Riots and Mob Law.

In another column will be found full particulars of the late scenes of mob violence and bloodshed in St. Louis. They are the latest of a succession of similar outbreaks which have occurred within the last few months in many parts of the United States...

We are satisfied, however, that any person who considers the matter must conclude that of the great mass of them this can not be said. Growing stronger year after year, and wielding through elusiveness and combination an undue political influence which constantly becomes stronger and more dangerous...

INDIAN AGENTS APPOINTED.—A. G. Bolen and William H. Tappan have been appointed Sub-Indian Agents for Washington Territory. The ship owners of New York do not like Senator Fish's Emigration bill, which was reported last week in Congress...

DEATH FROM CLIMATE.—An Irish woman named Mary Brydell died in New York on the 10th inst., from injuries received by the explosion of a champagne lamp. RAILROAD COLLISION.—A dispatch from Havre de Grace, dated the 10th inst., states that an excursion train from Baltimore to Havre de Grace ran into a freight train at Howard Street...

FATAL ACCIDENT.—A man named McLaughlin was crushed to death on the 10th by being caught in some machinery. MISTAKEN IN THE PERSON.—The reputed arrest of Arison for the murder of the Allison, in Cincinnati, appears to have arisen from the arrest, at Keokuk, Iowa, of a Dr. Ward, who had recently been in that city...

THE CONTRACT FOR CARRYING THE GREAT RIVER MAIL FROM Louisville and St. Louis to New Orleans has been awarded to a company in New York, who are energetically engaged in making preparations to perform the service. A COMPROMISING CONGRESSMAN.—It is stated that the Hon. Gerrit Smith, of New York, in settling with the Sergeant-at-Arms, was entitled to about \$600 legal mileage, but only took \$90, being \$8 a day while coming and going, and actual traveling expenses.

RESIGNATION OF JUDGE SPOFFORD.—Judge Spofford has resigned the judgeship of the Eleventh Judicial District of this State, to be a candidate for Associate Judge of the Supreme Court, in place of Judge Campbell, resigned. The election took place last Monday, but we have not had any returns.

OMO RIVER.—A dispatch from Louisville, dated the 11th, says the river was so low that it was impossible for the smallest boats to come up. FRUIT CROP AT THE NORTH.—The Northern papers tell us that it is now reduced to a certainty that in Delaware there will be but a half of a peach crop, while in New Jersey there will be but a quarter crop.

Quite an interesting scene occurred at the dock of the Michigan Southern Railroad a few evenings since. A gentleman who had paid his fare to Toledo on board the steamer Northern Indiana was leaving the boat for the shore, with his portmanteau in his hand. While on the plank, by some means, he dropped it into the lake. Thinking, no doubt, he should not see it again, he offered to any one who would recover it one-half its contents. On hearing this, four persons belonging to the boat attempted its recovery. After diving four or five times, three of them gave it up as a bad job; but the fourth—barber—willing to give it up, so, diving seven times without success. Thinking there was no luck in odd numbers, and anxious for the prize, he determined to try once more. He dived the eighth time, and after remaining under so long that the bystanders feared he had lost himself, he appeared above water with the prize, which was hailed with loud and long cheers from the crowd. The gentleman, true to his word, counted out the lucky barber one-half of the money, which amounted to between \$400 and five hundred dollars. [Buffalo Republic.]

ANTI-NEBRASKA CONVENTION.

The anti-Nebraska Convention at Bangor, Me., has been largely attended. A mass convention was held at Bangor, Me., on the 9th, to appoint delegates to the Saratoga anti-Nebraska Convention. Over one thousand persons were present.

UNION OF SPAIN AND PORTUGAL.

The Paris correspondent of the London Times writes, under date of the 25th ult., as follows: "A person who arrived this day in Paris from Madrid, which I believe he quit on the 20th, states that at the moment of his departure there were cries in the streets of 'Viva España! Viva el Rey de Portugal!' Long live Espagnols! Long live the King of Portugal! The idea of offering the crown of Spain to the King of Portugal is not a new one. It has long been very general and very popular in the principal cities of Spain, and nearly a year ago commenced some particular efforts in the wish of the French, and I am disposed to believe the English Governments is, that Espagnols shall succeed in making himself master of the situation, and keeping Queen Isabella on the throne. But before Espagnols can reach the capital, it is possible that events may render such a solution, temporary as it may be, impossible."

