be opened between Honolulu and Kodiack.

which Mr. Harris proposed, and by which the There can be no doubt that copper abounds in latter promised to make forty thousand dollars a the mountains of the late Russian possession, and year out of the people for the Government by an probably the mining of it will soon be com menced. The ore is said to be unusually rich But Mr. Rhodes was equally outspoken in facor and abundant. If so, this alone will create a of paper money if issued by private or wealthy considerable commerce and traffic with that counparties. In order to remove any doubts on this try. Now that it is open to American enterprise, point, we will quote from one of his speeches on if there is wealth in its mountains and waters, it the subject, delivered in the Assembly on the 2d will not be long before it is developed.

The Fire Department.

Monday next, February 3, will be the anniversary of the re-organization of the Fire Department on its present basis, and as such will be observed by it as a holiday. At 10 o'clock the companies will appear on parade, and after marching through the city, will proceed to the premises of J. I. Dowsett, Esq., near the prison, where a feast will be provided for the members and their in-

The Department, as now organized, consists of three fire engine companies, one book and ladder and one hose company-in all about two hundred and forty members. The engines are all of the latest and most approved Boston make, two of them being nearly new; and each being considered among the most powerful machines ever con-

Some lection of precious stones in a rough state, among lessons valuable to the Hawaiian Islands might which I might mention almandine or garnet, be learned from a country whose productions it is vermillion, or sulphur of mercury; hyacinth, or | not impossible they may some day excel. garnet; jasper, malachite, blood-stone, agate, Those who vote this ticket will be sure of se- rock-crystal, emerald, chrysoberyl, opal, sardonyx, onyx, amethyst, zircone, topaz, ruby, sapphire, diamonds, chrysoprase, margasite, labrador, jet, amber, lapis-lazuli, peridote, iolite, &c., &c.

In the gallery devoted to Raw Materials.

We find some great coal specimens, and iron and copper ore; a crown made of borax is a conspicuous object; sulphur, medicines, candles and soap. There is an immense block of soap, and some beautiful wax flowers; there is a large mineral collection from the county of Cornwall, and polished red, blue and grey granite from Aberdeen; platina apparatus and precious metals, malleable cast metals, and a great quantity of nanufactured produce. Besides these, England has a fine exhibition of oils and chemicals, and raw naterials of every description.

In the large wide gallery devoted to Labor and Machinery.

sha! find a great quantity of objects to interand instruct us, but our stay must be very short. The steam engines here, of which there are seventeen, belonging to as many exhibitors, excite attention by the strength and finish shown in their construction. Engines are to be found in the Palace, in the annex of the Park, and at every name and description take up a large space sombre green with gilt fillets and ornaments is exhibited by Messrs, Laurie and Marner, Mr. Mulliner exhibits a deep-blue covered caleche with green and yellow coupé. Mr. Thomas has a parasol caleche, the cover of which will open and shut like an umbrella, very pretty-a model of grace and lightness. The Irish jaunting car, which from my experience in Ireland, I can teschines, machines for making all kinds of cloth, and machines at work making brick, and stamping candy which is being manufactured. One sees here all the coast illuminations of Great Britain and Ireland, and revolving lights and lightbouses, as well as telegraphic cables. One of these large arrangements for preserving

life in cases of fire in America and England attracts considerable attention from the French. It is an enormous tressel bed, furnished with cushions, cords, and pullies, one of the extremithe victims of a fire have merely to let themselves slip in order to escape and reach the ground. machinery has rendered most valuable service in machines which are exhibited here for grinding rags, and machines for winding cotton and thread. from Manchester, are worthy a close examination. Centrifugal pumps and engines are at work here. and a small-sized Ningara Fall unites its music with the incessant vibrations of shafts, the grinding of wheels, the rumbling of engines, the shocks of pistons, the groaning of working beams, the hum of human voices, and the sweet tones of the large and powerful organ above. Before leaving this concert we will take a look at a machine in movement for needle-making, exhibited by Mr. Millward, of Worcester, one of the most distinguished English manufacturers, who in 1855 received a first class medal for the same object.

