Two weeks from to-day. Two weeks from to-day the election will be held. Every election is important, particularly one of unusual importance...

Republicans who have business away from home should arrange it so as to be at home to vote two weeks from to-day.

During the next two weeks every Republican should devote some time to efforts to extend the period of prosperity by helping to get out a full Republican vote.

The heavy registration in New York city in the Republican strongholds and in the cities up the State on Friday and Saturday is hailed with delight by the Republican leaders.

Without the great mass of Republicans are desirous of "letting well enough alone," but they should not let well enough so severely alone as not to vote two weeks from to-day.

"Prosperity continues to increase" is a headline of the Cincinnati Enquirer. It is a fact, and the "increase" is doubtless due to the settlement of the coal strike and the increasing prospect of the election of a Republican House for the next Congress.

If David Bennett Hill does not now realize that his socialistic coal plank has put him out of the race for President most other people do.

The Marlon Club surpassed itself in last night's turnout. It marched in fours, and its four were well closed up.

It would be a reflection upon the intelligence of the average Illinois voter if he could be induced to vote any ticket which would make Senator Mason a candidate for re-election.

Secretary Shaw said in his speech last night that the Democrats who are conducting the campaign did not dare mention the platforms of 1896 and 1900.

Tomlinson Hall could have accommodated a somewhat larger audience than that of last night, but it was one of the largest audiences that has ever listened to a Republican speaker in "an off year."

Three or four weeks since the Journal, in common with other papers, published a dispatch stating that the Navajo Indians in Utah were on the verge of starvation.

Consul General Bragg, at Havana, has sent the State Department an expose of a fraudulent land scheme, which he says is being exploited by means of circulars in the

not protected by the tariff. Except that all the building trades are protected from European prices by the ocean, several of them are not protected.

The important point in the British report is that the wages of labor are decreasing in free-trade Great Britain, while in this country, with the much denounced protective tariff, they are holding their own and are from 40 to 50 per cent. higher than in England.

The tariff on cattle does not keep out of the American market animals fit for beef, but an inferior quality of young cattle. The tariff on beef does not keep out of this country the few fat cattle that Canada raises, because they are shipped to England.

WILL VOTE TO-DAY.

(CONCLUDED FROM FIRST PAGE.) The important events which have passed into history, printed indelibly on the hearts of long lines of men...

Mr. Mitchell's Views. The strike leader spoke as follows: "Gentlemen of the Convention: I desire to inform you that the president of your organization has done all he can to earn the attitude of the companies toward the men who are now on strike."

Now let me emphasize this point: The poorest boy that worked in a breaker is as dear to us as the man who runs the breaker. I desire to see that every man who has been struck back to his old job will make a sufficient effort to get back to work.

The day is passed when great organizations can maintain the same position that their members believe in. The right to organize into compact bodies which they desire to be members of, we recognize the right of capital to consolidate, to federate, to combine and to pool their resources.
