WHEAT WAS ERRATIC SHARP ADVANCE AT THE CLOSE RESULTING IN A GAIN OF 3-8C.

Change in Weather and Prices Declined—Provisions Higher. CHICAGO, Sept. 23.—Wheat acted erratic to-day. It was weak at the opening, then firm, then weak again until just about two minutes from the close, when there was a sharp recovery of about 1/2c per bushel.

On Saturday, there was no apparent cause for the sudden advance, but it was due to the very much smaller increase in the visible than had been looked for after the short continuation of the buying after the short sellers had got to the end of their ropes.

Wheat was a trifle weak at the opening, with sales 1/2c to 3/4c below the close Saturday, but the decline was quickly checked and soon fully recovered. When the visible supply was posted the market showed a good deal of strength and sold 1/2c above the low point, early.

The comparative strong tone the market maintained was something of a surprise; the news outside of the visible supply statement seemed decidedly bearish. Liverpool was weak and 1/2c lower, domestic markets heavy and 1/2c to 3/4c higher.