The English Colonics are well represented throughout the exposition. The principal objects from Canada which merit attention are fors, woods, Indian ornaments, and sleighs; but Canada presents nothing curious. Nova Scotia and New done to stop the horrid vice? If the parties can be Foundland send a large exhibition of grains, pilot exposed it will be doing the community a real benefit; bread, skins and fors, and a large collection of stuffed birds. They also make pianos in Nova | the Captain of the Nettie. Scotia, for I noticed one from there which was tried by a very fine performer. Australia sends hald, and delivered to her owners.—Gazette. some shawls, specimens of gold and diamonds, and On Wednesday, the Captain of the .V. ttie Merrill a model of the Welcome Nugget weighing 2217 oz., was brought before Judge Davis, and having waived valued at \$50,000, and found in 1858. There an examination, was remanded for trial at the May are also some excellent wools, tobacco, cotton, term of the Kauai circuit court. Bail was fixed at and flour exhibited, as well as silk. But the \$5,000. object of most interest from Australia is a tall pyramid in the gallery of common arts, representing the aggregate bulk of gold obtained in the Colony of Victoria during fifteen years from 1851 to 1866. This pyramid is ten feet square at the base, and sixty-two and a half feet high, and represents a total value of \$730,287,220. Being of

gold, it is a very conspicuous object in this gallery. The Island of Mauritius attracted my attention in passing through the Great Exposition. It has sent an excellent exhibition of its fruits, and to any one interested in sugar it would claim considerable attention. It would do the eyes of your hard-working sugar planters good to see the specimens of Mauritius sugars which are here exposed to the gaze of the world. C. Wiehé & Co., exhibit 8 specimens from cane juice. "In these specimens the cane juice has been extracted by a steam mill of 20-horse power, treated with sulphite of soda in the proportion of 1 lb to six barrels of juice, purged by steam, and boiled with one or two pounds of lime according to the quality of the juice, and then drawn off; it was afterwards evaporated in the ordinary batteries, up to 25° Beaumé, then boiled in the vacuum pan and purged in the turbine." E. Icery exhibit 3 specimens. Hon. H. Pilot "14 boxes of vesou and syrup, made in vacuum pan and purged by tur- Honolulu Fire Department. Per order. CHAS. T. GULICK, Secretary. bines, without use of animal charcoal or filters." Messrs. J. D. Constantin & Co., three specimens 1st, white sugar large grained; 2d, ditto, smaller grained; 3d, syrup sugar. In the end, the people kept and always as ready for use as in cities where stance." These sugars resemble common crushed OOLONG POCCHONG TEA. For Windward Pours Per Kilmen, Jan. 27—Miss My would have to suffer in the same way, to the tune considered the same way, to the tune of \$40,000 a year, and perhaps even to a greater strong, C. H. Lewers, J. Louzads, F. W. Hutchison, Dr. J. M. Smith, F. H. Harris, Mrs. T. C. B. Rooks, A. S. Wilcox, J. Hall, A. S. Cleghorn, T. E. Cooks, Capt Brown, Mr. Betz, Dr. J. Wight, and the control of the REST CANTON machine called 'a triple effet.' boiled in grain in

the vacuum pan, and purged in the turbine." "Hon, C. Anteline has three specimens: First boiling, second boiling, and third boiling. Sugars made from the cane juice purged and boiled in the ordinary batteries, and then concentrated in the vacuum pan, and then passed into the erystallizers, and afterwards finished in the turbine. The clairce in the turbine was in the proportion of one bottle of water for a charge giving fort in these articles, but England undoubtedly 75 lbs of sugar." Belzim and Harel have six specimens: "The first four specimens are from cane juice boiled in the ordinary batteries, treated land are skillful workmen, at least one would the use of filters, animal charcoal, or any chem-

> attention is being turned to the banana or plantain for the purpose of furnishing a material for manufacture of paper and cordage. Should it come into use this group could supply thousands of tons of the material, which now is considered as worthless :

BANANA FIBRE.-By the following, it appears that

PLANTAIN AND BANANA FIBRE.-A Jamaica newsaper says that a gentleman in that island has red a letter from eminent manufacturers in New ork, concerning some samples of plantain and bana fibre recently forwarded to this city. One of anufacturers, who writes on behalf of the others. tates: "The character of the Liantain and banana ibre, has been pronounced by leading "flaxmen" as uite equal to this material for textile purposes, Paper men say it would make the finest descriptions of paper, but think it even too good for the purpose. thers say it would be invaluable for cordage; and all agree that a great deal of money would be made by it if it could be supplied in sufficient quantity, and

at a reasonable cost."

