ARRIVAL OF THE ORIZABA.
The steamer Orizaba, Capt. Forbes, from Vera Cruz, which port she left on the 22d inst., arrived here yesterday morning, bringing dates from the City of Mexico to the 16th and Vera Cruz to the 22d, as late as due.
The most important item of news is the confirmation of the report of the revolution and overthrow of the celebrated Count Rousset de Bouillon by General Yanes at Guaymas. The Count, it appears, arrived at Guaymas in a small vessel—entered the city in disguise and under an assumed name. He immediately procured an interview with some of his most intimate friends, belonging to a French battalion at that place, and also conversed with the soldiers, to the most of whom he was personally known, proposing to them the capture of the place.
At first they turned from his proposition and refused to have anything to do with him, advising him to return at once to San Francisco, but he persisted in his efforts, and in the course of a few days had succeeded in gaining the whole battalion of four hundred troops over to his purposes. He then opened his intentions, and endeavored to treat with Gen. Yanes—demanding of him certain hostages and the surrender of the artillery belonging to the post. This the General refused, and the Count placed himself at the head of his four hundred Frenchmen, and led them on more resolutely to the attack. After three hours hard fighting, he was forced to surrender at discretion, with the loss of fifty killed and a great many wounded. The loss on the part of the Government was but fourteen killed. A few of his men escaped and succeeded in getting on board of the little bark that had brought the Count to Guaymas, and which immediately set sail.

What becomes of all the Lily White?

In visiting our fancy and perfumery bazars, we notice an array of small, round and oblong boxes marked "Lily White." The inquiry arises, in what way is this Lily White used? For removing soil out of silks, broadcloths, etc.? Oh, no! the times are quite in advance, that! It is superseded by the Kocleor Soap. For what, then, is it prepared?
Go to the opera, theatre, or a social party; you notice the complexion of the fair of our land; there are many with classic features, illuminated with Italy's dark eyes, and shaded by beautiful raven tresses; but you find no brunettes complexion to correspond with these; the complexion of both faxes and dark haired ladies rival so, whiteness their snowy robes. Do you not begin to discover for what these numerous little boxes are imported?
Oh! that I could, by persuasion or argument, influence our young ladies to discontinue the use of this slow poison! "Poison!" you exclaim. Yes, that which injures the constitution is a poison. It is well known that the human body throws off, in every twenty-four hours, through the pores, an immense amount of its fluids; if by having your pores properly filled with Whiting, you prevent this rejecting process, the perspiration must return and injure the system. I have seen this pearl powder, or Lily White, so buried in the skin that it would require no ordinary vapor bath of the Hot Springs to exhumate it. With my dear young friends who are just entering society, and have not yet become initiated into this occult custom, I would affectionately reiterate. Maidenhood into womanhood, how imperceptibly it glides!

Let us contemplate for a moment our society; do we devote as many of our golden moments to literary attainments as to the toilet? Frothing in her "Homes of the New World," gives the need that is due to our institutions of learning and those for the indigent and afflicted, and as far as her former prejudices will allow, she does justice to our institution of Slavery. Does she do us injustice when she says: "Artifice and vanity exercise no less power over our sex in this country than in the great cities of Europe, and far more than in our good Sweden." If she is just, let us determine that this shall no longer be our characteristic. Let us throw off all artificial thraldom, we daughters of our free and beautiful America. Let us be as natural and as lucid as our pure mountain rivulets.
Do you desire a beautiful complexion? Obtain from your father a few garden implements, tend with your own hands your flowers, and you will receive from them, as in grateful return, the blending of their loveliest hues. And many sweet lessons will they teach your heart in their silent language, causing your spirit to be as sweet as their fragrance. Rise early, and let your orisons and songs of praise ascend in concert with those of the warblers of the grove.
By way of securing a fine, elevated chest and healthy lungs, arrange your own apartment; don't fear the broom nor dusting-brush; the beauty that using them will give to the whole form will counterpoise the injury your tiny hands may sustain. By doing this you give an hour of leisure to your maid, for which, I am sure, she will be very thankful.
To my young friends who are addicted to the use of Lily White, I would say: "Leave it off now, if you desire to be handsome when you are old." Don't try to leave off by degrees, as the inebriate does from his wine. Use no cosmetic but cold water, pure from the fountain. Take exercise in the fresh air, and, as an auxiliary, abstain from all beverages that excite the nerves: such as tea, coffee, etc., (of course, you never touch wine or cordial in this age of Temperance Reform.)
A friend of mine visited a young lady who was dying; she presented the worst aspect, and so shocked was she at her own appearance that she requested no one should be admitted to her chamber but particular friends. Her skin was discolored, and perfectly ashy; caused by the excessive use of Lily White, which her physicians said had caused her death.
We will view a brighter picture. There resides in A. a lady nearly seventy, who, though not exactly a Rosierian, has almost rejuvenated herself by exercise, temperate diet and cold bathing. Her cold baths are taken during cold as well as warm weather, and I imagine her spirits and mind are as elastic and youthful as her limbs.
I fear my young readers are desirous of a true diet, bath and Lily White. ELIA.

Mr. Pelham, says the Union, carries with him the wishes of a large circle of warm and devoted friends for his success in that sphere of duty for which his talents and experience so eminently qualify him.
Some scattered recently sold from the Clerk's office, in Yazo City, Miss., the papers in one hundred and fifty civil suits brought at the last (May) term of the Circuit Court, and all the indictments found at that term. It appears that all the bonds of the county officers were stolen from the office of the Probate Clerk about the same time. The papers taken from the Circuit Clerk's office were subsequently found beneath the floor of the Court-house. The bonds have not yet been found.

GOLD DISCOVERED ON THE HEAD WATERS OF THE AMAZON.—The Lima Herald contains a long account of a recent discovery of gold-washings at Chachapoyas, on the head waters of the Amazon, in Peru, by the first party of North Americans who went to seek for gold on the upper waters of the Amazon. They found several pieces weighing from 1 to 11 ounces, and others smaller. They immediately commenced erecting houses preparatory to mining.
