Hogs Irregular and About Ten Cents Lower-Sheep Active and Steady-Condition of Other Markets.

UNION STOCKYARDS, INDIANAPOLIS, Aug. 9.—Cattle—Receipts, 1,250; shipments, 500. The receipts of cattle thus far this week have been comparatively liberal, the total indicating an Increase of 1,200 over the same time last week and nearly 500 over the corresponding time a year ago. The receipts to-day were almost 200 larger than a week ago and fully 500 smaller than a year ago. As usual for several days past, the arrivals consisted principally of cattle on the feeder order, or a kind that were just a little below the requirements in flesh and weight. The proportion of cattle that were desirable for killers was small, and females of that description sold usually on a basis of steady prices. There was very little inquiry for fat steers, and been reported. There was some inquiry for stockers and feeding cattle, but the demand was could not have made a clearance even at lower prices. The best feeders brought about steady prices, but there was no fixed value for the under grades, and prices were very irregular, but generally considered lower. To salesmen and owners the market was very unsatisfactory, and conditions indicate rather lower prices for

been very uneven. A powerful and influential speculation combination has made determined efforts to advance prices and to awaken a general speculative interest in the market. Their method was to concentrate their buying and manipulation on one stock or small group of stocks at a time, proceeding from one to another on each successive day. Following the advance, there was in each case heavy realizing, which carried the price back while a new point of strength was developing. These movements had no specific new development to account for them, and the campaign was avowedly based on the general promise of prosperous conditions for the country for the coming year by reason of abundant crops and undiminished business activity. The movement encountered several obstacles during the week, but the market offered good resistance to the variveloped in the course of the declines.

> tion of the dividend on the preferred stock, which would result in the dissolution of the voting trust. In the money market problem interest has centered this week on the question what substitute will be offered this autumn for the relief that has been afforded by Treasury Department measures for several years. The government refunding law, with the bank note expansion, included large increases of deposits of government funds in national banks, purchase and retirement of bonds by the government, and these have all been resorted to until it is believed the available supply of government bonds has been swept from the market or reduced to such small proportions that any considerable demand lifts the price to a point where it is unprofitable to use them either as security for bank circulation or for government deposits. The large growth in the government receipts from customs is proving sufficient to more than offset the reduction in internal revenue taxes by the abolition of the war taxes. The government's surplus revenues therefore threaten to make troublesome requisitions on the money market again, while the available means of relief are much exhausted. This

> immediate future. Convertible and speculative bonds have been active during the week, and have moved in sympathy with their related stocks. United States new fours advanced 2, the old fours 1, the twos and threes % and the fives 1/2 per cent, as compared with last week's closing call.

DOMINANT INFLUENCE IN THE GRAIN PITS AT CHICAGO.

All Cereals Close at Good Advances-

CHICAGO, Aug. 29.-Frost scared the grain shorts to-day, and as a result there were fair advances all along the line. As a matter of fact, there were no frosts in the country, but the Northwest was reporting such cool weather that speculators May, 724c. Corn dull and stronger; cash, 61c feared possible damage. Another bull factor was the likelihood that September options were oversold, especially in oats. At the close of rather dull trading September wheat was %@%c higher, corn %c up and oats %c advanced. Provisions closed 10c

Wheat ruled strong after a momentary easiness at the opening. Cables were weak on brilliant weather, and Minneapolis reported a decline of 1c in spot. Grading of new wheat receipts at that point also was said to be splendid. Offerings were very light, however, and the fears of freezing weather brought a sharp upturn. Calgary reported the temperature at 32. The local crowd showed no disposition to sell, save late in the day for profits. Commission houses bought fairly. The market appeared oversold from the effects of the bear movement during the last few days of fair weather. Corn strength had a stimulating effect. September started 1/401/4c down to a shade up at 69%c to 70c, and advanced to 70%c. Late there was an easing off on profit taking to 70%c. The close was firm, %@%c up, at 70%c. Trading was not heavy. Local receipts were 261 cars, none of contract grade; Minneapolis and Duluth reported 356 cars, a total of 617, against 571 last week and 795 a year ago. Primary receipts were 972,00 bu, compared with 1,123,000 last year. Seaboard clearances in wheat and flour equaled 527,000 bu. The seaboard reported eight loads taken for export.

Corn felt the effects of the imaginary frosts even more than wheat, although the market was irregular. At the start a fairly heavy selling movement developed and September broke from 56%c to 551/2c. Lower cables, favorable crop reports and improving receipts were the causes. Then came fears that the cold weather would swoop down on the green corn fields. Shorts were frightened. For a time everybody wanted to cover and prices jumped quickly to 57%c. After that trade hung somewhat idle and fluctuations were narrow. The close was strong, %c up, at 57%c. Receipts were 49 cars, six of contract grade. Oats shorts were scared badly at the opening. Under the rule of the board it takes white oats of certain weight to fill new style contracts. Chicago has practically nothing of that grade. Oats were reported badly damaged by rains in Illinois and Iowa, and this, together with the cold weather talk, sent the shorts scrambling for cover until September jumped from 3314c to 3456c. Other months also were per cent.; time loans. 566 per cent. Clear- strong. Toward the close there was a fair realizing selling movement and prices eased off a trifle. September closed strong.

Only the approval of the Secretary of planned to extend the plers from Thirteenth to Twenty-third street-1,000 feet, The harbor line is to be moved westward 200 feet and the river narrowed to 2,700 feet between the New York and New Jersey lines. This improvement will keep many of the large steamship companies from transferring their anchorage to Hoboken.

The hearing at New York before Special Examiner Mable, in the Peter Power suit, brought to prevent the turning over of the stock of the Northern Pacific Railroad to the Northern Securities Company, was brought to an abrupt conclusion yesterday when D. W. Guthrie, counsel for the railroads interested, asked for an adjournment sine die. Under the ruling of the court all the testimony taken in the case has to be filed with the clerk of the United States Court in Minnesota on Monday next.

The average level of prices for stocks have advanced this week. A detailed inspection of the changes shows them to have

ous reactions, as good buying demand de-Much solicitude was expressed at various times over the capacity of the money market to carry the speculative campaign through the period of expansion in the needs of the circulation, the heavy movement of funds to the interior reinforcing this feeling. The speculative leaders, however, professed confidence in the capacity of the money supply, and the call money rate, by its stability, helped to bear them out. It was obvious, however, that the rising prices were taken advantage of at all stages to effect very heavy realizing on the part of previous speculative buyers. An impression was prevalent that the heavy dealings were resulting in the transfer of holdings from stronger to weaker hands. It so happened that two of the untoward developments of the week came in the midst of heavy speculative buying in the stocks immediately affected. The reduction of the Gold 114,490,372 dividend on Reading first preferred came while Reading was being bought eagerly in one to six thousand blocks, with the natural result of heavy unloading by disgusted speculators which turned the whole market weak. The active advance in Atchison, Eleven Transfers Made Matter of also, was checked by the publication of the report of net earnings for July, showing a heavy decrease compared with last year, but the quick relaxation of the heavy selling pressure was very notable in these stocks, as in others, buyers apparently
