

GOSSIP FROM ABROAD

WHAT BRITISHERS HAVE BEEN DOING IN THE PAST WEEK.

Close of the Stag-Shooting Season—Crystal Palace Dog Show—Gladstone to become a Cyclist.

(Copyright, 1896, by the Associated Press.) LONDON, Oct. 24.—The weather continues unsettled. Snow to the depth of a foot has fallen in many parts of England.

The stag shooting in Scotland is nearly over, and the "champion stag" fell to Lord Tweedmouth, who shot his head during the season. The United States ambassador, Mr. Thomas F. Bayard, who has been visiting the Earl of Leven at Glenferness, is said to be much pleased at the fact that he has slain a royal stag, which is considered a great achievement over his performance while grouse shooting in 1885, when, it is alleged, he accidentally shot a man who was beating up the birds.

The last work which the late Archbishop of Canterbury was engaged on was the preparation of an answer to the bull of Pope Leo XIII on the Anglican orders, in which Dr. Benson said: "The positiveness of the assertion may still have effect on some who mistake the kindness of a personage for the thawing of a frozen church policy to which he is committed." The late primate denied the Pope's contention, and asserted that Rome has not as accurate knowledge as England concerning the Anglican, and declared that the bull should be decided by a pretension to unity, and by assertions which have historically created the widest and deepest schism, but to draw closer to greater faith, in firmness and forbearance.

The showing made by the Kennel Club at the Crystal Palace last week was the largest on record. There were 2,377 entries of quality of the highest order. A novelty in the exhibits was Pekin spaniels, which were on sale from \$10 to \$50. In the Collie class the celebrated dog "Southport" (a female), valued at \$2,500 (\$2,500), won all the prizes. George R. Sims won the championship in the bull dog class with his dog Barney Barnato.

The strange case of Mr. and Mrs. Walter M. Castle, of San Francisco, still causes much comment, and the action of Magistrate Newton in fixing their bail at \$100,000 is accepted as the court's belief in their guilt. Whether this is so or not, it is a remarkable fact that an English woman of high position charged with a similar offense was immediately bailed on only \$1,000. She is Mrs. A. M. Scott, a lady of the Manor of Salford, near Salford, and was charged on Wednesday last with stealing five plated candles from her home.

At the twenty-first annual exhibition of the British Dairy Farmers' Association, at Islington, during the past week, there were over seven thousand entries. A special effort was made by the Earl of Powis to induce the British dairymen to imitate continental methods. Model dairies—Swiss, Italian and French—were shown in operation beside a British dairy. There were 165 butter-making contests and the largest show of cheese ever made here.

The Duchess of New Castle has established herself in the East End of London, in order to devote her spare time entirely to the poor. She has erected in the district a house called "St. Gertrude's Home," where all unfortunate persons can find help.

Sketch says that Mr. Gladstone is about to become a cyclist. His little grandchild, Dorothy Drew, rides well, and it is explained that her learning to ride has so fascinated the veteran statesman that he is determined to enjoy himself in the same manner.

The Empress Frederick is to visit the Queen at Windsor in the middle of November and will stay in England a month before going to Berlin for the winter.

Mme. Antonio Navarro has given up her residence at Tunbridge Wells and is shortly to leave Wimbledon, where her last child was born, for her new home, on Broadway, Westchester, N. Y. Mrs. Navarro has taken a fine old house on a lease twenty years ago and has already spent over a thousand pounds in improvements and decorations.

The business of the principal West End theaters continues good. Miss Fortescue, at the Standard Theater, in the East End, has been doing fairly well in a round of classical and comic dramas, which includes "Forget-me-not."

The music halls have been crowded owing to the unusually strong attractions in the most popular variety artists such as London (engagement at the front) with his musical and dramatic employment at Christmas Danimines.

Mrs. Patrick Campbell has been offered the lead in G. Bernard Shaw's "The Philander," which has been accepted by the Haymarket manager to follow "The Red Rover."

Wilson Barrett's novel, founded on "The Sign of the Cross," is to have the advantage when published of an introduction by a high dignitary of the church, in which will be discussed the devotional dramas. Mr. Gladstone's letter on the play will be printed in a fascinating manner to the book.

