A MELANCHOLY SURVIVORSHIP
The case of Underwood vs Wing was heard in the District Court last week, the facts of which were very peculiar and interesting. Mr. and Mrs. Underwood, of Burnsted, in Essex, made their wills on the 4th of October, 1853, in contemplation of going to Australia, by which they appointed the Rev. Mr. Underwood, of the benefit of the survivor of them. Mr. Underwood's will left his property to his wife for life, provided she survived him, and in his will provided for the care of his children, and in case of his wife dying before him, or none of his children attaining twenty-one years, (or if a daughter, marrying), then to be left the whole of the property mentioned in his will absolutely to his friend Mr. Wing, of Bond street. Mrs. Underwood's will was to the effect that she left the property over to her husband, provided he survived her, and in case he died before her, then she left it to Mr. Wing absolutely. Both Mr. and Mrs. Underwood appointed Mr. Wing their executor.

UNRECORDED A VICTIM.—The New York correspondent of the Charleston Courier relates the following bit of scandal in speaking of the arrival of Grid and Mario:
The only piece of gossip that I have heard at all, referring to these musical artists, is rather unpleasant, besides being literally true. An English man seems to have become very much interested with Mario, and knowing that it was his intention to visit America, he accordingly announced that he would sail in the Baltic, she, took passage in the same steamer, and arrived here on Saturday. She went to the hotel as the handsome tenor. The most singular circumstance in connection with this romantic affair is, that the enamored and persevering English woman never spoke to Mario in her life. She is neither young nor handsome, and Mario is said to be exceedingly displeased at her assuming partiality for him. What Grid thinks of it, is a matter of great conjecture.

KILLING MADE EASY.—The New York Tribune says that important experiments with new artillery have just been made in England, in the presence of military and naval commanders. The practice consisted of a 68-pounder gun, ten feet long, weighing 95 cwt., on Lancaster's principle of the bore, being oval instead of round, which gives the largest guns all the advantages possessed by the smaller ones, or shells of a particular description are used. Excellent practice, it is stated, can be made with rifles as considerable ranges, but until the experiments with Lancaster's oval guns or egg-shaped shells, correct aim can not be taken at the astonishing distance of 5,000 yards, the range of the practice which elapsed during the night of the destructive projectile, weighing upward of 85 pounds, owing to its elongated form, caused, according to the account given, a feeling of great surprise, but when it fell at a distance of 5,000 yards, and in no instance did the shells fall wide or short of the target, the spot where it fell and burst presented the appearance of the eruption of a volcano, the sand being raised to a great height in the air. Experiments were also carried on with Moorsom's shells at 3,000 yards, and the practice with them and with shot is described as very good. Several other guns have been made of smaller bore, on Lancaster's principle, for the purpose of carrying on experiments with them.

THE DAILY CRESCENT
ANOTHER MURDER.—About nine o'clock on Tuesday night a free colored man named Michel Honore, was brutally assassinated by another free colored person named Duetri Barjon, (both natives of this city, and well known) near the corner of Ursuline and Romaine streets, in the Second District. The circumstances as we could gather them, are substantially as follows: About five months since the parties had a quarrel one evening in the Globe ball room, since which time they have been deadly foes. Last night Barjon, accompanied by two friends, Xavier and Baptiste Jourdain, repaired to the residence of Michel Honore, on Ursuline street, and remaining on the banquet, sent a small boy into the house to call him out. He came out, walked up to Barjon and asked him what he wanted. The latter, it is said, made no reply, but struck him over the head with a stick, when Honore drew a pistol and fired at him. Barjon then attacked him with a dagger, and killed him, stabbing him thirteen times—six times in the breast, four in the back, and three in the left arm. Honore fell dead on the banquet—the murderer and his accomplices fled, and have not since been heard of. The coroner held an inquest on the body of the murdered man, and after investigating the matter, the jury rendered a verdict that deceased came to his death from wounds inflicted by a short pointed instrument in the hands of one Duetri Barjon, f. m. c., on the evening of the 29th inst. A warrant has been issued for the arrest of Barjon, and his accomplices, and Capt. Baldwin has made every effort to secure them, but as yet no clue has been discovered as to their whereabouts. Although the report of a pistol was heard by several persons about the time of the murder, yet the same could not be traced, as the only person found with the gun was a small pistol which was loaded. A few minutes subsequently to the murder, however, the alarm had been given, Roundman Renard met Barjon a short distance from the place, who told him that he had just fought, and showed him some blood on his forehead. Renard advised him to go home, and get his wounds dressed, being wholly unaware of the horrible crime that had just been perpetrated, and that the blood on Barjon was from the thirteen ghastly wounds of the murdered man. When Renard glanced the facts afterwards, and retraced his steps to arrest Barjon, that wily murderer was not to be found. It is the opinion of the majority of those who saw the body of the murdered man, that Barjon must have been assisted by his friends in the bloody work. It is the only hypothesis on the arms can be reasonably accounted for. As yet neither the murderer nor his accomplices have been arrested.

FIRST DISTRICT.—DANGEROUS.—James McGar was arrested in the First District on the Levee for being drunk and running around with a drawn knife in his hand, with the avowed intention of cutting some body.
ASSAULTING A POLICEMAN.—An individual named Pat Hadden was taken into custody night before last for assaulting and cutting policeman Jennings with an axe. Pat was arraigned yesterday.
LABREY.—J. M. Foyger was under arrest yesterday on a charge of having stolen a lot of expensive furs from Frederick Derckmeyer and James McKean on Enterprise street.
SWEALING BUTTER.—Caroline, a slave girl of Mr. Martin, was arrested yesterday for stealing a ham and some butter from G. W. Pope on Tchoupcholas street.
SECOND DISTRICT.—ROBBERY.—John Smith, that ubiquitous individual, was assaulted and robbed of sixteen dollars, on Tuesday night, at the corner of Old Levee and Hospital streets, by a fellow named Charles Gages. The robber has been arrested, and is now in jail.
LABREY.—A warrant was issued yesterday for the arrest of Gaspard Genness, charged with having stolen \$50 in money and \$50 worth of female wearing apparel from Miss Mariani Spasetta.
COMMITTED FOR TRIAL.—N. Slowensneider was examined and committed for trial, before the First District Court, on a charge of having assaulted and seriously beaten L. Foyner on the night with a large iron key on the night of the 21st inst.

FOURTH DISTRICT.—THREATS TO KILL.—Michael Ryan was arrested on a warrant, charged by Michael Hickey with assaulting and threatening to kill him.
POOR WOMAN.—Ellen Hogan was found sleeping out at a late hour last night on a pile of stones in the Fourth District. Being thus exposed to the night air, the police conducted her to the guard-house.
SHOCKING RAILROAD ACCIDENT.—On Saturday week, near Cummingsville, Ohio, while the Pittsburgh morning train was going at the rate of thirty miles an hour, the locomotive struck a wagon, containing two boys. The wagon was broken into a thousand pieces, and the horse instantly killed. One of the boys, named Philip Dutchnan, was torn into about a hundred pieces. His arms and legs were found scattered in different directions. His heart was found suspended to a limb of a tree, about twenty feet from the scene of the accident. His head and the upper part of his body was mangled by the train, which ground him on the track as it passed over him. The other young man who was with Philip, was thrown to one side of the road and injured so badly that he died in a few minutes.
