The only | break. The total of smallpox cases in solution for the deadlock appears to be for the War Office to introduce conscription, or withdraw the new regulation regiments. These have stirred up strife to an extent which has not existed for many a year between the government officials and the voluntary arm of the service, and according to many officers will bankrupt a majority of the regiments.

According to the new rules, every regiment must go into camp for one week each year, and the government grant will be reduced in proportion to the number of absentees from the camp. The volunteer commanders say it is impossible to get more than 40 per cent, of the men together the same week, so different are the occupations of the volunteers. In addition the War Office refuses to recognize drills which are not attended by a percentage of men which it has hitherto been found quite impossible to attain, and imposes battalion parades of such strength that there is no drill hall, or drill ground in London large enough to enable the battalions to maneuver. Among those who condemn the new regulations is Col. Eustace Balfour, a brother of the Cabinet minister, A. J. Balfour, who commands the London Scottish. The matter will be brought before Parliament, and if the order of the war secretary, Mr. Brodrick, is not amended, the volunteer force, so the colonel of one of the strongest London regiments says, will awindle to nothing. In the meanwaile the War Office is still waiting anxiously for an answer to its call for additional troops for service in South

The Daily Telegraph indorses the fiscal proposal published in the Times of yesterday to the effect that increased taxes upon tea and sugar might be imposed, as well as a tax of one penny a gallon on petroleum and one shilling a load on timber, and that the shilling duty on corn might be restored and that this latter might even be doubled. The Telegraph points out that the imports of petroleum in 1901 amounted to 250,000,000 gallons.

#### American Genius and Money to Give Europe Something New.

Frank W. Hawley, vice president of the Erie Canal Traction Company, has been on this side several months quietly securing concessions for the operation of European canals by electricity. The Erie con-cern to-day secured control of about 5,000 miles of canals in England and on the continent. # WEST INDIAN SUGAR QUESTION.

#### Countervailing Duty to Be Considered by the British Cabinet To-Morrow.

LONDON, Jan. 11.-There will be a Cabinet meeting here Monday which bids fair to be most fateful in the history of the West Indies and may eventually affect the United States. Lord Salisbury and his colleagues will then decide whether Great Britain will put a countervailing duty on sugar. Colonial Secretary Chamberlain impeachable evidence of the West Indian authorities that if this step is not taken the sugar industry in the West Indian islands will be dead within a year and the West Indies hopelessly bankrupt. The conference will also report that there is no | part. likelihood of the continental nations abolishing bounties unless Great Britain declares her intention of imposing countervailing duties should the bounties be continued. The preliminary sessions of the Brussels sugar conference have convinced the British delegates that the continental sion. powers only desire to amend the bounty system, and that this is chiefly due to the hope of placating their own consumers. The best informed opinion gathered by a reporter inclines to the belief that the Cabfnet will not consent to the imposition of I countervailing duties for fear of raising a storm of internal criticism from the old The memorandum which Mr. Chamberlain will present on Monday is worded more in

LONDON, Jan. 11 .- The manager of one of the largest transatlantic lines was asked by a representative of the Associated Press to-day if he expected an unusual number of Americans to be present in London at the mer route. time of the coronation of King Edward. He said: "No. By May I fear we shall have such a smallpox scare and epidemic that Edward is crowned."

That this is by no means a pessimistic forecast, is evidenced by the fact that the line referred to began this week to have the crews of its ships vaccinated prior to leaving London for New York.
