Albert Saleen is not doing much just now but when he does move around it is with difficulty and with care. He has a sore toe which makes locomotion very inconvenient. He was working in the field with a disc Monday and had gotten off of it to remove some trash which had collected. In remounting he had gotten his foot in the wrong place which resulted in one of the blades cutting through the shoe and into the foot in such a way that the great toe was cut almost off. He was brought to Dr. Burnett's office where the wound was dressed and it is hoped that it will heal without amputating the end of the toe.
