They put the relics of a hundred years thin her ears:

on her silken gown some rare old lace They deftly place; They hang a fortune on her throbbing breast,

An old bequest

And on her feet are slippers worn before In days of yore; About her arms the glistening bracelets show

Of long ago:

Beneath a coronet, so old and rare, They blind her hair. And under all this record of past days

There softly plays A giriish heart that truly yearns to be

Forever free; And Love is there and beams within her eyes

And fervent cries:

"Ah, heart! our time will surely come at last When this is past;

The world looks only at the gems you wear; Ah, heart! Take care!"

QUIT WHITE BREAD

Could Not Get Strength from It.

An Episcopalian minister of Ellenville, N. Y., who is interested not only in the spiritual welfare of his congregation, but in their physical well-being also, says, "I and feel am using Grape-Nuts breakfast food and have quit coffee entirely and am using Postum Food Coffee.

"Myself and family are all greatly improved in health. We have largely abanuse of white bread. Upwards of twenty-five persons have changed their given, because I know, from personal experience, whereof I speak."

It is a well-known fact that white bread | Champe. Election of officers. is almost entirely composed of starch and this is difficult of digestion by many people, particularly those who have weak intestinal digestion. The result of the use of bread is a lack of brain and wer to do mental work and it also creates intestinal troubles, because the excess of starch ferments in the intestines and makes the conditions right for the growth of microbes; whereas Grape-Nuts breakfast food contains the needed starch, but in a predigested form. That is, it is transformed into grape sugar in the process of manufacture, and delivered in the packages, ready cooked, and in such shape that it is immediately assimilated without hard work of the digestive organs.

The food also contains the delicate particles of phosphate of potash which, combined with albumen, is used by nature to make the gray matter that must be in the cells of the brain and the nerve center throughout the body, in order to giv strength and ability to stand long and con tinous work. Both the Postum Food Cof-fee and Grape-Nuts are sold by all first-

The children are rather nimble-witted, but when the body begins to be mature it dominates the mind. It seems likely that thus the largest element of the race is to find its place in the field or in the lower stages of craft work. The Zulu type ap-pears to me fit for anything that the ordinary men of our own race can do. They remain through life alert and with a capacity for a vigorous reaction with their associates. From them may come the leaders of their kindred of them may come the leaders of their kinited of less masterful quality. From the Arab type we may expect more highly educable people than is afforded by the other distinct groups. They have more delicate qualities. They lack the whole-some exuberance of the ordinary negro, which is commonly termed "bumptiousness."

A Proper Restriction.

Harper's Weekly. Harper's Weekly. The law is the State of New York now regu-lates (by forbidding) the publication of letters or private papers found among the effects of persons who have been dangerously hurt, or have died suddenly, or committed suicide, unless a coroner directs such publication as a means of identifying the dead or discovering a crime. This law, which the Governor signed last week, is in timely restraint of a species of publicity which was sometimes very cruei, for the prac-tice has been to look upon papers found on the unknown dead as the proper loot of sensational newspapers, to be printed without regard for the reputation of the deceased or the feelings of any survivor.
