

"BILL" WOOD DONE FOR

DESPERADO AT LEBANON MORTALLY SHOT BY OFFICER FROST.

President Burns's Efforts to Settle Glass Workers' Trouble-Attempted Suicide in Prison.

Special to the Indianapolis Journal.

LEBANON, Ind., Nov. 23.—Policeman George Frost shot and fatally wounded William Wood shortly after 7 o'clock to-night. Wood attempted to interfere with the officer, who had John Paragan and "Jen" Miller, two chums, under arrest for breaking up a dance at a village east of here Saturday night. Frost had his prisoners in the city building awaiting the arrival of Mayor, when Wood came and entered into a whispered conversation with Paragan, after which he left the room. Soon after his departure Paragan and Miller started for the door, pushing the officer out before them. On the sidewalk the officer drew his revolver. Wood, who was unarmed, except that he carried a whip, whipped out and, placing the muzzle at the officer's temple, said, "No, you don't George." Frost promptly turned around and Wood opened fire. After the latter had shot twice the officer pulled the trigger of his weapon. Wood's bullet went into his chest, striking the heart and salivary gland. The officer's revolver refused to work after the first shot. Wood continued to fire until the chambers of his weapon were empty, but only one shot struck the officer, and it inflicted a slight flesh wound. Wood and Miller were placed in jail but Paragan was released and was saluted later. Dr. Porter examined Wood's wound and pronounced it fatal and his death bed statement was taken by the prosecutor. Wood was a bad character, and officer Frost is not censured in the least for his act.

BURNS AT HARTFORD CITY.

Glass Workers and Manufacturers Still Disagree.

Special to the Indianapolis Journal. HARTFORD CITY, Ind., Nov. 23.—Business circles in this city were quite active to-day. President Simon Burns, of the Window Glass Workers' Union, arrived at this morning and held interviews with business men who hold credit certificates. He took the amount they held and then held a conference with the workmen. Burns says the situation has not changed as far as the men are concerned, except that Burke, who had accepted their terms and begun blowing glass last night. He declared the claim for an advance in wages was just, and that the manufacturers could afford to pay it. He says if Burke and other small factories can pay the scale, such concern as the Hartford City Glass Company, with its 108 pots and its facilities for making glass cheaply, will accept the advance and go to work. He said his chief object here to-day and the meeting this afternoon is to get the men and employers satisfactorily with the merchants. He will go to other glass towns west of here to-morrow. It is thought that Burns will endeavor to get the smaller concerns throughout the West to accept the scale of the Eastern factories to go to work.

George T. Perkins, of Akron, O., John J. Kocakowski, of St. Paul, Minn., and R. Johnson, of this city, directors of the Hartford City concern, held a meeting to-day but found no common ground.

Are X Rays Dangerous?

SPECIAL TO THE INDIANAPOLIS JOURNAL. HIWATHA, Kan., Nov. 23.—Miss Carrie Liebig, who submitted to an X-ray test of her foot, has had to have that member amputated at the ankle as a result of the exposure. The doctor who conducted the test, which was conducted by Prof. Blake, of the State University, at Lawrence, advised her to be careful, but she was not.

What Prof. Blake Says.

LAWRENCE, Kan., Nov. 23.—Prof. L. L. Blake was interviewed here this afternoon on the outcome of the Liebig case at Hiwatha. He said that a test to ascertain the trouble in a disease of the ankle had been made by means of X rays by him six weeks ago. He had not heard from Miss Liebig since until to-day. His experience led him to believe, he said, that the amputation was the result of the deflection of the X rays, and that the deflection was caused by the disease of the ankle. In all his experiments, and on every case he has treated, he has never observed a deflection of the X rays. The present operation was performed Oct. 3, and photographs were taken of the ankle. The deflection of the X rays, he said, undoubtedly caused the abscess.

SAN FRANCISCO, Nov. 23.—The inventor of the mysterious air ship which has been puzzling local scientists and others for the past week, and told me that he had tested the merits of the ship in last night's storm, with great success; that the wind currents were very contrary and the test was one that tried the merits of the machine in the hardest possible manner, but it came out of the ordeal in good order, having braved the storm as well as any bird. He started from the locality where the vessel is housed and flew over Alcatraz and cut through the Golden Gate skirting off the side of the bay, and was seen to fly over the seal rocks for fully ten minutes, and placed his searchlight on the sea. He has tested his intention to make another trip this evening, probably over the same ground, starting out as far as the flying machine.

PLANS OF AN OCTOPUS

SMALL MANUFACTURERS OF WIRE NAILS TO BE STRANDED.

Markets to Be Flooded by Members of the "Combine" in Order to Crush Out the Little Fry.

SPECIAL TO THE INDIANAPOLIS JOURNAL. CLEVELAND, O., Nov. 23.—The small manufacturers of the country will be forced to feel the effect of the wire nail combination on their necks. Beginning to-morrow the pool will discontinue paying subsidies to the wire manufacturers to keep them out of the nail market, and consequently the market will soon be overflooded with wire nails. The manufacturer who entered into this gentlemen's agreement was to receive that sum, the money coming through the combination, and the sales being made by the officers of the pool, who have their headquarters in Boston. The output of each mill was fixed by these officers, in order that the supply of nails should not exceed the demand and thus bear the market. The sales being made through the office of the pool, which was a woman credited with \$1.50 for each keg sold, the difference between the pool price and the market price was paid into a trust fund and invested in good interest bearing securities. This surplus fund has reached \$100,000, and is being used to buy up the whole. What will be done with it only the pool knows, but it is believed that it will be used in subsidizing the pool manufacturers while the small fry are being strangled out of existence.

What the Treasurer Says.

BOSTON, Nov. 23.—H. P. Parks, treasurer of the nail association, when asked regarding a dispatch from Chicago stating that the Wire Nail Manufacturers' Association has dissolved, said it was substantially true. The nail association, he said, had lived much longer than its most sanguine promoters expected, and as a financial undertaking had been an unprecedented success. Its present abandonment, he said, is not due to any conditions in the organization, but to the fact that the growth of outside competition which has made the business unprofitable. "We do not think it would be wise to continue to continue a policy," he said, "which has been a financial failure. The story that the association has large obligations which it is unable to meet is entirely untrue. The only obligations such an intimation is a reflection on the honor and good faith of the nail manufacturers."