A DEPRAVED MAN KILLED.—We learn from the East Mississippi, De Kalb county, that on the 6th inst. an affray occurred about one mile from the town of De Kalb, in which a man named Hall was killed. Deceased previously had a difficulty with one Dr. Brown, and had attempted to shoot him. A warrant was issued for his arrest, and placed in the hands of the county sheriff, Mr. Gully, who started in company with several men on horseback in pursuit of the offender. Hall resisted the arrest, and fired upon Gully with a pistol, wounding him twice severely. He then attempted to make his escape, but was shot dead by one of the party, Mr. Benjamin Neberly, who was armed with a double-barreled shot gun.

INURMAN CONDUCT.—Three children died recently in Brooklyn in a space of two days. The parents of the children left the house and went away in a carriage, and the corpses were buried by the authorities. GREAT LOSS OF LIFE.—The Cincinnati Gazette of the 9th states that it is supposed from fifteen to twenty lives were lost by the recent sinking of the steamer Cape May near Mount Vernon, Ia. At last accounts five dead bodies had been taken from the wreck.

INDIAN AGENTS APPOINTED.—A. G. Bolen and William H. Tappan have been appointed Sub-Indian Agents for Washington Territory. THE SHIP OWNERS OF NEW YORK do not like Senator Fish's Emigration bill, which was reported last week in Congress. The features which they do not like are those which require the refunding of the passage money in case of death, and the preparation and distribution of the food of the emigrants. They say that under the provisions of this bill, the ship owners will be obliged to raise the price of emigrant passage four hundred per cent. in order to secure themselves against positive loss.

A SEWING MACHINE from the United States has been bought by Louis Napoleon, it is said, for 100,000 francs, to make clothes for the army. An American, however, it is stated, has arrived in Paris and threatened to sue him for damages, as (the American) alleges that it is an infringement of his patent, and that the person who sold it to Napoleon had no authority to do so. Another of the machines has been purchased by the Princess Matilda, from the American who threatens to sue the Emperor.

THE SALARIES in the Departments at Washington, with the mileage and per diem of members, amount to \$1,845,938. \$1,000,000 are set down for the pay, mileage and other contingent expenses of the two Houses—or \$4000 per member—besides eighty thousand dollars for printing for part of the last session, and over two hundred thousand dollars more for books, voted and distributed to members of Congress. There are thousands more for reporting the debates in the Washington papers. The judicial expenses of the Government run well on to a million of dollars. This will do for an economical Administration.

A CASE OF CONSCIENCE.—A correspondent of the Philadelphia North American, writing from Port-au-Prince, under date July 22, says: "A curious circumstance occurred a few days since. A seaman on board the Prussian schooner Kennett Kingsford appeared before the American Commercial Agent, and on oath declared himself to be the person who killed John Meyer, last February, somewhere in the woods near Burlington, N. H. He stated that he fled, under the name of Brown, to London (Eng.), and that while there he heard that a person named Gottlieb Mulheisen had been arrested and would be tried for the murder, and that the latter gave the name of John Meyer as his name. He stated that he was against him, and now his conscience will not let an innocent man suffer, so he desired to be sent to the United States for trial. The United States Agent requested of the Prussian Consul that he would give the name of John Meyer as his name, and that his solemn declaration was taken before witnesses, and, no doubt, will soon be in the United States. In the mean time the man has disappeared, and neither Prussian nor American Consul know any thing of his whereabouts. The Prussian Consul, however, is in the employ of Alderman Sou, of Washington township, Burlington county, N. J. We think here that he will find his way to the United States, and surrender himself to justice."

KILLED BY A LYNX.—We learn that an Indian was killed in being daylight by an animal known as the lynx, within three or four miles of Tuscola county, some time last week. She had gone out from camp some distance to bring in some venison which an Indian had dressed and hung up, when returning with the meat on her shoulder, she was seized by the lynx on her back, and though she threw the venison as far from her as she could, in order to divert the attention of the lynx, it did not leave her until it had destroyed her life. [Saginaw Enterprise.]

EASY WAY TO COMPUTE INTEREST.—In a Baltimore paper a correspondent gives the following plan for computing interest at six per cent. for any number of days: Divide the number of days by six, and multiply the dollars by the dividend, and the result is the interest in decimals; out of the right hand figure and you have it in dollars and cents. What is the interest of \$100 for twenty-one days? 21 divided by 6 is 3; 100 multiplied by 3 is 300, or 30 cents. Again: What is the interest on \$75 for ninety-three days? 93 divided by 6 is 15; 75 multiplied by 15 is 1125, or 11 dollars and 25 cents.