Beecham Tree, who has been playing a remarkably strong attraction in the provinces, has now settled definitely the details of his engagement in London. The business department of the company will sail for New York on Nov. 7, the company itself following a week later.

The last performance given in the Theatre Royal, London, on Monday, Oct. 20, was "The Growth of a Nation," a play by Mr. Alexander, which has no new plays.

Mr. Alexander has written to Mr. Charles Frohman canvassing to relocate the Birmingham Academy, to relocate the Birmingham Academy, to relocate the Birmingham Academy.

to the pleasure of the children and the anxiety of parents and guests who filled the gallery. The ices were served in forms, and those which held candles were lighted. Favors for the guests were red, white and blue ribbon flags. About two hundred children were entertained. The costumes were exquisite and dainty, and the varied colors and charming scenes.

The party was one of the most beautiful ever given for children in this city.

Mr. and Mrs. Kern of Kokomo, are visiting their son and his family on Lake street.

Miss Gertrude Moore returned last week from a month's Western trip with her aunt, Mrs. Dobyns.

Miss Lillian Siler, of Terre Haute, is a guest of Mrs. James B. Zink, of National avenue.

Mrs. Louisa H. Legler, of Evansville, is visiting her mother, Mrs. J. J. Hart, on Washington street.

Mrs. Goe will go next month to Kansas City, Mo., where she expects to spend the winter with relatives.

Mrs. David K. Carver, who has been spending two weeks with friends in Alexandria, Ind., returned home yesterday.

Mrs. Frank Lacy, who has been visiting her parents, Mr. and Mrs. Iden, on Church street, since last April, returned yesterday to her home in Poplar Grove, Ark.

Mr. E. P. Wise and family arrived in Irvington Friday from their home in Marshall, O. Mr. Wise will begin his pastorate of the Downey-avenue Christian Church next Sunday.

The Irvington Literary Club met on Friday evening at the home of Dr. and Mrs. A. B. Benton, on Downey avenue. An enjoyable feature of the evening was the reading of an original story by Mr. George Coleman.

The Irvington Tuesday Club met at the home of Mrs. H. H. Graham on last Tuesday evening. Mrs. E. W. Brown read a paper on "The Reign of Henry III," and the subject of "The English Reformation." Conversation was led by Mrs. Nona Moorhead, on "The Friars."

The Irvington Woman's Club was entertained at the home of Mrs. Elizabeth Tompkins on Monday afternoon, at its first regular meeting of the year. The paper for the afternoon was read by Mrs. Grace Clark; her subject was "Women, Old and Young." An interesting conversation followed on "Our Great Women," led by Mrs. Tompkins.

Butler College Notes. Miss Ollie Phares, ex-'94 of Oxford, has returned to continue her music study.

The third preparatory students have elected their officers. The officers elected are: President, Mrs. J. C. McGee; Vice President, Mrs. J. C. McGee; Secretary, Mrs. J. C. McGee; Treasurer, Mrs. J. C. McGee.

Miss and Mrs. James L. Zink gave a party in honor of the Betas from Indiana University, who were here for the ball game, at their home on National avenue, Friday evening.

The library of the Demia Butler Society has been presented to the college, the society having disbanded. The collection consists of over a hundred valuable books, which are now being catalogued in the college library.

The freshmen met Tuesday at noon, and organized with the following officers: President, Ethel Blount; vice president, May Griggs; secretary, Carl Loop; treasurer, Anne Butler; music, Mrs. J. C. McGee. Their colors are light blue and red.

The senior class met last week at the home of Miss Howe. The officers elected are: President, R. A. Bull; vice president, Mrs. L. Christian; secretary, Mabel Hill; treasurer, Mrs. E. G. Ginn; poet, Jessie L. Christian; prophet, Laura Bennett; historian, Esther R. Curry; marshal, T. R. Shipp.

Miss Marjette Kies is Miss Bridges's assistant in the English department. Her duties are in Daniels' class. Her doctor's degree was taken at Ann Arbor, and she comes to Butler from Hillsdale College, where she taught for seven years. Five of the seniors are taking special work in Anglo-Saxon with Miss Kies.

