An Address by the United States Centennial Commission.

To the People of the United States: The Congress of the United States has enacted that the completion of the One Hundredth Year of American Independence shall be celebrated by an International Exhibition.

Originating under the auspices of the National Legislature, controlled by a National Commission, and designed as it is to "Commemorate the first Century of our existence, by an Exhibition of the Natural resources of the Country and their development."

That the completion of the first century of our existence should be marked by some imposing demonstration, we believe, the patriotic will of the people of the whole country.

It is designed to bring together, within a large hall, the products of the soil, the products of the mines and of the sea, and the products of the intellect.

Every citizen of the United States is invited to participate in this grand exhibition, and to bring with him the products of his industry and his art.

The Commission looks to the unflinching patriotism of the people of every section, to see that the exhibition is a success, and that the people of every section are represented.