AN UNSELFISH PRAYER.—A correspondent of the National Intelligencer, writing from Florida, gives an incident in relation to a prayer offered by request during a severe drought, by a venerable Methodist preacher who bore no good will to the Baptists. His prayer was somewhat remarkable for its unselfish tone, and ran this wise: "Let it rain, beginning at my plantation, in Hamilton county, coming down the religious neighborhoods of Columbia and Nassau, where immersion is not practiced, and reaching Black Creek, even Black Creek, and bringing forth in abundance, none of your little 'rubens,' however, but long ears, as long as your good right arm."

A SECOND GREYTOWN AFFAIR.—The citizens of Albany and Greenbush have been waging vigorous war upon the swine. On Saturday night, about 12 o'clock, the people of the latter place stormed and carried an extensive fortified pigpen on Greenbush Island. A flotilla of boats landed the storming party, and they carried the place by a coup de main. After the victory, the garrison was taken up to seek, and a venerable Methodist preacher who bore no good will to the Baptists. His prayer was somewhat remarkable for its unselfish tone, and ran this wise: "Let it rain, beginning at my plantation, in Hamilton county, coming down the religious neighborhoods of Columbia and Nassau, where immersion is not practiced, and reaching Black Creek, even Black Creek, and bringing forth in abundance, none of your little 'rubens,' however, but long ears, as long as your good right arm."

More Rioting and Bloodshed in St. Louis.

Six Persons Killed, and Many Wounded. From St. Louis Intelligencer of the 9th inst. we learn that another great riot attended with loss of life occurred in that city on the previous night, more disastrous and fatal in its results than that of the 7th, election day. After giving some further particulars of the former affair, and stating that between fifty and sixty houses and bar-rooms were sacked and their contents demolished, the Intelligencer says: "At about 11 o'clock last night a collision took place on Green street, near the corner of Sixth, between a party of Americans and Irishmen, resulting in the death of one man, and the wounding of six or seven others."

From persons who were on the ground at the time, we learn that a party of Americans were moving out Green street with the apparent intention of mischief, when they were fired upon by a body of Irishmen collected at the corner of the street. A number of shots were fired in rapid succession, resulting in the death, as before stated, of one man, an Irishman, named Morris Lee, who it is supposed was accidentally shot by a bullet fired from the corner of Morgan street, where he had been in a few moments. He stated that he had been in St. Louis but three days, and was in no way concerned in the fight."

The wounded were taken to the same drug store, and to physicians' offices in the neighborhood. We saw and conversed with four. A. G. Tice, American, badly wounded in both legs and shoulder, besides being shot in the hand. His physical condition, twenty-five knobby holes on his person; the wounds, however, not considered dangerous. Thomas Ferguson, a young man twenty-five years of age, badly wounded in the shoulder, and in the legs; the latter, however, were thought dangerous, his wounds were inflicted by buckshot. Ferguson resided on the corner of Ashley and Collins streets, and works in one of the machine shops in that vicinity. Mr. Michel, a trunk manufacturer, badly wounded in the head, and in the arms, and one through the thigh; he was suffering great pain—considered dangerous. John Nelson, tobacco-merchant, slightly injured, having one or more shots in the shoulder. Mr. Holliday, married, twenty-five knobby holes on his person; the wounds, however, not considered dangerous. The deposit of \$3,000,000 left with the Wall street banks by Senor Almonte, the Mexican Minister, was transferred on the 13th inst. to Senor Arangoiz, a special agent of the bankers of the city of Mexico, with whom his government has arranged for the disbursement of the money.

We have scattering returns from the country, but they are not very decisive. As far as we received from Miller's district, they indicate his re-election to Congress. But one thing is clear, the Benton party is flooded throughout the State of Missouri. The brig Cardenas, lately loaded at Mobile for Sagua in Grande, Cuba, has been lost on the Colorado. Capt. Hatchinson succeeded in saving only a part of the rigging and spars, which were to be sold at public auction. The vessel was insured at the North.