Miss Carrie R. Howe has taken the presidency of the Y. W. C. A., in place of Miss Dorothy Pender, who is attending college. Twenty new members have been added to the association since the opening of college. Miss Howe, Miss Sybil Smith and Miss Mary Deary will go to Greenacres to attend the annual Y. W. C. A. convention.

Mr. and Mrs. Scott Butler gave a reception to the students at the Butler house, on Downey avenue, on Tuesday evening. They were assisted in receiving by Miss Elizabeth Tompkins, Mrs. J. C. McGee, Mrs. J. C. McGee, Mrs. J. C. McGee, Mrs. J. C. McGee.

The first rehearsal of the Choral Symposium, which will be held Monday evening at Plymouth Church. About fifty of the leading singers of the city were present. Several choruses from the "Lutheran" were studied under Mr. Arens's direction. The song "The Chorus" is particularly fine and the reading ability unusually good.

The next rehearsal will be to-morrow evening at the St. Paul's parish house, corner of Illinois and New York streets.

The first of the artist recitals at the Memorial Church will be given Tuesday evening. The program will be played and some of the best arrangements of compositions by this writer will be played.

"Parsifal".....Vorspiel "Siegfried".....Procellantion march "Walkure".....Maele Frie Scene "Gottentemmer".....Siegfried's Tauermarsch "Die Fliegende Hollander".....Mosen Spinner "Tannhauser".....Lied "Tannhauser".....Overture

The first symphony concert, conducted by Karl Schneider, will be given Monday, Oct. 27, at 8 o'clock. In place of Mr. Swift, who is very ill, concert master Hugh McGehey will play the grand piano, which is available by Ernest. The program will be: Part I—Symphony No. 2, in G major, by Joseph Haydn (a) Adagio-Allegro. (b) Allegretto. (c) Menuetto. (d) Allegro Spiritoso. Part II—Otello Fantasia, for violin, with orchestra, by Max Bruch. (a) Romanze. (b) Serenata. (c) Moszkowski from "Oberon." (d) A. M. V. Weber American Plantation Dances, op. 23 (first time in Indianapolis). Maurice Arnold No. 2, Allegretto. No. 3, Corallo. No. 4, Allegro Moderato-Vivace.

Children Well Trained. New York Commercial Advertiser.

Two recent anecdotes cast an interesting light upon the ideas of Queen Victoria and of her children. The first of these up of their children. The first of these up of their children. The first of these up of their children.

The carriage, for the mere pleasure of seeing the officers of her suite scramble past each other in a mad race to get up the carriage, for the mere pleasure of seeing the officers of her suite scramble past each other in a mad race to get up the carriage.

At another time the Prince of Wales was riding on horseback in company with his father. He omitted to return the salute, and his father, who was respectfully removed his hat to the Prince Consort directed the heir to the throne to turn about and salute his noble future subject, which he dutifully did.

The Homing Sense. James Welr, in Lippincott.

Evidence of this sixth sense are to be observed in animals of exceedingly low organization. On the subject of the homing sense a water-house, I saw the little creature then swim a short distance away and take shelter behind a small bit of mud, where it remained for some time, and then, after a short while, much to my surprise, the young again swam to the Hydra, again pursued a land, and again swam back to his hiding place. This occurred three times.

The house probably died under observation the first time by accident; but when it again took to the source of its food supply the second time and then returned again to its sheltering bit of mud, it clearly evidenced conscious memory of route and sense of direction.

Insure your property with Frank K. Sawyer, 74 East Market street.

HOW TO MAKE SINGERS

ELECTRICAL INVENTION BETTER THAN SVENGALE'S HYPNOTISM.

Prime Donne of the Future Will Carry a Battery and Electrodes for Assisting the Voice.

New York Journal.

Dr. William Harvey King, of this city, in an article in a recent medical weekly, has given the results of some remarkably exact experiments in widening the range of the human voice by the application of electricity. The Svengal of the future will be not a hypnotist, but an electrician. Trilby, up to the twentieth century date, will not sing her "Bon Bon" with the wild, mesmeric eyes of the master gazing at her from a proscenium box, charming her, forcing her voice, whether she will or no, up into the stratosphere since last April, returned yesterday to her home in Poplar Grove, Ark.

