QUITTING GERMANY.
All but Two American Insurance Companies to Withdraw.
(Copyrighted, 1894, by the Associated Press.)
BERLIN, Sept. 22.—The matter of the American life insurance companies doing business in Prussia, so recently affected by the new law requiring, annually, definite information on oath as to the dividends and surplus accumulated for the benefit of those insured under the Tontine plan, seems now about definitely settled. The Mutual Life and the Germania, of New York, will be the only American companies that are able, under their systems, to conform with the rigorous requirements of the new Prussian law and they, therefore, will continue to do business as such new business as they can. The Germania is the only American company in whose business Prussian contingent plays a vital part. The Equitable of New York has definitely decided to keep the law on its books, but the new insurance is concerned, and the enormous and very costly building owned by that company in Berlin (the only structure in this city entirely built on American principles, and which cost about \$1,000,000, was soon to change hands. The Equitable, though, the Prussian business is of no great account, since it formed but a small part of its total business, are similar in the case of the New York Life, which has also definitely retired from Prussian business.

Why Sherman Moved East.
McClure's Magazine.
General Sherman was always making little speeches. He had to it was demanded of him. He was no orator, but he said original things. His words were crisp, to the point and never to be forgotten. When the family were preparing to move from St. Louis to New York Sherman said: "I must see people; I must talk." He loved St. Louis, but that was only one New York I begged a trifle from his little room before he went—that room in which he had so often sat late at night, alone with him and listened to the music of his talk. He took a bronze paperweight from his desk, and gave me a little figure of General Grant that had been on his desk for many years. General Sherman's appreciation of Grant knew no bounds. "That is the one level-headed man among us all," he said or night.

To Serve Fish.
New York Evening World.
Fish is a dainty food. Fracture is needed in serving it. Lightness of touch and dexterity of management are necessary to keep the delicate flakes of fish from falling apart. The fisherman's art requires some skill to rip the skin and lay it back and sever the head and tail with neatness and dispatch. The fisherman's art never leaves the matter; they belong to the cat. The choicest morsel of fish is the cheek, which is cut in the form of a diamond. The fisherman's art is to cut through a fish. Begin at the tail and throw aside the skin. Begin at the head and cut through the skin. When the meat on that side is helped, turn the fish and help the other side in the same way. If there is for a part should be served each person. Boiling is the nicest way to cook and the easiest way to serve. Boil the fish in a silver platter with hard egg and sliced lemon, tomato and beets.