So far as could be ascertained there were seven wounded and one killed, as we have given above, although rumors current stated the number of the wounded to be twenty-five, and the killed, one or two. The military did not arrive until after the firing ceased, but to frighten off rioters who might be lurking about the scene, they were ordered to fire. When we left the ground at 12 o'clock, quiet prevailed in that immediate vicinity, but in other parts of the city yells and reports of firearms were to be heard. Squads were collected at most of the crossings in the neighborhood of the North Market, and we fear the end is not yet.

LATER.—One o'clock, A. M.—A report has just reached our office that the fighting is still going on. A dense crowd is collected at the corner of Ninth and Bidde streets. Firing has been done there, and E. R. Violet, a well known iron merchant of this city, has been murdered. There is no doubt about the death of this gentleman. Eye-witnesses inform us that he was walking along the street, with another citizen, when he was shot down. Mr. V. has been taken to his late residence on the corner of Bidde and Ninth. The man who it is supposed shot Mr. Violet is a colored man, taken to the calaboose. A large horse pistol was found in his possession and about two pounds of powder and ball. He gave his name as Timothy Lydon, an Irishman. At the corner of Broadway and Ashley street, two men were shot down about 1 o'clock. One, we understand, is John Foley, Lieut. of the Night Police, and the other a Mr. Snyder, a coffee-house keeper of the Sixth Ward. Snyder is dead, and Foley it is thought cannot live. The bodies were taken to the morgue. We know not where this thing is to end. While we write, at half-past one o'clock, the fire-bells are tolling, and the streets are filled with excited citizens. Policemen are "rapping" in every direction. Blood and bloodshed is the order of the night—the day may bring forth we dare not say.

ANOTHER DEATH BY LIGHTNING.—We learn from the Kane county (Ill.) Revue, of the 24th of March last, published at Southport, N. C., that a man named John F. W. Elmore, of Fayetteville, was struck dead by lightning. He was in the harvest field at work when the lightning struck him, completely paralyzing him. Water was poured down in large quantities, and he remained there undergoing repairs till the 24th of April, when he resumed his work. It is presumed that this ill-fated vessel must have received more damage in the collision than was at first supposed, and consequently made water, damaging the cargo, and eventually producing the ignition and conflagration of which we have written. The damage in her lower and upper works. She immediately bore up for Montevideo, and remained there undergoing repairs till the 24th of April, when she resumed her voyage.

FROM THE BRITISH PROVINCES.—In Prince Edward Island, the new reform administration has been organized and sworn in. A Halifax paper says: "The railroad from St. John's to this port. The contract for the line from St. John's to this port is in course of construction at Philadelphia. There are also two others at Glasgow. About twenty of the German passengers have gone to work on the railroad."

FEARFUL CATASTROPHE.—The Spanish vessel Victoria, Capt. Silvestre Garcia, of 500 tons register, sailed from St. Paul, on the 24th of March last, bound to Southampton, with a cargo of animal gum and bones. On the following day, and when still near the light ship, she came in contact with the American bark Lion, carrying away her bowsprit and rigging. The damage in her lower and upper works. She immediately bore up for Montevideo, and remained there undergoing repairs till the 24th of April, when she resumed her voyage.

WEATHER, CROPS, & C.

The Camden (Ala.) Republic of the 12th inst. says: "The weather and crops.—Until last evening there had been no rain in this portion of the county for several weeks. It was, indeed, a welcome shower, but we fear has come too late to do the planters any good. The crops, both corn and cotton, had been seriously injured by the long drought. Young corn was literally burnt up, and cotton had ceased to grow and was rapidly shedding its leaves."

The Bienville (La.) Times of the 11th says: "Cotton is now suffering very much. We are told it is dropping its leaves and forming now, and we know it will when showers come on and induce a new growth. The prospect was favorable three or four weeks ago. Potatoes, a very important crop in this country, must be short. The ground has been dried out, they only have had but little rain, and the season is too much advanced for them to make a good yield from a future growth. Our river and bottom lands have good crops, though even there the cotton is beginning to fall. The Camden Gazette of the 12th inst. says: 'Crops.—The upland cotton crop is bound to be a short one. This is not only the case in this parish, but in those adjoining, and in many of the counties in Texas from which we have heard. This is mainly owing to the drought, which the hot sun will aid materially in shortening the crop. The Camden Gazette of the 12th inst. says: 'Crops.—The upland cotton crop is bound to be a short one.