The fibre in question has been already tested practically in other countries. In England paper of the finest quality, and as strong almost as parchment, has been produced from the plantain fibre. Cordage has n made from it, so strong, light, and durable, that purpose. At the first Paris Exhibition it attracted small degree of attention, and received special otice in the report prepared by the Council of the Exhibition, the result of which was that dealers and manufacturers of note came down with liberal and ressing offers to induce extensive shipments to Eu-But the easy-going Jamaieans, with their Billancourt, where the trials in agricultural ap-characteristic apathy, neglected the opportunity thus repretus take place. Conches and carringes of afforded them of adding a valuable article to their list of exports.

A gentleman who has lived in Jamaica informs us in this gallery. England stands A No. 1, in this that thousands of tons of this valuable fibre might department of industry. Mr. Aubert exhibits a easily be exported from the island every year. What very elegant dull-green calcohe; and another of for expressing the juice from the stalk of the plant with expedition and thoroughness. American inventiveness could easily supply this want, and such a machine would find employment not in Jamaica only, yellow fillets, and Messrs. Ival and Laye show a this continent, in all of which the plantain and banana out throughout the whole of the tropical regions of flourish perennially, furnishing a staple article of food to the inhabitants, but in none of which is the valuable stalk of plant converted into fibre or made any use of whatever .- N. Y. Specialor ..

BARRATRY .- The schooner Nettie Merrill arrived tity is a better car for seeing the country from from Kauai last Saturday, with the Captain under than for riding in, is largely represented here. arrest, charged with having made an attempt to run others who have been in the interior repre- In a word, there is a very fine assortment of car- away with the vessel. The schooner left Honolulu as riages here from which to take a pick. Scattered usual on the 16th inst., for Kauai, with passengers | Palut & Varnish Brushes, Steneil & Artists' Brushes about this gallery one finds here, as in the French and freight, which were distributed along the ports from Kolea to Waimea. At the latter place the Car tain took on board several casks of water, and some bags of rice and other provisions, and telling the persons desiring a passage up that he would pick them up at Koloa, took his anchor and went to sea. Instead, however, of heading towards Honolulu, he steered towards Niihau, and, in the channel, informed his mates and crew that he did not intend to go again to Honolulu, but was bound to Manila. Those who would consent to go peaceably he would pay, on reaching Manila, \$100 each, but those who would not go should be landed on Niihau in passing. The mates and crew were Hawaiians, and did not offer any apparent opposition to the project, as developed by the ties of which is placed obliquely against the ward until the island was nearly out of sight. At this Captain, and the vessel was kept away to the southwindows of inhabited chambers, and upon which time the perilous and unlawful scheme upon which they were embarked seemed to have made its impreson their minds, and their fear of the Captain was overcome by their fear of other consequences, During the ten years that this simple piece of and the second mate, with the crew, determined to seize him, and take the vessel back to Kauai. Watching an opportunity, the second mate tripped him, and ropes, and, having disarmed him of the only weapon had-a pistol-turned the schooner again for Waimea, where she arrived after an absence of three

days on her unlawful voyage.

This attempt at decomping with the vessel was evidently not a premeditated and matured scheme, but, rather, must have been an impulse, resulting from a lesperate condition of mind, as the Captain had neither confederates, money, nor arms, to help him along in his rash project. He has hitherto borne a fair character as an honest, energetic, and successful coaster, and no one would have suspected him of thus suddenly making a criminal attempt to go off with property intrusted to his care.

The explanation of the affair, by himself, reveals that on leaving Honolulu the last time down, he was bling, having lost considerable sums of money, (all of his own savings,) and appropriated money belonging to others. It is the old story of yielding to temptation and reaping disgrace. Our letter from Kauai says

"The Captain seems thoroughly broken down. both in mind and body, and says that he is no thankful that he did not get away. What a curse gambling is? Can not something be but if not exposed, then it will not be long before the ruin of others is as thoroughly consumated as that of

The vessel was placed in charge of Mr. Salem P. Handchett, of Waimea, and by him brought to Hono