It will be a very simple matter, with the new and improved apparatus, for a singer to touch almost any note in the scale, without reference to what sort of voice or what order of the human vocal organs is required. Vocal music need no longer be written with a view to the range of the human throat will be made to perform.

LIMIT OF THE VOICE. Hitherto it has been the general belief that the capabilities of the human voice were limited to just what muscular generation could be attained by dint of careful instruction and persistent practice.

The recent electrical experiments disprove that antiquated notion completely. "There are cases," writes Dr. King, "in which the training of the voice by different exercises will not avail, for the well-known law of muscular development, that in physical exercises a muscle develops just in proportion to its power to absorb the impulses of electricity as a voice producer and voice modifier—as a complete master, in short, of vocal possibilities, has been proven beyond any doubt that electricity will make of the human vocal organ whatever sort of an instrument is required."

Their theoretical demonstration of it all is amazingly simple and experimental, and upon a great diversity of voices show results which cannot be gained. The larynx, the real voice organ, is nothing more or less than a musical box. Sound is due to vibratory movements of air. The volume of the sound, its intensity, its pitch, or note, depends upon the rate of vibration.

In stringed instruments, complex or simple, the height of tone depends upon the tension of the string, or the length of the vibrating portion, or the weight of the string. The shorter they are the less their density, the greater their tension, the greater the rate of vibration, the higher the note.

Now, in the human voice the singer has the power, by certain muscular movements to so change the length of vibrations produced by the vocal cords, that they are of half-dozen lots only.

Ladies' good quality All-India Handkerchiefs, 3 widths hem, usually sold at 10c each; Linen Day price, 50c FOR ONE-HALF DOZEN.

The Linen Day price for the 12 1/2 kind will be 10c FOR ONE-HALF DOZEN.

Sheer Linen Handkerchiefs, also, dainty All-India Handkerchiefs, to trim with lace, regularly sold for 25c each; Linen Day price, 13c FOR ONE-HALF DOZEN.

Men's fine All-India Handkerchiefs, with 3 widths hem—the 15c kind, Linen Day, at 65c FOR ONE-HALF DOZEN.

The 25c kind, Linen Day, for \$1.33 FOR ONE-HALF DOZEN.

The 35c kind, Linen Day, for \$1.79 FOR ONE-HALF DOZEN.

THE ELK PATENT. Here is where the electrical apparatus comes into play. As Dr. W. H. King, an expert upon this important subject, has set forth, it is by the external application of the electric currents to the larynx that power of tension is given to the muscles that they can be contracted far beyond any contractile capacity that they would have naturally or be able to attain by practice.

There must be a sufficient chest capacity to produce the vibrations, and the blast of air through the glottis, and the blast of this blast of air must be obtained directly upon the vibrating chords, leaving no open space for any air to escape. To produce a high rate of vibration, and hence a soprano, there must be:

All the different functions of the vocal cords are controlled by muscles. Their strength, quickness and power of endurance give both quality and power to the voice. To provide these in a degree beyond what the muscles naturally possess is the mission of electricity.

The New York Store Established 1853.

EVERYWHERE YOU TURN

In the store to-morrow there will be special lots of goods at very special prices. Everything has been planned to make to-morrow and the coming week notable for bargaining here. Read below of the Special Prices in

Cloaks and Millinery, Colored and Black Dress Goods, Silks, Etc., Etc.

EVERY LINE BELOW IS INTERESTING

LINEN DAY IN HANDKERCHIEFS

Realizing that this is the time for you to buy linen handkerchiefs to embroider for holiday gifts, we have decided to make to-morrow linen day, and shall offer Ladies' and Men's Linen Handkerchiefs in half-dozen lots at special prices. These prices are much below the usual cost and are for half-dozen lots only.

Ladies' good quality All-India Handkerchiefs, 3 widths hem, usually sold at 10c each; Linen Day price, 50c FOR ONE-HALF DOZEN.
